*A Treatise on the Modern Law of Evidence: Media of proof* Charles Frederic Chamberlayne, 1916     **Proof, Evidence and Hate Crime** Tshepo Bogosi Mosaka, 2025-07-18 Proof is the property of a disputed fact being established inferentially from an extant fact This book explicates the structural components of this phenomenon in the context of hate crimes across various jurisdictions around the world It departs from the orthodox conception of evidence and proof as being a general value neutral or non normative and epistemic subject and offers a relativistic conception of this area of law The core argument is that proof is both semantically and methodologically determined by three conditions of materiality process and probativity This argument is then justified by the context specific application of this relativistic theory of proof to hate crimes This theoretical

application of proof is sustained throughout the book using multiple examples and illustrations of hate crimes around the world. The discussion both at the level of proof and hate crimes while focusing on the grounds of race, religion, and ethnicity specifically is framed in jurisprudential, cross-jurisdictional, and interdisciplinary terms. The book will be of interest to academics and researchers working in the areas of criminal law, legal philosophy, and procedural law.
