Estimation Skills, Mathematics-in-context, and Advanced Skills in Mathematics Julia H. Mitchell, 1999 This report presents information from three special studies conducted as part of the National Assessment of Educational Progress NAEP 1996 mathematics assessment It is intended primarily for mathematics educators and others concerned with mathematics education such as curriculum specialists teachers and university faculty in schools of education The three studies reported here were designed to provide greater detail on how students perform on particular types of mathematics questions Studies include the Estimation Study the Study of Mathematics in Context and the Study of Students Taking Advanced Courses in Mathematics The first study was designed to explore students skills in estimation and was implemented at three grade levels It concludes that although there has been significant improvement in mathematics performance overall since 1990 at all grade levels the trend for student performance in estimation over the six years since the inception of the Estimation Study of 1990 is less clear The second study was designed to assess problem solving abilities within contexts that allow students to make connections across mathematics content areas The Advanced study was administered at grades 8 and 12 and was designed to provide students who were taking or had taken advanced courses in mathematics an opportunity to demonstrate their full mathematical proficiency Contains 71 tables and figures ASK *Essential Skills in Maths* Graham Newman, 1997 *Math Skills by Objectives* Cambridge Adult Education, 1988-03 Math Skills by Objectives teaches basic math skills and shows students how to apply the skills they have learned to their daily lives This three volume program is organized by learning objectives subskill by subskill so that both students and teachers know exactly what their goals are The evenly paced methodical style of instruction develops student confidence and mastery so students never go on to a new subskill or skill unless they have mastered the previous one Book 3 reviews the basic math operations taught in Book 1 but at a more advanced level *Basic Math Skills* August V.
