Alexander Stuart Fraser, 1956 **Gender and the Life Course** Alice S. Babe, 2011-01-01 Containing introductions and contributions by other prominent scholars this volume situates Babe's work within contemporary scholarship and underscores the extent to which he is one of Canada's most prescient thinkers **Epistemic Communities, Constructivism, and International Environmental Politics** Peter Haas, 2015-08-20 Epistemic Communities Constructivism and International Environmental Politics brings together 25 years of publications by Peter M Haas The book examines how the world has changed significantly over the last 100 years discusses the need for new constructivist scholarship to understand the dynamics of world politics and highlights the role played by

transnational networks of professional experts in global governance Combining an intellectual history of epistemic communities with theoretical arguments and empirical studies of global environmental conferences as well as international organizations and comparative studies of international environmental regimes this book presents a broad picture of social learning on the global scale In addition to detailing the changes in the international system since the Industrial Revolution Haas discusses the technical nature of global environmental threats Providing a critical reading of discourses about environmental security this book explores governance efforts to deal with global climate change international pollution control stratospheric ozone and European acid rain With a new general introduction and the addition of introductory pieces for each section this collection offers a retrospective overview of the author s work and is essential reading for students and scholars of environmental politics international relations and global politics *Social Imaginary and the Metaphysical Discourse* Christoforos Bouzanis,2023-05-05 This book departs from approaches to truth in social science and ideas in philosophy that connect truth to the ability of language to fulfil certain real world conditions of objectivity Pointing to an extra linguistic level in our cognition at which scientific creativity occurs it highlights the manner in which epistemic communities share work on and modify not only the world imaginaries that they endorse but also those world views that they reject or which partially overlap with their own Through the concept of the social imaginary the author explores the theoretical interrelations among various metaphysical world imageries by which we organise our scientific understanding of the world and our expectations of experience thus shedding light on the manner in which social ontology can inform our practices of sharing belief A study at the intersection of metaphysics and social theory The Fundamental Predicament of Contemporary Philosophy and the Social Sciences will appeal to scholars of sociology and philosophy with interests in questions of ontology and epistemology Bulletin United States.
