Italian Small Arms of the First and Second World Wars Ralph Riccio,2014 This is the first comprehensive work in either English or Italian to address Italian small arms used during World War I and World War II It describes each weapon and covers the developmental history and use of all Italian designed and produced pistols rifles submachine guns and machine guns used during both conflicts as well as prototype weapons and foreign weapons used by the Italians Other appendices cover bayonets accoutrements markings ammunition small arms manufacturing facilities Italian small arms designers production summaries and collector s notes It includes many previously unpublished photographs and background information on small arms producers ammunition production facilities and designers In addition to the new material it also

corrects previously published errors about Italian weapons AUTHOR Ralph Riccio spent twenty years as a U S Army military intelligence officer He has written numerous magazine articles many in Italian as well as having authored several books dealing with Italian and Irish military equipment and history His native Italian fluency has enabled him to develop extensive contacts with Italian military history experts and to delve deeply into research on Italian weapons and history This latest book on Italian military small arms is the culmination of years of research on the subject ILLUSTRATIONS 608 b w and colour photographs World Military Expenditures and Arms Transfers ,2000 **Arms Trafficking and Colombia** Kim Cragin,Bruce Hoffman,Mark Berends,Stephanie Williamson,Paul Sorensen,2003-10-24 Colombia has experienced significant political instability and violence over the past century due to a number of factors including the proliferation of small arms trafficking The authors identify the sources and routes used by arms traffickers to acquire buy sell receive transfer and ship weapons They also examine the various groups and individuals who purchase and use these munitions The authors examine Colombia s political conflict through the lens of small arms trafficking and conclude with policy implications for the United States *Negotiating Sovereignty and Human Rights* Michaelene Cox,2016-04-22 Providing an overview of institutional developments and innovations in human rights politics this volume discusses some of the most important current and emerging human rights issues It takes stock of the initiatives policy responses and innovations of past years to identify some of the challenges that will likely require bold and innovative solutions The contributors focus on actors and or issues that are outside the mainstream of international human rights politics the chapters address issues that have only emerged as an important part of the international human rights agenda and generated much advocacy diplomacy and negotiations since the end of the Cold War These issues include the International Criminal Court the norm of Responsibility to Protect R2P the proliferation of small arms and light weapons and its human rights impact truth commissions and the rights of persons with disabilities The contributions offer a direct challenge to entrenched notions of state sovereignty and represent a departure from established ways of policy making The Logic of Humanitarian Arms Control and Disarmament Nik Hynek,Anzhelika Solovyeva,2020-11-10 This novel and original book examines and disaggregates theoretically and empirically operations of power in international security regimes These regimes varying in degree from regulatory to prohibitory are understood as sets of normative discourses political structures and dependencies anarchies hierarchies and heterarchies and agencies through which power operates within a given security issue area with a regulatory effect In International Relations regime analysis has been dominated by several generations of regime theory theorization As this book makes clear not only has the IR Regime Theory been of limited utility for security domain due to its heavy focus on economic and environmental regimes but it too heuristically suffered from its rigid pegging to general IR Theory It is not surprising then that the evolution of IR Regime Theory has largely been mirroring the evolution of IR Theory in general from the neo realist neo liberal institutionalist convergence regime theory through cognitivism to constructivist regime theory The commitment of this book

is to remedy this situation by bringing together robust power analysis and international security regimes It provides the reader with a theoretically and empirically uncompromising and comprehensive analysis of the selected international security regimes which goes beyond one or another school of IR Regime Theory In doing so it completely abandons existing and piecemeal analysis of regimes within the intellectual field of IR based on conventional grand mid range theorization

The Arms Trade Treaty: A Commentary Andrew Clapham, Stuart Casey-Maslen, Gilles Giacca, Sarah Parker, 2016-07-28 The United Nations Arms Trade Treaty became binding international law in late 2014 and although the text of the treaty is a relatively concise framework for assessing whether to authorize or deny proposed conventional weapons transfers by States Parties there exists controversy as to the meaning of certain key provisions Furthermore the treaty requires a national regulatory body to authorize proposed transfers of conventional weapons covered by the treaty but does not detail how such a body should be established and how it should effectively function The Arms Trade Treaty A Commentary explains in detail each of the treaty provisions the parameters for prohibitions or the denial of transfers international cooperation and assistance and implementation obligations and mechanisms As states ratify and implement the Treaty over the next few years the commentary provides invaluable guidance to government officials commentators and scholars on the meaning of its contentious provisions This volume describes in detail which weapons are covered by the treaty and explains the different forms of transfer that the Arms Trade Treaty regulates It covers international human rights trade disarmament humanitarian law criminal law and state to state use of force as well as the application of

the treaty to non state actors
