

Data provided by Southern Water (UK), National Statistics, Water UK and WaterWise

Once drunk, half of the fluoride in the 4% drinking water is excreted. Only a tiny percentage of the other half of the fluoride bio-accumulates in the bodies of the fluoridation target group – small disadvantaged children.

Assuming that this tiny percentage is 0.3% of the total fluoride supplied, 99.7% of the fluoridating acid (and, consequently, 99.7% of the financial outlay) are completely wasted.

If a local authority spends £100,000 pa on water fluoridation, £99,700 goes down the drain.

Public money is being wasted because of an outdated, inefficient public health policy.

## **The Indisputable Case Against Water Fluoridation:**

**The Indisputable Case Against Water Fluoridation** Louis J. Ronsivalli, 2000      The Fluoride Wars R. Allan Freeze, Jay H. Lehr, 2009-04-29 A lively account of fluoridation and its discontents Since its first implementation in Grand Rapids Michigan in 1945 public drinking water fluoridation and its attendant conflicts controversies and conspiracy theories serve as an object lesson in American science public health and policymaking In addition to the arguments on the issue still raging today the tale of fluoridation and its discontents also resonates with such present concerns as genetically modified foods global warming response nuclear power and environmental regulation Offering the best current thinking on the issue The Fluoride Wars presents a witty and detailed social history of the fluoridation debate in America illuminating the intersection of science and politics in our recent past This reader friendly assessment explores the pro and anti fluoridation movements key players and important events Full of amusing and vivid anecdotes and examples this accessible recounting includes A careful and non condescending look at the hard science popular science pseudo science and junk science involved A look at fluoride issues including dosage cost financial and funding interests fluorosis and problems of risk cost benefit analysis The back and forth drama between pro and anti fluoridation factions with all its claims counterclaims insults acrimony and lawsuits Case studies of various cities and their experiences with municipal water fluoridation initiatives Fluorophobia and popular conspiracy theories involving fluoride The colorful characters in the debate including activists scientists magicians and politicians A richly and considerately told tale of American science and public life The Fluoride Wars offers an engrossing history to both interested general readers and specialists in public health dentistry policymaking and related fields

**Corporatization and the Right to Water in Colombia** Marcela López, 2022-05-11 This book explores how conflicts around access to water shape cities citizenship and infrastructures by tracing how water is commodified and controlled by the Public Enterprises of Medellín EPM one of the most successful publicly owned utility companies in the global South Why are water inequalities dramatically increasing in Medellín a city that is located in an area of bountiful water resources and owns a successful established utility company This book explains this paradoxical situation by weaving together two central threads The first is a critical historical analysis of the political economic and ecological conditions that enabled the city's utility company to grow and expand internationally and the second is a rich account of the everyday practices and struggles of residents in low income areas to secure access to water and demand citizenship rights The EPM is a case of global significance as the company continues to expand its commercial operations in the Latin American services market by taking over the utilities in Panama El Salvador and Guatemala Mexico and Chile Although its successful international expansion has been a source of pride and admiration for many Colombians the implementation of market oriented operating principles in all activities of the utility company raises important and complex questions about its public character and responsibility in the provision of basic services which has much wider implications given how it is poised to be

a model for other for profit municipal service operations in other Latin American countries This book advances the empirical knowledge of corporatized utilities with a globally significant case as well as providing new theoretical insights with which to understand the limits challenges and opportunities faced by public utility companies to provide affordable and equal access to water in cities This book will be of great interest to students and scholars of water resource management corporatization privatisation and commodification of natural resources urban studies citizenship and human rights environmental sociology and Latin American studies
