Monthly Catalog of United States Government Publications, Cumulative Index United States. Superintendent of Documents, 1976 *Monthly Catalog of United States Government Publications* United States. Superintendent of Documents, 1982 **Monthly Catalogue, United States Public Documents** , 1980-10 From Casual Stargazer to Amateur Astronomer Dave Eagle, 2013-10-16 The beginning astronomical observer passes through a series of stages The initial stage is hugely exciting and gives the beginner a real buzz as he discovers some of the faint fuzzy objects markings on the planets rings around Saturn and the craters on the Moon But as the novice observer progresses he or she wants to know what more there is than looking at faint fuzzy blobs or indistinct planet markings Many jump to the conclusion wrongly that they need to spend lots of money on expensive equipment to progress From Casual Stargazer to Amateur Astronomer has been written specifically to address this group of budding stargazers Astronomy is much more than a quick sightseeing tour Patient observers who can develop their skills will start to appreciate what they are seeing and will know exactly what to look out for on any particular night And equally important they will learn what not to expect to see From Casual Stargazer to Amateur Astronomer is for those who want to develop observing skills beyond mere sightseeing and learn some of the techniques used to carry out enjoyable and scientifically useful observations It will also direct readers to make informed choices about what can be seen and when This book is for anyone keen to develop their skills as an amateur astronomer

The Transient Radio Sky Evan Francis Keane, 2011-07-16 The high time resolution radio sky represents unexplored astronomical territory This thesis presents a study of the transient radio sky focussing on millisecond scales As such the work is concerned primarily with neutron stars In particular this research concentrates on a recently identified group of neutron stars known as RRATs which exhibit radio bursts every few minutes to every few hours After analysing neutron star birthrates a re analysis of the Parkes Multibeam Pulsar Survey is described which has resulted in the discovery of 19 new transient radio sources Of these 12 have been seen to repeat and a follow up campaign of observations has been undertaken These studies have greatly increased our knowledge of the rotational properties of RRATs and enable us to conclude that they are pulsars with extreme nulling and or pulse to pulse modulation Although the evolution of neutron stars post supernova is not yet understood it seems that RRATs fit into the emerging picture in which pulsar magnetospheres switch between stable configurations **Monthly Catalog of United States Government Publications** , **High Speed Photometer Instrument Handbook** Robert C. Bless, Space Telescope Science Institute (U.S.), 1992 **Eye Beyond the Sky** Jie Wang, 2024-09-17 This book highlights stories of the most important 13 ground based observatories and 14 space probes in human history leading readers through each significant step of human s astronomical observation journey From the earliest Hooker Telescope and the Mount Wilson Observatory to the latest FAST JWST and DAMPE the targets of observation range from large systems such as the solar system the milky way and the universe to individual planets such as Jupiter

