The Modern Metropolis Hans Blumenfeld,1967 *The Modern Metropolis* Hans Blumenfeld,1971 *Planning Toronto* Richard White,2016-01-15 Paris is famous for romance Chicago the blues Buenos Aires the tango And Toronto Well Canada s largest urban centre is known for being a city that works a remarkably livable metropolis for its size In this lavishly illustrated book Richard White reveals how urban planning contributed to Toronto becoming a functional world class city Focusing on the period from 1940 to 1980 he examines how planners shaped the city and its development amid a maelstrom of local and international obstacles and influences Based on meticulous research of Toronto s postwar plans and supplemented by dozens of interviews *Planning Toronto* provides a comprehensive and lively explanation of how Toronto s postwar plans city metropolitan and regional came to be who devised them and what impact they had When it comes to the history of urban planning the question may not be whether a particular plan was good or bad but whether in the end it made a difference As White demonstrates in Toronto s case planning did matter just not always as expected **Housing and Planning References** ,1967 **Urban Transportation Research and Planning, Current Literature** ,1966

Encyclopedia of the City Roger W. Caves,2005 A first class work of reference that will be both an essential resource for independent study as well as a useful aid in teaching a solid but also provocative starting point for wider exploration of the city The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design Jon Lang,2020-11-09 The Routledge Companion to Twentieth and Early Twenty First Century Urban Design is a fully illustrated descriptive and explanatory history of the development of urban design ideas and paradigms of the past 150 years The ideas and projects hypothetical and built range in scale from the city to the urban block level The focus is on where the generic ideas originated the projects that were designed following their precepts the functions they address and or afford and what we can learn from them The morphology of a city its built environment evolves unselfconsciously as private and governmental investors self consciously erect buildings and infrastructure in a pragmatic piecemeal manner to meet their own ends Philosophers novelists architects and social scientists have produced myriad ideas about the nature of the built environment that they consider to be superior to those forms resulting from a laissez faire attitude to urban development Rationalist theorists dream of ideal futures based on assumptions about what is good empiricists draw inspirations from what they perceive to be working well in existing situations Both groups have presented their advocacies in manifestoes and often in the form of generic solutions or illustrative designs This book traces the history of these ideas and will become a standard reference for

The Transatlantic Collapse of Urban Renewal Christopher Klemek, 2011-07
 The Transatlantic Collapse of Urban Renewal examines how postwar thinkers from both sides of the Atlantic considered urban landscapes radically changed by the political and physical realities of sprawl urban decay and urban renewal With a sweep that encompasses New York London Berlin Philadelphia and Toronto among others Christopher Klemek traces changing responses to the challenging issues that most affected the lives of the world's cities In the postwar decades the principles of modernist planning came to be challenged in the grassroots revolts against the building of freeways through urban neighborhoods for instance or by academic critiques of slum clearance policy agendas and then began to collapse entirely Over the 1960s several alternative views of city life emerged among neighborhood activists New Left social scientists and neoconservative critics Ultimately while a pessimistic view of urban crisis may have won out in the United States and Great Britain Klemek demonstrates that other countries more successfully harmonized urban renewal and its alternatives This much anticipated book provides one of the first truly international perspectives on issues central to historians and planners alike making it essential reading for anyone engaged with either field

The Urbanism of Exception Martin J. Murray, 2017-03-10
 This book challenges the conventional modernist inspired understanding of urbanization as a universal process tied to the ideal typical model of the modern metropolis with its origins in the grand Western experience of city building At the start of the twenty first century the familiar idea of the city or urbanism as we know it has experienced such profound mutations in both structure and form that the customary epistemological categories and prevailing conceptual frameworks that predominate in conventional urban theory are no longer capable of explaining the evolving patterns of city making Global urbanism has increasingly taken shape as vast distended city regions where urbanizing landscapes are increasingly fragmented into discontinuous assemblages of enclosed enclaves characterized by global connectivity and concentrated wealth on the one side and distressed zones of neglect and impoverishment on the other These emergent patterns of what might be called enclave urbanism have gone hand in hand with the new modes of urban governance where the crystallization of privatized regulatory regimes has effectively shielded wealthy enclaves from public oversight and interference

Cities and Their Vital Systems Advisory Committee on Technology and Society, 1988-02-01
 Cities and Their Vital Systems asks basic questions about the longevity utility and nature of urban infrastructures analyzes how they grow interact and change and asks how when and at what cost they should be replaced Among the topics discussed are problems arising from increasing air travel and airport congestion the adequacy of water supplies and waste treatment the impact of new technologies on construction urban real estate values and the field of telematics the combination of computers and telecommunications that makes money machines and national newspapers possible

The Organization of Cities John R Miron, 2017-01-20
 This book focuses on the relationship between the state and economy in the development of cities It

reviews and reinterprets fundamental theoretical models that explain how the operation of markets in equilibrium shapes the scale and organization of the commercial city in a mixed market economy within a liberal state. These models link markets for the factors of production, markets for investment and fixed capital, formation markets for transportation and markets for exports in equilibrium both within the urban economy and the rest of the world. In each case the model explains the urban economy by revealing how assumptions about causes and structures lead to predictions about scale and organization outcomes. By simplifying and contrasting these models, this book proposes another interpretation that governance and the urban economy are outcomes negotiated by political actors motivated by competing notions of commonwealth and the individual desire for wealth and power. The book grounds its analysis in economic history, explaining the rise of commercial cities and the emergence of the urban economy. It then turns to factors of production, export and factor markets, introducing and parsing the Mills model, breaking it down into its component parts and creating a series of simpler models that can better explain the significance of each economic assumption. Simplified models are also presented for real estate and fixed capital investment markets, transportation and land use planning. The book concludes with a discussion of linear programming and the Herbert Stevens and the Ripper Varaiya models. A fresh presentation of the theories behind urban economics, this book emphasizes the links between state and economy and challenges the reader to see its theories in a new light. As such, this book will be of interest to scholars, students and practitioners of economics, public policy, public administration, urban policy and city and urban planning.
