Mapping the Darkness Kenneth Miller,2023-10-03 WINNER OF THE 2024 ASJA BOOK AWARD BIOGRAPHY HISTORY NAMED A BEST BOOK OF THE YEAR 2023 BY THE NEW YORKER NEW YORK TIMES EDITOR S CHOICE SELECTION From award winning journalist Kenneth Miller comes the definitive story of the scientists who set out to answer two questions Why do we sleep and How can we sleep better A century ago sleep was considered a state of nothingness even a primitive habit that we could learn to

overcome Then an immigrant scientist and his assistant spent a month in the depths of a Kentucky cave making nationwide headlines and thrusting sleep science to the forefront of our consciousness In the 1920s Nathaniel Kleitman founded the world's first dedicated sleep lab at the University of Chicago where he subjected research participants including himself to a dizzying array of tests and tortures But the tipping point came in 1938 when his cave experiment awakened the general public to the unknown and vital world of sleep Kleitman went on to mentor the talented but troubled Eugene Aserinsky whose discovery of REM sleep revealed the astonishing activity of the dreaming brain and William Dement a jazz bass playing revolutionary who became known as the father of sleep medicine Dement in turn mentored the brilliant maverick Mary Carskadon who uncovered an epidemic of sleep deprivation among teenagers and launched a global movement to fight it Award winning journalist Kenneth Miller weaves together science and history to tell the story of four outsider scientists who took sleep science from fringe discipline to mainstream obsession through spectacular experiments technological innovation and single minded commitment Readers will walk away with a comprehensive understanding of sleep and why it affects so much of our lives A propulsive utterly engrossing history None of it is simple and all of it is captivating The New York Times Mapping the Darkness offers two narratives at once a sweeping journey of discovery about dreams sleep and the terra incognita of unconsciousness and a wake up call about the dangers of chronic exhaustion It's time Mr Miller tells us to take our sleep back The Wall Street Journal

The Wrongful Conviction of Oscar Pistorius Brent Willock, 2018-05-08 Just when the world thought Oscar Pistorius meteoric rise to Olympic glory and international celebrity had terminated abysmally in prison Brent Willock's scientific perspective reopens this gripping narrative for an astonishing re view Olympian Oscar Pistorius spectacular ascent to fame ground to a screeching halt in the wee hours of Valentine's Day 2013 Hearing a sound emanating from his bathroom he grabbed his pistol and he stumbled to the washroom screaming at the intruders to leave Fearing someone was about to emerge to harm him and his girlfriend Reeve he fired four bullets into the bathroom Soon he realized he had killed his lover Horrified he summoned the authorities The investigating detective believed this was yet another case of an escalating argument where a man murdered his partner World opinion is split Some believe Oscar Others are convinced he committed a despicable crime of passion Distinguished clinical psychologist Brent Willock brings an entirely new perspective to bear on these horrific events that Oscar's horrific actions occurred while he was in a state of paradoxical sleep also known as parasomnia Throughout this book Willock uses scientific scrutiny and legal precedence to resolve the crucial anomalies surrounding the Oscar Pistorius trial Willock also discusses how mental health experts and the defense team might have overlooked the hypothesis of parasomnia that could have exonerated Oscar Millions who followed the Blade Runner's astonishing achievements uplifted and inspired by his triumph over physical adversity were crushed by his precipitous plunge from grace They were baffled Even Oscar himself in a television interview shortly before his sentencing achingly asked I always think How did this possibly happen How could this have happened At last Willock's
