Biocidal Theodore Michael Dracos, 2010-11-16 The first full account of the scientific and political dynamics of global PCB contamination and its threat to human health and the environment Whether or not you've heard of PCBs polychlorinated biphenyls it's likely that this toxic chemical can be found in your cells PCBs were invented in 1920 for the electronics industry fueled the WWII military machine then were put to domestic uses and finally came to be present in every corner of the earth Because PCBs were outlawed in 1976 most people think they are no longer a threat However like many industrial chemicals PCBs persist in our environment and continue to accumulate in practically every life form on earth becoming more concentrated in the tissues of those highest on the food chain like us In *Biocidal* investigative journalist Ted Dracos explores the science behind how PCBs affect the environment amphibians fish and mammals He also draws on extensive research to document the connection between PCBs and catastrophic human illness From the beginning even as workers in the first manufacturing plants quickly began to suffer skin lesions boils liver failure and death the industry denied the danger of its chemicals and manipulated science regulatory agencies and the government to continue to make and distribute PCBs throughout the next half century Dracos provides the latest scientific findings in the heated controversy that surrounds the continued health impacts of PCBs ranging from cancer to immunosuppression endocrine disruption fetal brain development reproductive abnormalities and even autism Yet *Biocidal* is optimistic leaving readers with a complete and surprisingly uncomplicated blueprint of what can be done and is being done to counter the risks and damages of PCBs and other industrial chemicals

Randall,2015-08-20 Our everyday lives are enmeshed in storytelling the stories we tell about our memories the people we know and the world we inhabit those we tell about our families and communities and the narratives we encounter in books movies and television Narrative structures how we view ourselves and everything around us In The Narrative Complexity of Ordinary Life William L Randall shows how concepts central to the study of narrative psychology such as narrative development and the interrelation between narrative and identity cognition and development

are integral to everyday life He makes the case that all people function as narrative psychologists by continually storying their lives in memory and imagination as well as speculating on the stories that others may be living a process that Randall refers to as storyotyping Relying heavily on narrative Randall draws from experiences in his own life to illustrate various concepts in narrative psychology His inquiry leads him to the topics of gossip rumor and the narrative complexity of nostalgia In doing so he makes the case that all people function as narrative psychologists by continually storying or cementing their lives in memory and imagination a process Randall refers to as storyotyping

Special Warfare, 1994

Are We Screwed? Geoff Dembicki, 2017-01-01 A declaration of independence and a call for systemic change from the generation that will be most impacted by climate change If anyone doubted the potential political power of the Millennial generation Bernie Sanders campaign put it in the spotlight *Are We Screwed* makes clear that the ardor for change defines this generation especially when it comes to climate change and they are willing to consider options that their elders might think naive and impractical rejecting a capitalism that cares only about profit and a political system riven by false ideology In telling the stories of his contemporaries around the globe in describing how they think and the many ways they are already effecting change Geoff Dembicki documents a historic shift in values and a corresponding re thinking of how social change can happen As of this year the millennial generation 18 to 34 year olds will become North America s largest demographic It is also the generation that has lived with the looming reality of global warming and will be most affected by its impacts In vividly reported dispatches from Beijing to Paris from San Francisco to New York Dembicki examines what millennial responses to climate change look like and how they are shaping our future He also provides an essential perspective on how climate change is intensifying generational tensions and shifts in society In the process a portrait of a generation emerges that goes a long way toward re branding it in ways that are positive and full of hope for the future

Who's Teaching Your Children? Vivian Troen, Katherine C. Boles, 2008-10-01 Many of the

problems afflicting American education are the result of a critical shortage of qualified teachers in the classrooms The teacher crisis is surprisingly resistant to current reforms and is getting worse This important book reveals the causes underlying the crisis and offers concrete affordable proposals for effective reform Vivian Troen and Katherine Boles two experienced classroom teachers and education consultants argue that because teachers are recruited from a pool of underqualified candidates given inadequate preparation and dropped into a culture of isolation without mentoring support or incentives for excellence they are programmed to fail Half quit within their first five years Troen and Boles offer an alternative a model of reform they call the Millennium School which changes the way teachers work and improves the quality of their teaching When teaching becomes a real profession they contend more academically able people will be drawn into it colleges will be forced to improve the quality of their education and better prepared teachers will enter the classroom and improve the profession

