George Zebrowski, author of the best-selling novel *OMEGA POINT*, is a unique and creative talent whose thoughtful and entertaining works have generated great critical praise and gained him a devoted following of readers.

One of these fans is Thomas N. Scortis, who writes in the introduction to this volume: "I have watched George Zebrowski's body of work grow for five years. The distance he has travelled in half a decade is impressive. The rate at which his talent is growing makes me impatient to see the product of his talent twenty years from now.... I have watched Zebrowski grow artistically to become one of the leaders of the new generation of science fiction writers...."

**The Monadic Universe** George Zebrowski,1985      [A Theory of Monads](#) Herbert Wildon Carr,1922      **The Monad Manifesto** Dennis William Hauck,2022-03-08 The Monad is the indivisible single source of consciousness and information that created our universe In philosophy the Monad is the origin of all things the totality of both our present existence and all possible future incarnations For theologians it is the Word of God that created the world In mathematics the Monad is the archetypal origin of all the numbers and geometric shapes that describe Nature Computer scientists view it as the cosmic code embedded in the matrix of reality In science the Monad is the Singularity the Big Bang explosion of light and consciousness from which our universe sprung forth In The Monad Manifesto we explore the mysterious monadic origin of the universe and its relationship to the field of conscious awareness that we all share The book is organized into a central Manifesto and ancillary chapters that expand and document the ideas presented These chapters include The Monad in Philosophy The Monad in Science The Monad in Mathematics and Monad Cosmology We will also explore the ways people experience monadic reality in the chapter Monadic Experiences Then we will learn methods of meditation developed down through the ages to connect to the Source in Monad Meditations      [The Science of Monads](#) Mike Hockney,2015-07-31 Scientific materialism isn't the only type of science Leibniz the great German genius was a champion of scientific idealism The atoms in his system weren't physical but mental and he named them monads A present day Leibniz might say All things are made from mental atoms which are simple mathematical substances from which all compounds are mathematically derived via the laws of ontological mathematics Monads are expressed through constant motion and that mental motion is what we call thinking Pure thinking takes place in an immaterial mathematical frequency domain outside space and time By virtue of Fourier mathematics frequency functions can be represented in a spacetime domain and this domain is what is known as the physical world of matter It is just a certain mode of mental functionality There is no such thing as scientific matter There is only mind A mind is a monad and monads are all there are Everything is an expression of monadic mental mathematics      [A Monadic Universe](#) Clifton Charles Winn,1931      *The Vibrating Universe* Nṛsiṃhacaraṇa Paṇḍā,1995 The Vibrating Universe synthesizes the superstring theory of modern physics and the vibration concept of advaita vedanta and Kashmiri Saivism The philosophical problem of monism versus pluralism as given in Indian philosophy Western philosophy and classical as well as modern science has been analytically presented In this attempt dualism and pluralism have been rejected and non dualism has been re established A vibration theory has been successfully brought out with a fusion of the doctrines of the vedantic vibration the saiva vibration and the superstring vibration of modern physics A confluence of the concepts of the non dualistic Vedanta Kashmiri Saiva monism cosmology astrophysics superstring theory reality theory and quantum mechanics is clearly visible in the book As the vibrations of a violin string produce multiplicity of musical notes so does the superstring that vibrates and thereby generates the apparent plurality of the universe The Reality is one and

only one that always remains unmanifested and unperceived although not unexperienced The power of the Reality manifests through the plurality of the phenomenal universe Maya or Prakrti is constituted of three strings sattva rajas and tamas that vibrate to produce the pluralistic phenomenal universe

### **Pi, Monads, and the Quasi-Circle Theory** Lionel

Fabius,2010-08-18 For the past two millennia no significant progress has been made to improve methods used in the calculations of circles Due to the transcendence of pi the inner and outer dimensions of the circle were never calculated with precision only approximately The numeric facts were never reconciled with the geometric facts But a breakthrough comes forth as author Lionel Fabius presents his thoroughly researched work on circles Pi Monads and the Quasi circle Theory After some intensive and extensive study he provides a brilliant tool that centers on circles from a numerical point of view His concept on monad conjecture which represents the backbone of his quasi circle theory allows us to compute the dimensions of a circle with unprecedented methods of calculations His work on the circle may affect some of the fundamental concepts found in basic mathematics and may even change your view of Pi as an irrational number

### **Model-Theoretic Logics** J.

Barwise,Solomon Feferman,S. Feferman,2017-03-02 This book brings together several directions of work in model theory between the late 1950s and early 1980s

Leibniz's Metaphysics of Time and Space Michael Futch,2008-04-05 Leibniz's metaphysics of space and time stands at the centre of his philosophy and is one of the high water marks in the history of the philosophy of science In this work Futch provides the first systematic and comprehensive examination of Leibniz's thought on this subject In addition to elucidating the nature of Leibniz's relationalism the book fills a lacuna in existing scholarship by examining his views on the topological structure of space and time including the unity and unboundedness of space and time It is shown that like many of his more recent counterparts Leibniz adopts a causal theory of time where temporal facts are grounded on causal facts and that his approach to time represents a precursor to non tensed theories of time Futch then goes on to situate Leibniz's philosophy of space and time within the broader context of his idealistic metaphysics and natural theology Emphasizing the historical background of Leibniz's thought the book also places him in dialogue with contemporary philosophy of science underscoring the enduring philosophical interest of Leibniz's metaphysics of time and space

