Intelligent Sensor Node-Based Systems Anamika Ahirwar,Piyush Kumar

Shukla, Prashant Kumar Shukla, Ruby Bhatt, 2023-10-06 This new volume covers the fusion of IoT and wireless communication technology for real life applications. It discusses the current developments, trends and latest usage of technology in wireless sensor networks, WSNs and IoT which offer improvement in many areas including enabling smart homes in agricultural systems for security systems for university monitoring systems and more. The volume also provides a theoretical analysis and discussion of the factors influencing smart sensing, exploring the state of the art IoT elements that are designed to be analogous to WSNs. It looks at advancements in IoT systems along with a two way usage with wireless sensor networks that span the gap between the physical and virtual worlds leading to a hyperconnected society where devices are not only used to exchange data but also are smart devices with more capabilities. The chapters reveal how these technologies are used in smart homes for intelligent sensor based cognitive radio networks for different techniques for data fusion for the synthesis and fabrication of nanosensor devices for monitoring agricultural nutrient levels and more. Furthermore, the fake user problems in WSNs are also investigated with a note on the current trends and the newer trends to come in near future.

Intelligent Retail Gerrit Heinemann, 2022-10-13 This book shows stationary retail a way to reinvent itself after Corona in order to be able to survive against the strong competition of online retail. The focus is on the central issues that will shape the retail of the future. For example, brick and mortar retail in particular must now work with intelligent systems based on data and adopt or even surpass methods that the large online marketplaces have been using successfully for a very long time. In this regard, artificial intelligence also plays a major role in retail. This is not just about automation and robots taking over tasks but also about instruments and machines being able to learn and draw conclusions themselves in all retail functions. This is becoming increasingly difficult because our shopping and search behavior is constantly changing. Therefore, a customer should receive intelligent recommendations in the store which are also based on his already known interests and behavior patterns. Gerrit Heinemann shows how intelligent action can save stationary retail in city centres and shopping centres. The content: From stationary Retail to intelligent Retail. Threats to the stationary retail trade. Basic requirements and manifestations of intelligent Retail. Examples of intelligent retail of the future. Risks for intelligent Retail. **Current Trends**

in Web Engineering, ICWE 2010 Workshops Florian Daniel, Federico Michele Facca, 2010-10-27 Second we wanted to attract new audiences to the conference selecting also novel workshops that cover topics of an emerging or foundational nature that extend the focus of ICWE beyond its traditional topics. We reached this goal by betting on subjects such as the Semantic Web, semantic data management, the Internet of things, Web enabled tourism, service based compliance management and e crowdsourcing. *Inside Smart Cities* Andrew Karvonen, Federico Cugurullo, Federico Caprotti, 2018-10-03 The era of the smart city has arrived. Only a decade ago the promise of optimising urban services through the widespread application of information and communication technologies was largely a techno-utopian fantasy. Today smart urbanisation is occurring via urban projects, policies and visions in hundreds of cities around the globe. Inside

Smart Cities provides real world evidence on how local authorities small and medium enterprises corporations utility providers and civil society groups are creating smart cities at the neighbourhood city and regional scales Twenty three empirically detailed case studies from the Global North and South ranging from Cape Town Stockholm and Abu Dhabi to Philadelphia Hong Kong and Santiago illustrate the multiple and diverse incarnations of smart urbanism The contributors draw on ideas from urban studies geography urban planning science and technology studies and innovation studies to go beyond the rhetoric of technological innovation and reveal the political social and physical implications of digitalising the built environment Collectively the practices of smart urbanism raise fundamental questions about the sustainability liveability and resilience of cities in the future The findings are relevant to academics students practitioners and urban stakeholders who are questioning how urban innovation relates to politics and place
