and preference have become woven into our reproductive expectations With respect to prenatal screening the choices sought offered or denied are shaped and interpreted through a range of social personal institutional and philosophical lenses While prenatal screening seeks to promote parental choice and early intervention for the most part the genetic anomalies commonly targeted are inherently unfixable Frequently the only further intervention on offer is selective termination Hence the practice of prenatal screening raises complex ethical questions forcing judgement on the desirability or undesirability of certain traits in our future offspring This book explores the numerous factors that shape how such ethical choices are interpreted from the perspective of individual mothers and health care providers and considers the impact of these factors on personal autonomy and consent to prenatal screening

The Ethics of Hooking Up James Rocha, 2019-10-10 The Ethics of Hooking Up Casual Sex and Moral Philosophy on Campus provides a systematic moral analysis of hooking up or sexual activity between people who barely know each other frequently while intoxicated and with little or no verbal interaction It explores the moral quandaries resulting from this potent combination of sex alcohol near anonymity and limited communication focusing in particular on issues involving consent and respect After delineating common practices involving casual sex on college campuses and exploring the difficulty of reaching mutual consent author James Rocha argues that respect kindness sensitivity and honest communication are also necessary conditions for morally permissible casual sex Key Features Provides a rare systematic examination of the ethics of the hook up practice which is the dominant mating practice for young people today Analyzes the moral concepts of consent and respect in the context of hooking up which provides significant moral challenges that highlight how we should obtain consent and show respect to one another Argues for a moral paradigm shift in how young people hook up emphasizing ways to avoid unintentionally committing grave moral wrongs Situates the philosophy of casual sex in real life hook up practice enabling us to rethink overly abstracted moral views on casual sex

Criminal Law and Morality in the Age of Consent Aniceto Masferrer, 2021-02-09 This book discusses the relation between morality and politics and morality and law a field that has

been studied for more than two thousand years The law is a part of human culture and this touches upon a dynamic reality that is connected to the relation between nature and freedom nature and culture If such relations are not clearly understood as is the case today the relation between morality and law cannot be properly comprehended either The relationship between morality and criminal law must constantly evolve to meet the needs of changing times and circumstances Social changes and new situations require new answers And since the relationship involves criminal law legal philosophy and legal history interdisciplinary approaches are always needed Featuring fifteen original contributions by legal scholars from various European and American universities the book does not pretend to solve the complexity of the relation between morality and criminal law but instead expresses criticism offers some proposals and stimulates further thought The book tackles the topic from an interdisciplinary perspective criminal law constitutional law legal philosophy and legal history among others As such it appeals not only to scholars and students but also to lawyers policymakers historians theologians philosophers and general readers who are interested in the legal social political and philosophical issues of our time

Total Collapse: The Case Against Responsibility and Morality Stephen Kershnar, 2018-03-29 This book argues that there is no morality and that people are not morally responsible for what they do In particular it argues that what people do is neither right nor wrong and that they are neither praiseworthy nor blameworthy for doing it Morality and moral responsibility lie at the heart of how we view the world In our daily life we feel that people act rightly or wrongly make the world better or worse and are virtuous or vicious These policies are central to our justifying how we see the world and treat others In this book the author argues that our views on these matters are false He presents a series of arguments that threaten to undermine our theoretical and practical worldviews The philosophical costs of denying moral responsibility and morality are enormous It does violence to philosophical positions that many people took a lifetime to develop Worse it does violence to our everyday view of people A host of concepts that we rely on daily praiseworthy blameworthy desert virtue right wrong good bad etc fail to refer to any property in the world and are thus deeply mistaken This book is of interest to philosophers lawyers and humanities professors as well as people interested in morality law religion and public policy

Voluntary Consent Maximilian Kiener, 2023-03-10 Voluntariness is a necessary condition of valid consent But determining whether a person consented voluntarily can be difficult especially when people are subjected to coercion or manipulation placed in a situation with no acceptable alternative other than to consent to something or find themselves in an abusive relationship This book presents a novel view on the voluntariness of consent especially medical consent which the author calls Interpersonal Consenter Consentee Justification ICCJ According to this view consent is voluntary if and only if the process by which it has been obtained aligns with specific principles of interpersonal justification ICCJ is distinctive because it explains voluntary consent neither as a psychological concept indicative of the inner states of a person's mind e.g. willingness or reluctance nor as a circumstantial concept indicative of a person's set of options Rather ICCJ explains the voluntariness of consent as an

interpersonal concept focusing on the interaction between the person giving consent and the person receiving it and requiring the absence of illegitimate control by the consent receiver In so doing ICCJ further develops the notion of interpersonal justification known from contractualist theories in moral philosophy and introduces it to the debate on consent The author employs a top down approach defending ICCJ s key characteristics on the basis of general theoretical arguments as well as a bottom up approach supporting ICCJ in its application to clinical challenges such as nudging and manipulation living organ donation and clinical trials Voluntary Consent will appeal to researchers and advanced students in normative ethics bioethics philosophy of law behavioural psychology and medicine **The Experimental Animal in Biomedical Research**

