Pfeiffer, 2006-12 Clay tobacco pipes are a unique form of artifact that has been recovered from the earliest colonial period sites to those of the early twentieth century Archaeologists have found this artifact category useful for interpretive purposes due to their rapid technological and typological change decoration and maker s marks Lack of adequate reporting in older site reports precludes a wide range of interpretive values intrinsic to this

artifact category A detailed study of tobacco pipe assemblages from the Pacific Northwest and Northern Plains in an 1800 to 1890s time frame demonstrates the interpretive value of this category on an intrasite regional and interregional basis The detailed analysis given the pipes and pipe assemblages provides a historical background that encompasses the artifacts the manufacturers the sites the relationships of the sites and their place in the development of these regions These tobacco pipes reflect the marketing and trade histories of these regions as well as many of the cultural subgroups *Smoking and Culture* Sean Michael Rafferty, Rob Mann, 2004 Because of the ceremonial and ritual aspects of the practice in Native American societies smoking pipes are important cultural artifacts The essays in *Smoking and Culture* constitute the first sustained interpretive study of smoking pipes focusing on the cultural significance of smoking both before and after European contact

**Archaeology and Ancient Religion in the American Midcontinent** Brad H. Koldehoff, Timothy R. Pauketat, 2018-11-06 Analyses of big datasets signal important directions for the archaeology of religion in the Archaic to Mississippian Native North America Across North America huge data accumulations derived from decades of cultural resource management studies combined with old museum collections provide archaeologists with unparalleled opportunities to explore new questions about the lives of ancient native peoples For many years the topics of technology economy and political organization have received the most research attention while ritual religion and symbolic expression have largely been ignored This was often the case because researchers considered such topics beyond reach of their methods and data In Archaeology and Ancient Religion in the American Midcontinent editors Brad H Koldehoff and Timothy R Pauketat and their contributors demonstrate that this notion is outdated through their analyses of a series of large datasets from the midcontinent ranging from tiny charred seeds to the cosmic alignments of mounds they consider new questions about the religious practices and lives of native peoples At the core of this volume are case studies that explore religious practices from the Cahokia area and surrounding Illinois uplands Additional chapters explore these topics using data collected from sites and landscapes scattered along the Mississippi and Ohio River valleys This innovative work facilitates a greater appreciation for and understanding of ancient native religious practices especially their seamless connections to everyday life and livelihood The contributors do not advocate for a reduced emphasis on technology economy and political organization rather they recommend expanding the scope of such studies to include considerations of how religious practices shaped the locations of sites the character of artifacts and the content and arrangement of sites and features They also highlight analytical approaches that are applicable to archaeological datasets from across the Americas and beyond

**Green Brook Sub-basin Flood Control**, 1981 Montreal Dany Fougères, Roderick MacLeod, 2018-04-06 Surrounded by water and located at the heart of a fertile plain the Island of Montreal has been a crossroads for Indigenous peoples European settlers and today's citizens and an inland port city for the movement of people and goods into and out of North America Commemorating the city's 375th anniversary Montreal The History of a North American City is the definitive two volume account of this fascinating metropolis and its storied hinterland This comprehensive collection of essays filled with hundreds of illustrations photographs and maps draws on human geography and environmental history to show that while certain distinctive features remain unchanged Mount Royal the Lachine Rapids

of the Saint Lawrence River human intervention and urban evolution mean that over time Montrealers have had drastically different experiences and historical understandings. Significant issues such as religion, government, social conditions, the economy, labour, transportation, culture, and entertainment and scientific and technological innovation are treated thematically in innovative and diverse chapters to illuminate how people's lives changed along with the transformation of Montreal. This history of a city in motion presents an entire picture of the changes that have marked the region as it spread from the old city of Ville Marie into parishes, autonomous towns, boroughs, and suburbs on and off the island. The first volume encompasses the city up to 1930, vividly depicting the lives of First Nations prior to the arrival of Europeans, colonization by the French, and the beginning of British Rule. The crucial roles of waterways, portaging paths, and trails as the primary means of travelling and trade are first examined before delving into the construction of canals, railways, and the first major roads. Nineteenth-century industrialization created a period of near-total change in Montreal as it became Canada's leading city and witnessed staggering population growth from less than 20,000 people in 1800 to over one million by 1930. The second volume treats the history of Montreal since 1930, the year that the Jacques Cartier Bridge was opened and allowed for the outward expansion of a region which before had been confined to the island. From the Great Depression and Montreal's role as a munitions manufacturing centre during the Second World War to major cultural events like Expo 67, the twentieth century saw Montreal grow into one of the continent's largest cities, requiring stringent management of infrastructure, public utilities, and transportation. This volume also extensively studies the kinds of political debate with which the region and country still grapple regarding language, nationalism, federalism, and self-determination. Contributors include Philippe Apparicio (INRS), Guy Bellavance (INRS), Laurence Bherer (University of Montreal), Stéphane Castonguay (UQTR), the late Jean-Pierre Collin (INRS), Magda Fahrni (UQAM), the late Jean-Marie Fecteau (UQAM), Dany Fougères (UQAM), Robert Gagnon (UQAM), Danielle Gauvreau (Concordia), Annick Germain (INRS), Janice Harvey (Dawson College), Annie Claude Labrecque (independent scholar), Yvan Lamonde (McGill), Daniel Latouche (INRS), Roderick MacLeod (independent scholar), Paula Negron Poblete (University of Montreal), Normand Perron (INRS), Martin Petitclerc (UQAM), Christian Poirier (INRS), Claire Poitras (INRS), Mario Polèse (INRS), Myriam Richard (unaffiliated), Damaris Rose (INRS), Anne-Marie Sguin (INRS), Gilles Sénécal (INRS), Valérie Shaffer (independent scholar), Richard Shearmur (McGill), Sylvie Taschereau (UQTR), Michel Trpanier (INRS), Laurent Turcot (UQTR), Nathalie Vachon (INRS), and Roland Viau (University of Montreal).

L. Too, Am America Theresa A. Singleton, 1999. The moral mission archaeology set in motion by black activists in the 1960s and 1970s sought to tell the story of Americans, particularly African Americans, forgotten by the written record. Today the archaeological study of African American life is no longer simply an effort to capture unrecorded aspects of black history or to exhume the heritage of a neglected community. Archaeologists now recognize that one cannot fully comprehend the European colonial experience in the Americas without understanding its African counterpart. This collection of essays reflects and extends the broad spectrum of scholarship arising from this expanded definition of African

American archaeology treating such issues as the analysis and representation of cultural identity race gender and class cultural interaction and change relations of power and domination and the sociopolitics of archaeological practice I Too Am America expands African American archaeology into an inclusive historical vision and identifies promising areas for future study
