**Musical Experience in Our Lives** Jody L. Kerchner,Carlos R. Abril,2009-01-16 As we listen and move to music sing compose and play we engage in musical experiences These happen in formal learning settings such as schools and rehearsal halls but also in informal settings such as homes and community centers Musical experiences are fundamentally social and can teach us about ourselves and our relationship to others This book explores some of the many ways we experience music and create musical meaning from infancy through older adulthood While vignettes narratives and cases form the primary focus of each chapter the contributors of the book use extant research and theory to deepen understanding of a particular phenomenon idea or experience Chapters are written by leading experts who examine music teaching and learning They employ various qualitative research methodologies including case study narrative inquiry oral history and ethnography yet their contributions are readable engaging and refreshingly insightful      **New Sounds, New Stories** Vincent Meelberg,2006

Wanneer luisteraars over hun luisterervaringen praten refereren ze vaak aan muziek alsof het een verhaal is Maar kan muziek wel een verhaal vertellen Kan muziek narratief zijn Traditioneel wordt narrativiteit geassocieerd met verbale en visuele teksten en wordt er betwijfeld of een muzikale variant zelfs maar kan bestaan In deze studie beargumenteert Vincent Meelberg dat muziek wel degelijk een verhaal kan vertellen en dat de bestudering van muzikale narrativiteit zeer productief is Meer specifiek stelt Meelberg voor om hedendaagse muzikale verhalen te beschouwen als metaverhalen dus als verhalen die het verhaal van het proces van narrativisering vertellen      *The Cambridge Companion to Percussion* Russell

Hartenberger,2016-03-10 Timpani traditions and beyond      **Theology, Music and Time** Jeremy Begbie,2000-07-24 Demonstrates the unique and important role that music plays in theology      *Sound Moves* Michael Bull,2015-03-24 This innovative study opens up a new area in sociological and urban studies the aural experience of the social mediated through mobile technologies of communication Whilst we live in a world dominated by visual epistemologies of urban experience Michael Bull argues that it is not surprising that the Apple iPod a sound based technology is the first consumer cultural icon of the twenty first century This book in using the example of the Apple iPod investigates the way in which we use sound to

construct key areas of our daily lives The author argues that the Apple iPod acts as an urban Sherpa for many of its users and in doing so joins the mobile army of technologies that many of us habitually use to accompany our daily lives Through our use of such mobile and largely sound based devices the book demonstrates how and why the spaces of the city are being transformed right in front of our ears Systems Research in the Arts International Institute for Advanced Studies in Systems Research and Cybernetics,2000 *Coherence in New Music: Experience, Aesthetics, Analysis* Mark Hutchinson,2016-06-10 What does it mean to talk about musical coherence at the end of a century characterised by fragmentation and discontinuity How can the diverse influences which stand behind the works of many late twentieth century composers be reconciled with the singular immediacy of the experiences that they can create How might an awareness of the distinctive ways in which these experiences are generated and controlled affect the way we listen to reflect upon and write about this music Mark Hutchinson outlines a novel concept of coherence within Western art music from the 1980s to the turn of the millennium as a means of understanding the work of a number of contemporary composers including Thomas Ad s Kaija Saariaho T ru Takemitsu and Gy rgy Kurt g whose music cannot be fitted easily into a particular compositional school or analytical framework Coherence is understood as a multi layered phenomenon experienced above all in the act of listening but reliant upon a variety of other aspects of musical experience including compositional statements analysis and connections of aesthetic as well as listeners own imaginative conceptualisations Accordingly the approach taken here is similarly multi faceted close analytical readings of a number of specific works are combined with insights drawn from philosophy and aesthetics music perception and critical theory with a particular openness to novel metaphorical presentations of basic musical ideas about form language and time **Musical Beauty** Ferdia J. Stone-Davis,2011-01-01 This book offers an important new perspective on the Western tradition of musical aesthetics through an examination of Anicius Boethius and Immanuel Kant Within the trajectory illuminated by these two thinkers musical meaning is framed by and formed through the concept of beauty a concept which is shaped by prior understandings about notions of the self and the world Beauty opens up a space within which the boundary between the self and the world subject and object is negotiated and configured In doing so either the subject or the object is asserted to the detriment of the other and to the physicality of music This book asserts that the uniqueness of music s ontology emerges from its basis in sound and embodied practice It suggests that musical beauty is generated by the mutuality of subject and object arising within the participation that music encourages one which involves an ekstatic mode of attention on the part of the subject **Cum Notis Variorum** ,1984 Aesthetics and Narratives in Audiovisual Media Francisco José Mateu Torres, This book offers a series of contents that revolve around the different theoretical aspects of aesthetics and narratives in audiovisual media Under this aspect this publication works under a double aspect On the one hand it is a research and dissemination work since it presents the concepts in an accessible way allowing any reader interested in the audiovisual world to delve into the principles that govern the creation and analysis of

the different audiovisual contents But on the other hand the book can serve as teaching material for audiovisual communication studies script sound postproduction etc as it delves into key issues for the training of future professionals in the audiovisual sector All this accompanied by a multitude of graphic examples Based on these particularities this book introduces contents ranging from the creation of a film script delving into the structure and essential elements of audiovisual narrative to the analysis of the sound aspects that enrich the audience s experience The book also explores audiovisual editing and postproduction techniques which are essential to give aesthetic and narrative coherence to the works and a section is dedicated to storytelling in interactive digital media highlighting the importance of the user s active participation in the construction of the story Finally transmedia narratives are addressed understood as strategies that expand the narrative universe through multiple media and platforms allowing an immersive and fragmented experience that involves the audience at different levels and contexts
