Bipolar fuzzy hypersoft set and its application in decision making Ashraf Al-Quran, Faisal Al-Sharqi, Kifayat Ullah, Mamika Ujianita Romdhini, Marwa Balti, Mohammed Alomair, 2023-01-01 Smarandache developed the idea of hypersoft set HSS theory as an extension of soft set SS theory. HSS provides a general mathematical framework for handling data that can be formulated as several trait valued disjoint sets which blend to various traits. The major goal of this article is to lay the footing for supplying a new model called bipolar fuzzy hypersoft sets BFHSSs by linking both fuzzy sets FSs and HSSs under bipolarity property. By using positive and negative membership functions and multi argument functions these structures work best for testing uncertainty. This makes them better at solving real world problems especially ones that have both good and bad sides. This paper also has different operations for BFHSSs such as absolute BFHSS, null BFHSS, complement, subset, union, intersection and their related properties. Moreover, operations like OR and AND for BFHSS have been instituted. Some properties are demonstrated and some numerical examples are given to illustrate the mechanism of using these tools. Finally, these tools are applied in the decision making process based on an algorithm that is built.
