The Multicampus University Eugene C. Lee, Frank M. Bowen, Carnegie Commission on Higher Education, 1971 The Multicampus University ,1971 The Multicampus University Eugene C. Lee, Frank M.. Bowen, 1971 **The Multicampus University** Eugene C. Lee, 1971 **The Rise and Decline of Faculty Governance** Larry G. Gerber, 2014-09-15 There was a time when the faculty governed universities Not anymore The Rise and Decline of Faculty Governance is the first history of shared governance in American higher education Drawing on archival materials and extensive published sources Larry G Gerber shows how the professionalization of college teachers coincided with the rise of the modern university in the late nineteenth century and was the principal justification for granting teachers power in making educational decisions In the twentieth century the efforts of these governing faculties were directly responsible for molding American higher education into the finest academic system in the world In recent decades however the growing complexity of multiversities and the application of business strategies to manage these institutions threatened the concept of faculty governance Faculty shifted from being autonomous professionals to being employees The casualization of the academic labor market Gerber argues threatens to erode the quality of universities As more faculty become contingent employees rather than tenured career professionals enjoying both job security and intellectual autonomy universities become factories in the knowledge economy In addition to tracing the evolution of faculty decision making this historical narrative provides readers with an important perspective on contemporary debates about the best way to manage America s colleges and universities Gerber also reflects on whether American colleges and universities will be able to retain their position of global preeminence in an increasingly market driven environment given that the system of governance that helped make their success possible has been fundamentally altered **Monthly Labor Review** United States. Bureau of Labor Statistics, 1976 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews **Resources in Education** ,1999-04 *Research in Education* ,1974 College For Sale Wesley Shumar, 2013-10-23 This text provides a framework for understanding higher education in the US and other western countries since the 1970s whereby the logic of the market place has increasingly come to dominate all arenas and in context the education system The author calls this process commodification and he describes the transformation of universities in the US and elsewhere as they attempt to accomodate the enforced changes on their academic lives and those of their students The book chronicles changes with the increasing focus on career and the movement towards the instrumental functions of education the financial crisis and the development of a more corporate approach to education of consumption that produce universities heavy with expensive well equipped and powerful administrations and decreasing numbers of ever more disenfranchised faculty *Catalog of Copyright Entries. Third Series* Library of Congress. Copyright Office, 1973 *Bulletin of the United States Bureau of Labor Statistics* ,1976 **A History of the University of Wisconsin System** Patricia A. Brady, 2020-04-07 A tumultuous 1971

merger that combined all of the state's public colleges and universities into a single entity led to the creation of the University of Wisconsin System. Drawing on decades of previously unpublished sources, Patricia A. Brady details the System's full history from its origin to the present, illuminating complex networks among and within the campuses and an evolving relationship with the state. The UW System serves as a powerful case study for how broad national trends in higher education take shape on the ground. Brady illustrates the ways culture wars have played out on campuses and the pressures that have mounted as universities have shifted to a student-as-consumer approach. This is the essential, unvarnished story of the unique collection of institutions that serve Wisconsin and the world and a convincing argument for why recognizing and reinvesting in the System is critically important for the economic and civic future of the state and its citizens. The Practice of Leadership in Higher Education Kendall Jarrett, Stephen Newton, 2020-09-28. This practice-orientated book explores the nature of leadership in higher education during three key stages of the leadership cycle: becoming, being, and leaving leadership. Providing perspectives on leadership from a range of professional sectors, this book presents considered views on contemporary and future leadership practices in higher education from a global network of contributors. Included within each chapter are prominent questions designed to engage the reader to think about their own leadership experiences to date and leadership development needs. Key points covered include the complexities of leadership in higher education in a changing world; discussion of internally resourced leadership development frameworks and programmes currently used across the sector; leading complex education systems; perspectives on leadership from a range of professional sectors such as corporate, military, elite sport, and public that can be used to improve the quality of higher education leadership; case studies of academics; leadership practices that provide readers with authentic personal insights into discipline-specific leadership experiences from around the world. Full of practical examples of personal leadership experiences which can be used to help inform readers' leadership aspirations, development, and legacy planning, this is the ideal read for anyone interested in understanding their identity and practice as a leader in higher education. Higher Education Systems 3.0 Jason E. Lane, D. Bruce Johnstone, 2013-10-01. A comprehensive examination of higher education multi-campus systems and their role in improving state economies and communities. This thought-provoking volume brings together scholars and system leaders to analyze some of the most pressing and complex issues now facing higher education systems and society. Higher Education Systems 3.0 focuses on the remaking of higher education coordination in an era of increased accountability, greater calls for productivity, and intensifying fiscal austerity. System heads have been identifying ways to harness the collective contributions of their various institutions to benefit the students, communities, and other stakeholders that they serve. The contributors explore the recent dynamics of higher education systems, focusing particularly on how systems are now working to improve their effectiveness in educating students and improving our communities while also identifying new means for operating more efficiently. This enhanced collaboration or systemness is the key aspect of version 3.0. **The Multicampus**