Vogan, 2014-03-15 NFL Films changed the way Americans view football. *Keepers of the Flame* NFL Films and the Rise of Sports Media traces the subsidiary's development from a small independent film production company to the marketing machine that Sports Illustrated named perhaps the most effective propaganda organ in the history of corporate America. Drawing on research at the NFL Films Archive and the Pro Football Hall of Fame and interviews with media pioneer Steve Sabol and others, Travis Vogan shows how NFL Films has constructed a consistent romanticized and remarkably visible mythology for the National Football League. The company packages football as a visceral and dramatic sequence of violent beautiful graceful and heroic gridiron battles. Historically proven formulas for presentation such as the dramatic voiceovers once provided by John Facenda's baritone, the soaring scores of Sam Spence's rousing background music and the epic poetry found in Steve Sabol's scripts are still used today. From the Vincent Price narrated *Strange but True Football Stories* to the currently running series *Hard Knocks*, NFL Films distinguishes the NFL from other sports organizations and from other media and entertainment. Vogan tells the larger story of the company's relationship with and vast influence on our culture's representations of sport, the expansion of sports television beyond live game broadcasts and the emergence of cable television and Internet sports media. *Keepers of the Flame* NFL Films and the Rise of Sports Media presents sports media as an integral facet of American popular culture and NFL Films as key to the transformation of professional football into the national obsession commonly known as America's Game.

Publications Combined: Russia's Regular And Special Forces In The Regional And Global War On Terror, Over 2 400 total pages. Russian outrage following the September 2004 hostage disaster at North Ossetia's Beslan Middle School No 1 was reflected in many ways throughout the country. The 52 hour debacle resulted in the death of some 344 civilians including more than 170 children in addition to unprecedented losses of elite Russian security forces and the dispatch of most Chechen allied hostage takers themselves. It quickly became clear as well that Russian authorities had been less than candid about the number of hostages held and the extent to which they were prepared to deal with the situation. Amid grief calls for retaliation and demands for reform, one of the more telling reactions in terms of hardening public perspectives appeared in a national poll taken several days after the event. Some 54% of citizens polled specifically judged the Russian security forces and the police to be corrupt and thus complicit in the failure to deal adequately with terrorism while 44% thought that no lessons for the future would be learned from the tragedy. This pessimism was the consequence not just of the Beslan terrorism but the accumulation of years of often spectacular failures by Russian special operations forces (SOF) in the apt US military acronym. A series of Russian SOF counterterrorism mishaps, misjudgments and failures in the 1990s and continuing to the present have made the Kremlin's special operations establishment in 2005 appear much like Russia's old Mir space station: wired together, unpredictable and subject to sudden startling failures. But Russia continued to maintain and expand a large variegated special operations establishment which had borne the brunt of combat actions in Afghanistan, Chechnya and other trouble spots and was expected to serve as the nation's

principal shield against terrorism in all its forms Known since Soviet days for tough personnel personal bravery demanding training and a certain rough or brutal competence that not infrequently violated international human rights norms it was supposed that Russian special operations forces steeped in their world of threats to the state and associated with once dreaded military and national intelligence services could make valuable contributions to countering terrorism The now widely perceived link between corrupt special forces on the one hand and counterterrorism failures on the other reflected the further erosion of Russia s national security infrastructure in the eyes of both Russian citizens and international observers There have been other more ambiguous but equally unsettling dimensions of Russian SOF activity as well that have strong internal and external political aspects These constitute the continuing assertions from Russian media the judicial system and other Federal agencies and officials that past and current members of the SOF establishment have organized to pursue interests other than those publicly declared by the state or allowed under law This includes especially the alleged intent to punish by assassination those individuals and groups that they believe have betrayed Russia The murky nature of these alleged activities has formed a backdrop to other problems in the special units