Bernard E. Rollin,1990-08-27 The Experimental Animal in Biomedical Research provides a concise useful survey of knowledge regarding laboratory animal care Volume I addresses researchers who use animals and focuses on how to maximize the welfare of animals used in research *The Ethics of Medical Research on Humans* Claire Foster,2001-09-13

One of the most difficult problems that confronts clinicians and medical professionals is how to apply ethical principles to real decisions affecting patients In this even handed book Foster examines the three main approaches to moral decision making goal based duty based and rights based She examines the underlying philosophical arguments behind each their relative strengths and weaknesses and how they can actually be applied She also looks at the problematic boundaries where best practice ends and experimentation begins Is it ethical to experiment with new cures on people who are probably dying anyway And how do you assess quality of consent This book provides a thorough non partisan grounding in what the ethical principles are and what informs them It is an invaluable preparation both for a researcher being interviewed by an ethics committee and for the people sitting on the committee and will be essential reading for all medical decision makers The Scope of Consent

Tom Dougherty,Tom J. Dougherty,2021 A novel investigation of the under explored question of which normative principle governs the scope of consent The book s central argument involves taking a stance on what constitutes consent a question of central importance in a wide range of philosophical topics A Revised Consent Model for the Transplantation of Face and Upper Limbs: Covenant Consent James L. Benedict,2017-04-25 This book supports the emerging field of vascularized composite allotransplantation VCA for face and upper limb transplants by providing a revised ethically appropriate consent model which takes into account what is actually required of facial and upper extremity transplant recipients In place of consent as permission giving waiver or autonomous authorization the standard approaches this book imagines consent as an ongoing mutual commitment i e as covenant consent The covenant consent model highlights the need for a durable personal relationship between the patient subject and the care provider researcher Such a relationship is crucial given the recovery period of 5 years or more for VCA recipients The case for covenant consent is made by first examining the field of vascularized composite allotransplantation the history and present understandings of consent in health care and the history and use of the covenant concept from its origins through its applications to health care ethics today This

book explains how standard approaches to consent are inadequate in light of the particular features of facial and upper limb transplantation In contrast use of the covenant concept creates a consent model that is more appropriate ethically for these very complex surgeries and long term recoveries The Ethics of Surveillance in Times of Emergency Kevin Macnish,Adam Henschke,2024-02-16 This book draws from the use of modern surveillance technologies during the COVID 19 pandemic to explore a set of issues and challenges facing decision makers and designers in times of emergency how do we respond to emergencies in ways that are both consistent with democratic and community principles and that are ethically justifiable

The Ethics of Rapid Tissue Donation (RTD) Chiara Mannelli,2021-02-11 This book offers a reflection on the central role that the ethics of informed consent plays in Rapid Tissue Donation RTD RTD is an advanced oncology procedure that involves the procurement for research purposes of fresh tissues within two to six hours of a cancer patient s death Since RTD involves the retrieval of tissues after death and since the collected tissues are of great importance for medical research the need for any form of informed consent to regulate this procedure has been questioned This book argues for the necessity of informed consent to govern RTD and it provides the reader with a bespoke informed consent process applicable to cancer patients The analysis unfolds at the intersection between applied ethics public health ethics and clinical ethics and it is informed by philosophical theories of informed consent and by the social implications of individual choices By viewing medical issues relating to informed consent in oncology from an ethical perspective the book combines philosophical analysis with discussion of concrete cancer related issues As a result the book is suitable for readers interested in ethical reasoning as well as for those with a medical background It contributes to contemporary research by offering an original analysis that relies on a rigorous philosophical approach to address innovative issues at the cutting edge of medical research and policy making **The Age of Informed Consent** Octavian Buda,Sorin Hostiuc,2019-01-22 This volume analyses the

conceptualization and the practical application of the concept of informed consent in various parts of continental Europe and identifies whether informed consent can be seen as a clearly identifiable concept The focus here is on the evolution of informed consent in France Germany Croatia Turkey and Romania with comparisons being made to the traditional history of the concept mainly constructed in the US and the UK The book will appeal to physicians bio ethicists and historians as it provides the answers to some practical difficulties in applying informed consent in everyday practice difficulties mainly generated by an indiscriminate application of an imported concept without a proper analysis of the local cultural social and medical background
