*Community Series in Mental Illness, Culture, and Society: Dealing with the COVID-19 Pandemic, volume VIII* Mohammadreza Shalbafan, Samer El Hayek, Renato de Filippis, 2024-06-21 The COVID 19 outbreak has impacted many areas of our lives including mental health Lockdown and physical distancing measures have been one major effective intervention to counter the spread of the virus and reduce the impact of the disease However they have negatively impacted mental well being and behaviors either triggering the onset of new psychiatric symptoms and diseases or amplifying pre existing ones The pandemic and lockdown measures have also

been associated with reduced access to treatment and facilities all over the world further worsening mental health outcomes. The impact on mental health although universal varied between nations. Cultural and societal variables including norms, values, religion, and stigma have played an important role in shaping COVID-19 related mental health symptoms including anxiety, depression, grief, psychosis, and addiction. These sociocultural factors have also molded how mental health interventions are tailored and provided. Highlighting the intertwining relationship between the pandemic mental health and sociocultural factors are essential to managing emerging mental health symptoms adequately.

**Reading-to-Write** Linda Flower, Victoria Stein, John Ackerman, Margaret J. Kantz, Kathleen McCormick, Wayne C. Peck, 1990-09-20. The Social and Cognitive Studies in Writing and Literacy Series is devoted to books that bridge research theory and practice exploring social and cognitive processes in writing and expanding our knowledge of literacy as an active constructive process as students move from high school to college. This descriptive study of reading to write examines a critical point in every college student's academic performance when he or she is faced with the task of reading a source, integrating personal ideas, and creating an individual text with a self-defined purpose. Offering an unusually comprehensive view of this process, the authors chart a group of freshmen as they study and write in their dormitories, recording their think-aloud strategies for reading, writing, and revising their interpretation of the task and their broader social, cultural, and contextual understanding of college writing. Flower, Stein, and colleagues convincingly conclude that the legacy of schooling in general makes the transition to college difficult and more important that the assumptions students hold and the strategies they use in undertaking this task play a significant role in their academic performance. Embracing a broad range of perspectives from rhetoric, composition, literacy research, literary and cultural theory, and cognitive psychology, this rigorous analysis treats reading to write as both a cognitive and social process. It will interest researchers and theoreticians in rhetoric and writing, teachers working with students in transition from high school to college, and educators involved in the links between cognition and the social process.

*Import Competition and Response* Jagdish Bhagwati, 2009-02-15. These papers by a number of leading international trade theorists present the first significant theoretical work to be done on a topic of considerable interest: import competition. Nine theoretical papers on topics ranging from protectionist lobbying to adjustment costs are synthesized in the editor's Introduction, which also contrasts these contributions with the traditional classroom analysis of import competition. Three major empirical studies close the volume. It will prove indispensable for anyone who wishes to think clearly about import competition and about how economies do and should respond to it.
