Copyright Office, 1936 **New Serial Titles**, 1985 **Computer Books and Serials in Print**, 1984 *Protecting National Security* Phil Glover, 2021-07-27 This book contends that modern concerns surrounding the UK State's investigation of communications and more recently data whether at rest or in transit are in fact nothing new It evidences how whether using common law the Royal Prerogative or statutes to provide a lawful basis for a state practice traceable to at least 1324 the underlying policy rationale has always been that first publicly articulated in Cromwell's initial Postage Act 1657 namely the protection of British national security broadly construed It further illustrates how developments in communications technology led to Executive assumptions of relevant investigatory powers administered in conditions of relative secrecy In demonstrating the key role played throughout history by communications service providers the book also charts how the evolution of the UK Intelligence Community entry into the UKUSA communications intelligence sharing agreement 1946 and intelligence community advocacy all significantly influenced the era of arguably disingenuous statutory governance of communications investigation between 1984 and 2016 The book illustrates how the 2013 Intelligence Shock triggered by publication of Edward Snowden's unauthorized disclosures impelled a transition from Executive secrecy and

statutory disingenuousness to a more consultative candid Executive and a policy of transparent secrecy now reflected in the Investigatory Powers Act 2016 What the book ultimately demonstrates is that this latest comprehensive statute whilst welcome for its candour represents only the latest manifestation of the British state s policy of ensuring protection of national security by granting powers enabling investigative access to communications and data in transit or at rest irrespective of location

Church Advertising, Public Relations and Marketing in Twentieth-Century America John C. Hardin, 2022-12-14 This book examines the complex relationship between religion and business in twentieth century America It is the story of how Christianity s most basic institution the local church wrestled with the challenges and compromises of competing in the modern marketplace through adopting the advertising public relations and marketing methods of business It follows these sacred promoters and their critics as they navigated between divinely inspired and consumer demanded Amid an animated and contentious battleground for principles practices and parishioners John C Hardin explores the landscape of selling religion in America and its evolution over the twentieth century

World without End James H. Moorhead, 1999-10-22 In this compelling intellectual and social history Moorhead argues that for mainline Protestants in the late 19th century time became endless human directed and without urgency Moorhead offers some brilliant observations about the legacy of postmillennialism and the human need for a definitive eschaton Publishers Weekly In the 19th century American Protestants firmly believed that when progress had run its course there would be a Second Coming of Christ the world would come to a supernatural End and the predictions in the Apocalypse would come to pass During the years covered in James Moorhead s study however moderate and liberal mainstream Protestants transformed this postmillennialism into a hope that this world would be the scene for limitless spiritual improvement and temporal progress The sense of an End vanished with the arrival of the new millennium

Research in the Social Scientific Study of Religion Ralph L. Piedmont, 2005-11-01 Various articles are presented covering psychological sociological and cross cultural topics or relevance to religious spiritual researchers and academics
