Sky Blaise Cendrars, 1996 In France Blaise Cendrars 1887 1961 a friend of Chagall Leger Picasso Braque Picabia and Modigliani has emerged as one of the great figures of modernism Together with Apollinaire he brought cubism to French poetry Anais Nin hailed him as one of France's best writers and the Village Voice called him the Indiana Jones of French literature Translated into English for the first time Sky the last of Cendrars's four autobiographical volumes weaves together a dazzling collage of prose poetry travel writing reportage detective story and personal memoir His life itself reads like the Arabian Nights Entertainment writes Henry Miller In Sky Cendrars recounts his adventures in Russia during the revolution of 1905 in the trenches of World War I where he lost his right arm in Brazil in the 1920s and behind the lines during World War II The two wars run throughout as a unifying thread As the title announces this is a memoir of the sky of Cendrars's love of birds levitation and aviation The opening of the book finds Cendrars the great adventurer and traveler sailing back from Brazil to Paris with 250 multi-colored birds hoping to bring at least one of them alive to a child he loves The second part moves back and forth between the author's recollections of life as a war correspondent in 1940 and an encyclopedic discourse on levitation he wrote in search of a patron saint of aviation perhaps as compensation for the death of his young son Remy who was a pilot during the war With unmatched exuberance Cendrars writes on poetry myths existentialism his life in Paris between the wars with the painter Delaunay and the Dadaists and his exotic adventures in Brazil His anecdotes of Russia where he was a jeweler's assistant are compelling and funny His fiercely imaginative stories such as one about a Brazilian coffee plantation owner who obsessed with his love for Sarah Bernhardt retreats into the wilderness are magical

Memoir ,1910 **The Royal Navy's Air Service in the Great War** David Hobbs,2017-09-30 In a few short years after 1914 the Royal Navy practically invented naval air warfare not only producing the first effective aircraft carriers but also pioneering most of the techniques and tactics that made naval air power a reality By 1918 the RN was so far ahead of other navies that a US Navy observer sent to study the British use of aircraft at sea concluded that any discussion of the subject must first consider their methods Indeed by the time the war ended the RN was training for a carrier borne attack by torpedo

bombers on the German fleet in its bases over two decades before the first successful employment of this tactic against the Italians at Taranto Following two previously well received histories of British naval aviation David Hobbs here turns his attention to the operational and technical achievements of the Royal Naval Air Service both at sea and ashore from 1914 to 1918 Detailed explanations of operations the technology that underpinned them and the people who carried them out bring into sharp focus a revolutionary period of development that changed naval warfare forever Controversially the RNAS was subsumed into the newly created Royal Air Force in 1918 so as the centenary of its extinction approaches this book is a timely reminder of its true significance
