Hull,1992 **International Perspectives on Workforce Education and Development** Jay W. Rojewski,2004-12-01 Development of this text has been based on the notion that workforce education and development WFED systems such as secondary and postsecondary vocational and technical education VTE career education and guidance human resource and organizational development HROD and adult training and retraining including literacy programs have essential roles to play in supporting both individual and national efforts to successfully participate in and reap the benefits offered by globalization While this assumption has intuitive appeal not everyone believes that vocational preparation programs result in positive outcomes Psacharopoulos 1997 an outspoken international critic of vocational education and training argues that WFED programs often have a low rate of return on a country s investment when compared to that of the general academic curriculum He contends that WFED initiatives often fail

because too much emphasis is placed on these efforts to address myriad complex issues and that decision makers do not utilize the available evidence about VTE to make prudent informed choices. Instead, major players in the global economy like the World Bank tout basic academic education as an essential priority for developing countries wanting to enter into global markets and exchange.

What new helping organizations have been developed and programmed and what existing programs have been enhanced? What has new legislation funded? This comprehensive and authoritative volume provides the answers human service professionals need to assist and guide their clients. Written by credentialed practitioners, the book provides detailed explanations and descriptions of the most prominent and beneficial human service agencies. Also included is information on agency personnel as well as specific organizational certifications, licensing and accreditation. This indispensable guide is suitable for use in courses covering the types of human services that exist in every community and as a follow up or adjunct to case management courses. Cases on Enhancing P-16 Student Engagement With Digital Technologies Gierhart, Aaron R., 2024-12-27. Reimagining how digital technologies are integrated into education is crucial for fostering active and meaningful student engagement. Traditional knowledge-centric approaches often overlook the dynamic processes students use to interact with and apply technology in their learning. By focusing on how students actively engage with digital tools to meet academic and developmental goals, educators can create richer, more effective learning experiences. This shift not only enhances academic outcomes but also prepares students with the critical skills needed to navigate and contribute to an increasingly digital world. *Cases on Enhancing P-16 Student Engagement With Digital Technologies* features cases of teaching and learning with digital technologies in P-16 educational settings, focusing specifically on what learners do with technology. It shares cases of teaching in which technologies are leveraged in student-centered ways that transform learning and allow students to engage in authentic, meaningful learning experiences. Covering topics such as artificial intelligence, AI, immersive learning experiences, and traditional learning, this book is an excellent resource for P-16 educators, leaders, stakeholders, policymakers, and more.