Blavatsky,Carl Taylor-Robinson,2022-08-05 Esoteric Science strives to enlarge the domain of physical science by trespassing on the forbidden grounds of metaphysics so distasteful to some materialists Though modern scientists learned as they may be all their wonderful discoveries would go for nothing and they themselves remain for ever headless bodies unless they lift the veil of matter and strain their eyes to see beyond The extent depth breadth and length of the mysteries of Nature are to be found only in Eastern Esoteric Sciences So vast and so profound are these that hardly a few a very few of the highest Initiates are capable of assimilating that which is good pure and holy and penetrate into the arcana behind the veil Without throwing any discredit upon time honoured beliefs we draw a line between blind faith evolved by theologies and the

Once the idea of protyle is accepted Chemistry will have virtually ceased to live it will reappear in its reincarnation as New Alchemy or Metachemistry For what are the manifested Mother the Father Son Husband and the Son the three First born but Hydrogen Oxygen and that which in its terrestrial manifestation is called Nitrogen The Monads of Leibniz may from one point of view be called force from another matter To Occult Science force and matter are two sides of the same Substance These Monads every one of which is a living mirror of the universe each Monad reflecting each other are hidden in a veil of thick darkness forming mirrors of the atoms of the world and casting reflections from its own face on every atom Where then is the Ultimate Element As we advance it recedes like the tantalizing mirage lakes and groves seen by the tired and thirsty traveller in the desert The very idea of an element as something absolutely primary and ultimate seems to be growing less and less distinct Occult Science teaches that Mother lies stretched in infinity during Pralaya as the Great Deep the dry Waters of Space and becomes wet only after the separation and the moving over its face of Narayana the Spirit which is an Invisible Flame that never burns but which sets on fire all that it touches and gives it life and generation Hydrogen and oxygen which instil the fire of life into the Mother is Spirit the noumenon of that which becomes in its grossest form oxygen hydrogen and nitrogen on earth nitrogen being of no divine origin but merely an earth born cement to unite other gases and fluids and serve as a sponge to carry in itself the breath of Life pure air The is no such thing in Nature as inorganic inanimate substances Stones minerals rocks and even chemical atoms are simply organic units in profound lethargy Their coma comes to an end when their inertia becomes activity The divisions made by Leibniz however incomplete and faulty from the standpoint of Occultism show a spirit of metaphysical intuition to which no man of science not Descartes not even Kant has ever reached With him there always existed an infinite gradation of thought Only a small portion of the contents of our thoughts rises into the clearness of apperception into the light of perfect consciousness From the shock of Leibniz and Spinoza s systems as opposed to the Cartesian system emerge the truths of the Archaic doctrine Both opposed the metaphysics of Descartes his idea of the contrast of two substances extension and thought radically differing from each other and mutually irreducible was too arbitrary and too unphilosophical for them What Leibniz calls Monads and Eastern philosophy Jivas is the Unity of units immaterial and infinite They are with us as with Leibniz the expression of the universe and every physical point is but the phenomenal expression of the noumenal metaphysical point Leibniz s distinction between perception and apperception is the philosophical though dim expression of the Esoteric teachings Every Monad differs from each other qualitatively and every one is a peculiar world to itself But this is not so with atoms they are absolutely alike quantitatively and qualitatively and possess no individuality of their own To Leibniz atoms and elements are centres of force or rather spiritual beings whose very nature is to act The molecules of materialistic philosophy are extended and divisible while Monads are mere mathematical points and indivisible At this point the Monads of Leibniz closely resemble the Elementals of mystic philosophy Every Monad or Elemental is a speaking mirror Esoteric philosophy teaching an objective

**Beyond Physicalism** Edward F. Kelly,Adam Crabtree,Paul Marshall,2015-02-19 The rise of modern science has brought with it increasing acceptance among intellectual elites of a worldview that conflicts sharply both with everyday human experience and with beliefs widely shared among the world's great cultural traditions Most contemporary scientists and philosophers believe that reality is at bottom purely physical and that human beings are nothing more than extremely complicated biological machines On such views our everyday experiences of conscious decision making free will and the self are illusory by products of the grinding of our neural machinery It follows that mind and personality are necessarily extinguished at death and that there exists no deeper transpersonal or spiritual reality of any sort Beyond Physicalism is the product of an unusual fellowship of scientists and humanities scholars who dispute these views In their previous publication Irreducible Mind they argued that physicalism cannot accommodate various well evidenced empirical phenomena including paranormal or psi phenomena postmortem survival and mystical experiences In this new theory oriented companion volume they go further by attempting to understand how the world must be constituted in order that these rogue phenomena can occur Drawing upon empirical science metaphysical philosophy and the mystical traditions the authors work toward an improved big picture of the general character of reality one which strongly overlaps territory traditionally occupied by the world's institutional religions and which attempts to reconcile science and spirituality by finding a middle path between the polarized fundamentalisms religious and scientific that have dominated recent public discourse Contributions by Harald Atmanspacher Loriliai Biernacki Bernard Carr Wolfgang Fach Michael Grosso Michael Murphy David E Presti Gregory Shaw Henry P Stapp Eric M Weiss and Ian Whicher **The Architectonic of Philosophy** Leslie Jaye Kavanaugh,2007 Whereas the history of philosophy defines metaphysics as asking the question What is Being here is asked Where is Being What is to be analyzed is indeed part of the tradition of metaphysics to inquire about Being qua being but here the inquiry is into its structure its position within the ontological whole The concept of the architectonic is borrowed from Kant In this work three philosophical structures are chosen for a more extensive examination the three architectonics are that of Plato's Chora Aristoteles continuum and finally Leibniz's labyrinth Back cover Take Hyperianism to the Morgue: Book II The Illuminist