Saturn Mars and the remote stars and to the matters that reveal the origin of the universe such as dark matter and cosmic background radiation The book presents the mysteries of the sky in an easily readable manner suitable for audiences of all ages who are curious about the universe and thirsty to know all the important discoveries in the past century especially the last decade With carefully selected contents the book weaves together a series of tales to make the convoluted history of astronomical observation full of fun and excitement ensuring that readers never lose interest during reading *Making Beautiful Deep-Sky Images* Greg Parker, 2016-10-26 This book is based around the author's beautiful and sometimes awe inspiring color images and mosaics of deep sky objects The book describes how similar Hubble class images can be created by amateur astronomers in their back garden using commercially available telescopes and CCD cameras Subsequent processing and image enhancement in the electronic darkroom is covered in detail as well A range of telescopes and equipment is considered from the author's 11 inch with Hyperstar camera down to more affordable instruments Appendices provide links to free software not available from a single source and are themselves an invaluable resource *The Sierra Club Guide to the Natural Areas of Oregon and Washington* John Perry, Jane Greverus Perry, 1983 **IGY General Report Series** World Data Center A., 1959 Parallel and Distributed Processing Jose Rolim, 1998-03-18 This book constitutes the refereed proceedings of 10 international workshops held in conjunction with the merged 1998 IPPS SPDP symposia held in Orlando Florida US in March April 1998 The volume comprises 118 revised full papers presenting cutting edge research or work in progress In accordance with the workshops covered the papers are organized in topical sections on reconfigurable architectures run time systems for parallel programming biologically inspired solutions to parallel processing problems randomized parallel computing solving combinatorial optimization problems in parallel PC based networks of workstations fault tolerant parallel and distributed systems formal methods for parallel programming embedded HPC systems and applications and parallel and distributed real time systems Directory, 1986 **Mastering AutoCAD Civil 3D 2011** James Wedding, Scott McEachron, 2010-08-05 The only comprehensive reference and tutorial for Civil 3D 2011 Civil 3D is Autodesk's popular robust civil engineering software and this fully updated guide is the only one endorsed by Autodesk to help students prepare for certification exams Packed with expert tips tricks techniques and tutorials this book covers every aspect of Civil 3D 2011 the preferred software package for designing roads highways subdivisions drainage and sewer systems and other large scale civic projects This is the official Autodesk endorsed guide to Civil 3D the leading software for designing large scale civic systems such as highways subdivisions and sewer systems Covers all the key concepts the software interface and best methods for creating editing displaying and labeling all elements of a civic engineering project Features in depth detailed coverage of surveying points alignments surfaces profiles corridors grading LandXML and LDT Project Transfer cross sections pipe networks visualization sheets and project management Includes what students need to pass the Civil 3D 2011 Certified Associate and Certified Professional exams Mastering AutoCAD Civil 3D 2011 is a complete

Budget Astrophotography Timothy J. Jensen,2014-10-25 Here are clear explanations of how to make superb astronomical deep sky images using only a DSLR or webcam and an astronomical telescope no expensive dedicated CCD cameras needed The book is written for amateur astronomers interested in budget astrophotography the deep sky not just the Moon and planets and for those who want to improve their imaging skills using DSLR and webcams It is even possible to use existing non specialist astronomical equipment for scientific applications such as high resolution planetary and lunar photography astrometry photometry and spectroscopy The introduction of the CCD revolutionized astrophotography The availability of this technology to the amateur astronomy community has allowed advanced science and imaging techniques to become available to almost anyone willing to take the time to learn a few simple techniques Specialized cooled chip CCD imagers are capable of superb results in the right hands but they are all very expensive If budget is important the reader is advised on using a standard camera instead Jensen provides techniques useful in acquiring beautiful high quality images and high level scientific data in one accessible and easy to read book It introduces techniques that will allow the reader to use more economical DSLR cameras that are of course also used for day to day photography to produce images and data of high quality without a large cash investment [Planets & Moons](#) Rishikesh Jaiswal,2025-04-19 The worlds beyond our own have captivated human imagination for centuries From the ancient astronomers who tracked the movements of celestial bodies to the modern space probes exploring distant moons our fascination with planets and their companions has only deepened with

time This book Planets and Moons invites you on an immersive journey through the solar system and beyond uncovering the extraordinary diversity mysteries and dynamic forces that shape these celestial spheres Within these pages you will explore the planets in detail each with its unique characteristics weather systems and histories of formation You will travel to their moons some of which may harbour the conditions for life We will trace the scientific breakthroughs that revolutionized our understanding from Galileo's telescope to modern day robotic explorers sending back breath taking images from alien landscapes What makes this book Planets and Moons stand out is its depth and clarity Instead of simply skimming through facts and figures this book dives deeper weaving together science history and discovery in a way that is both informative and engaging Every concept is presented in clear accessible language ensuring that even complex ideas can be grasped without difficulty While mathematical principles are fundamental to planetary science this book focuses on the big picture introducing only the most essential formulas with practical examples to enhance understanding Our aim is to provide a comprehensive yet approachable guide one that not only educates but also sparks curiosity and wonder Whether you're an amateur astronomer a student of the cosmos or simply someone who has looked up at the night sky and wondered about the worlds beyond this book is for you So let's embark on this journey together traveling through the vast and fascinating realm of planets and moons where every world has a story to tell
