The Music Listener:

The Oxford Handbook of Music Listening in the 19th and 20th Centuries Christian Thorau, Hansjakob Ziemer, 2018-11-01
An idealized image of European concert goers has long prevailed in historical overviews of the nineteenth and twentieth centuries This act of listening was considered to be an invisible and amorphous phenomenon a naturally given mode of perception This narrative influenced the conditions of listening from the selection of repertoire to the construction of concert halls and programmes However as listening moved from the concert hall to the opera house street music and jazz venues new and visceral listening traditions evolved In turn the art of listening was shaped by phenomena of the modern era including media innovation and commercialization This Handbook asks whether how and why practices of music listening changed as the audience moved from pleasure gardens and concert venues in the eighteenth century to living rooms in the twentieth century and mobile devices in the twenty first Through these questions chapters enable a differently conceived history of listening and offer an agenda for future research

Everyday Music Listening Ruth Herbert, 2016-04-15 In what ways does listening to music shape everyday perception Is music particularly effective in promoting shifts in consciousness Is there any difference perceptually between contemplating one's surroundings and experiencing a work of art *Everyday Music Listening* is the first book to focus in depth on the detailed nature of music listening episodes as lived mental experiences Ruth Herbert uses new empirical data to explore the psychological processes involved in everyday music listening scenarios charting interactions between music perceiver and environment in a diverse range of real world contexts Findings are integrated with insights from a broad range of literature including consciousness studies and research into altered states of consciousness as well as ideas from ethology and evolutionary psychology suggesting that a psychobiological capacity for trancing is linked to the origins of making and receiving of art The term trance is not generally associated with music listening outside ethnomusicological studies of strong experiences yet hypnotic like involvements in daily life have long been recognized by hypnotherapy researchers The author argues that multiply distributed attention prevalent in much contemporary listening does not necessarily indicate superficial engagement Music emerges as a particularly effective mediator of experience Absorption and dissociation as manifestations of trancing are self regulatory processes often operating at the level of unconscious awareness that support individuals' perceptions of psychological health This fascinating study brings together research and theory from a wide range of fields to provide a new framework for understanding the phenomenology of music listening in a way that will appeal to both specialist academic audiences and a broad general readership

Musical Listening in the Age of Technological Reproduction

Gianmario Borio, 2016-04-29 It is undeniable that technology has made a tangible impact on the nature of musical listening The new media have changed our relationship with music in a myriad of ways not least because the experience of listening can now be prolonged at will and repeated at any time and in any space Moreover among the more striking social phenomena ushered in by the technological revolution one cannot fail to mention music's current status as a commodity and popular music's unprecedented global reach In response to these new social and perceptual conditions the act of listening has diversified into a wide range of patterns of behaviour which seem to resist any attempt at unification Concentrated listening the form of musical reception fostered by Western art music now appears to be but one of the many ways in which audiences respond to organized sound Cinema for example has developed specific ways of combining images and sounds and more recently digital technology has redefined the standard forms of mass communication Information is aestheticized and music in turn is incorporated into pre-existing symbolic fields This volume the first in the series Musical Cultures of the Twentieth Century offers a wide-ranging exploration of the relations between sound technology and listening practices considered from the complementary perspectives of art music and popular music music theatre and multimedia composition and performance ethnographic and anthropological research
