## **The Monkey Wars:**

The ^AMonkey Wars Deborah Blum, 1995-12-14 The controversy over the use of primates in research admits of no easy answers We have all benefited from the medical discoveries of primate research vaccines for polio rubella and hepatitis B are just a few But we have also learned more in recent years about how intelligent apes and monkeys really are they can speak to us with sign language they can even play video games and are as obsessed with the games as any human teenager And activists have also uncovered widespread and unnecessarily callous treatment of animals by researchers in 1982 a Silver Spring lab was charged with 17 counts of animal cruelty It is a complex issue made more difficult by the combative stance of both researchers and animal activists In *The Monkey Wars* Deborah Blum gives a human face to this often caustic debate and an all but human face to the subjects of the struggle the chimpanzees and monkeys themselves Blum criss crosses America to show us first hand the issues and personalities involved She offers a wide ranging informative look at animal rights activists now numbering some twelve million from the moderate Animal Welfare Institute to the highly radical Animal Liberation Front a group destructive enough to be placed on the FBI s terrorist list And she interviews a wide variety of researchers many forced to conduct their work protected by barbed wire and alarm systems men and women for whom death threats and hate mail are common She takes us to Roger Fouts s research center in Ellensburg Washington where we meet five chimpanzees trained in human sign language and we visit LEMSIP a research facility in New York State that has no barbed wire no alarms and no protesters chanting outside because its director Jan Moor Jankowski listens to activists with respect and treats his animals humanely And along the way Blum offers us insights into the many side issues involved the intense battle to win over school kids fought by both sides and the danger of transplanting animal organs into humans As it stands now Blum concludes the research community and its activist critics are like two different nations nations locked in a long bitter seemingly intractable political standoff But if you listen hard there really are people on both sides willing to accept and work within the complex middle When they can be freely heard then we will have progressed to another place beyond this time of hostilities In *The Monkey Wars* Deborah Blum gives these people their voice

Search and Clear William J. Searle, 1988 *Search and Clear* demonstrates that the seeds of war were implicit in American culture distinguishes between literature spawned by Vietnam and that of other conflicts reviews the literary merits of works both well and little known and explores the assumptions behind and the persistence of stereotypes associated with the consequences of the Vietnam War It examines the role of women in fiction the importance of gender in Vietnam representation and the mythic patterns in Oliver Stone s

destroy lies at the heart of his memoir *The Circle of Hanh* is a moving singular and highly readable chronicle of a haunted life and ultimately a stunning work of healing Kirkus Reviews starred review      **Declension in the Village of Chung Luong** Bruce Weigl, 2006 Our most powerful poet of the Vietnam War looks back after years of profound spiritual work      **The Scalpel and the Butterfly** Deborah Rudacille, 2015-12-15 An engrossing and eloquent study of the history and ethics of animal experimentation The heart of a pig may soon beat in a human chest Sheep cattle and mice have been cloned Slowly but inexorably scientists are learning how to transfer tissues organs and DNA between species Some think this research is moving too far too fast without adequate discussion of possible consequences Is it ethical to breed animals for spare parts When does the cost in animal life and suffering outweigh the potential benefit to humans In precise and elegant prose *The Scalpel and the Butterfly* explores the ongoing struggle between the promise offered by new research and the anxiety about safety and ethical implications in the context of the conflict between experimental medicine and animal protection that dates back to the mid nineteenth century Deborah Rudacille offers a compelling and cogent look at the history of this divisive topic from the days of Louis Pasteur and the founding of organized anti vivisection in England to the Nazi embrace of eugenics from animal rights to the continuing war between PETA and biomedical researchers and the latest developments in replacing reducing and refining animal use for research and testing
