In the Information Society the smart card or smart device with its processing power and link to its owner will be the potential
human representation or delegate in Ambient Intelligence Pervasive Computing where every appliance or computer will be
connected and where control and trust of the personal environment will be the next decade challenge Smart card research is
of increasing importance as the need for information security grows rapidly Smart cards will play a very large role in ID
management in secure systems In many computer science areas smart cards introduce new dimensions and opportunities
Disciplines like hardware design operating systems modeling systems cryptography and distributed systems find new areas
of applications or issues smart cards also create new challenges for these domains CARDIS the IFIP Conference on Smart
Card Research and Advanced Applications gathers researchers and technologists who are focused in all aspects of the design
development deployment validation and application of smart cards or smart personal devices This volume contains the 20
papers that have been selected by the CARDIS Program Committee for presentation at the 6th International Conference on
Smart Card Research and Advanced Applications CARDIS 2004 which was held in conjunction with the IFIP 18th World
Computer Congress in Toulouse France in August 2004 and sponsored by the International Federation for Information
Processing IFIP With 20% of the papers coming from Asia 20% from America and 60% from Europe the competition was

particularly severe this year with only 20 papers selected out of 45 very good submissions Smart Card Research and Advanced Applications VI presents the latest advances in smart card research and applications and will be essential reading for developers of smart cards and smart card applications as well as for computer science researchers in computer architecture computer security and cryptography Smart Card Research and Advanced Applications Aurélien Francillon,Pankaj Rohatgi,2014-06-26 This book constitutes the thoroughly refereed post conference proceedings of the 12th International Conference on Smart Card Research and Advanced Applications CARDIS 2013 held in Berlin Germany in November 2013 The 17 revised full papers presented in this book were carefully reviewed and selected from 47 submissions The papers are organized in topical sections on security technologies attacks on masking side channel attacks software and protocol analysis side channel countermeasures and side channel and fault attacks **Smart Card Research and Advanced Applications** Naofumi Homma,Marcel Medwed,2016-03-18 This book constitutes the thoroughly refereed post conference proceedings of the 14th International Conference on Smart Card Research and Advanced Applications CARDIS 2015 held in Bochum Germany in November 2015 The 17 revised full papers presented in this book were carefully reviewed and selected from 40 submissions The focus of the conference was on all aspects of the design development deployment validation and application of smart cards and secure elements in secure platforms or systems Smart Card Research and Advanced Applications Shivam Bhasin,Thomas Roche,2024-02-22 This book constitutes the proceedings of the 22nd International Conference on Smart Card Research and Advanced Applications CARDIS 2023 held in Amsterdam The Netherlands during November 14 16 2023 The 13 full papers presented in this volume were carefully reviewed and selected from 28 submissions They were organized in topical sections as follows fault attacks side channel analysis smartcards and side channel neural networks **Smart Card Research and Advanced Applications** Josep Domingo-Ferrer,David Chan,Anthony Watson,2000-09-30 Smart cards or IC cards offer a huge potential for information processing purposes The portability and processing power of IC cards allow for highly secure conditional access and reliable distributed information processing IC cards that can perform highly sophisticated cryptographic computations are already available Their application in the financial services and telecom industries are well known But the potential of IC cards go well beyond that Their applicability in mainstream Information Technology and the Networked Economy is limited mainly by our imagination the information processing power that can be gained by using IC cards remains as yet mostly untapped and is not well understood Here lies a vast uncovered research area which we are only beginning to assess and which will have a great impact on the eventual success of the technology The research challenges range from electrical engineering on the hardware side to tailor made cryptographic applications on the software side and their synergies This volume comprises the proceedings of the Fourth Working Conference on Smart Card Research and Advanced Applications CARDIS 2000 which was sponsored by the International Federation for Information Processing IFIP and held at the Hewlett Packard Labs in the
