The Triangle Shirtwaist Factory Fire Katie Marsico,2010-01-30 Provides comprehensive information on industry and immigration the Triangle Shirtwaist Factory Fire its aftermath and labor rights *Employers' Economics versus Employees' Economy* John F. M. McDermott,2017-01-23 This book argues that economic activity in the public sphere now underwrites private corporations and rejects rigid adherence to traditional economic theories that no longer apply Adam Smith's widely used merchant's model assumes that most investment is private when in fact research demonstrates that public investment in the workforce through education and training far outweighs the private sector and does not account for the growing presence of consensual pricing the diversification of modern businesses or the increasing internal authoritarianism of globalizing companies With de facto public support for these adaptations undermining the universally presumed economic model private corporations are able to increase their profits while misrepresenting the investment of their own global labor forces This book suggests an economy of laws solution that balances the needed degree of central investment planning with the continuation of our pluralist economy of largely autonomous firms principally by extending the full rights of citizens into the workplace itself *The Routledge Companion to Advertising and Promotional Culture* Emily West,Matthew P. McAllister,2013-02-11 The Routledge Companion to Advertising and Promotional Culture provides an essential guide to the key issues methodologies concepts debates and policies that shape our everyday relationship with advertising The book contains eight sections Historical Perspectives considers the historical roots and their relationship to recent changes of contemporary advertising and promotional practice Political Economy examines how market forces corporate ownership and government policies shape the advertising and media promotion environment Globalization presents work on advertising and marketing as a global intercultural and transnational practice Audiences as Labor Consumers Interpreters Fans introduces how people construct promotional meaning and are constructed as consumers markets and labor by advertising forces Identities analyzes the ways that advertising constructs images and definitions of groups such as gender race and the child through industry labor practices marketing as well as through representation in advertising texts Social Institutions looks at the pervasiveness of advertising strategies in different social domains including politics music housing and education Everyday Life highlights how a promotional ethos and advertising initiatives pervade self image values and relationships The Environment interrogates advertising's relationship to environmental issues the promotional efforts of corporations to construct green images and mass consumption's relationship to material waste With chapters written by leading international scholars working at the intersections of media studies and advertising studies this book is a go to source for those looking to understand the ways advertising has shaped consumer culture in the past and present *Sloppy Craft* Elaine Cheasley Paterson,Susan Surette,2015-09-24 Sloppy Craft Postdisciplinarity and the Crafts brings together leading

Reconciling International Trade and Labor Protection Wolfgang Plasa, 2015-08-20 Over the last two decades or so a number of developing countries have become important suppliers of manufactured goods A good deal of these goods are produced under extremely poor working conditions incompatible with the fundamental rights and freedoms However WTO rules do not allow restrictions on imports of such goods and the ILO hardly ever sanctions violations of international labor standards On the one hand this leaves exporting countries free to compromise on labor protection in order to enhance their competitiveness on foreign markets On the other hand importing countries are obliged to keep their markets open for goods produced under substandard labor conditions This gives rise to the question of whether the rules of the multilateral trading system should be linked to international labor standards This study argues that there are two trade related reasons for establishing such a link The first one is commonly referred to as social dumping GATT rules enshrine the principles that should govern international trade fairness and responsibility These principles should also apply where trade meets labor protection Exporting goods made under substandard labor conditions is unfair and distorts trade It would therefore be consistent to make social dumping actionable The other reason concerns the responsibility of importing countries Increased imports of goods produced under substandard labor conditions are an incentive for the exporting country to produce more goods under the same labor conditions and ship them to the same importing country This results in a proliferation of violations of labor standards for which the importing country shares the responsibility There is a need to adopt a link between trade and labor standards enabling the importing country to cap imports in order to escape the blame
