The Ming Tribute Grain System:

The Ming Tribute Grain System Ayao Hoshi, 1981-01-30 A Reconstruction of the Ming tribute grain system from varying fields of investigation **The Ming Tribute Grain System** Bosji Ayao, 1969 **The Chinese Empire in Local Society**

Michael Szonyi, Shiyu Zhao, 2020-12-17 This book explores the Ming dynasty 1368 1644 military its impact on local society and its many legacies for Chinese society It is based on extensive original research by scholars using the methodology of historical anthropology an approach that has transformed the study of Chinese history by approaching the subject from the bottom up Its nine chapters each based on a different region of China examine the nature of Ming military institutions and their interaction with local social life over time Several chapters consider the distinctive role of imperial institutions in frontier areas and how they interacted with and affected non Han ethnic groups and ethnic identity Others discuss the long term legacy of Ming military institutions especially across the dynastic divide from Ming to Qing 1644 1912 and the implications of this for understanding more fully the nature of the Qing rule **The Ming Tribute Grain System.**

Translated by Mark Elvin Ayao Hoshi, 1969 *The Ming World* Kenneth M Swope, 2019-08-08 The Ming World draws together scholars from all over the world to bring China's Ming Dynasty 1368 1662 to life exploring recent scholarly trends and academic debates that highlight the dynamism of the Ming and its key place in the early modern world The book is designed to replicate the structure of popular Ming era unofficial histories that gathered information and gossip from a wide variety of fields and disciplines Engaging with a broad array of primary and secondary sources the authors build upon earlier scholarship while extending the field to embrace new theories methodologies and interpretive frameworks It is divided into five thematically linked sections Institutions Ideas Identities Individuals and Interactions Unique in its breadth and scope The Ming World is essential reading for scholars and postgraduates of early modern China the history of East Asia and anyone interested in gaining a broader picture of the colorful Ming world and its inhabitants *China's Second Capital - Nanjing under the Ming, 1368-1644* Jun Fang, 2014-05-23 This book is a study of the dual capital system of Ming dynasty China 1368 1644 with a focus on the administrative functions of the auxiliary Southern Capital Nanjing It argues that the immense geographical expanse of the Chinese empire and the poor communication infrastructure of pre modern times necessitated the establishment of an additional capital administration for effective control of the Ming realm The existence of the Southern Capital which has been dismissed by scholars as redundant and insignificant was the author argues justified by its ability to assist the primary Northern Capital better control the southern part of the imperial land The practice of maintaining auxiliary capitals where the bureaucratic structures of the primary capital were replicated in varying degrees was a unique and valuable approach to effecting bureaucratic control over vast territory in pre modern conditions Nanjing translates into English as Southern Capital and Beijing as Northern Capital *Speaking of Profit* William T.

Rowe, 2020-10-26 In the first half of the nineteenth century the Qing Empire faced a crisis It was broadly perceived both

inside and outside of government that the prosperous age of the eighteenth century was over. Bureaucratic corruption and malaise, population pressure and food shortages, ecological and infrastructural decay, domestic and frontier rebellion, adverse balances of trade, and eventually a previously inconceivable foreign threat from the West seemed to present hopelessly daunting challenges. This study uses the literati reformer Bao Shichen as a prism to understand contemporary perceptions of and proposed solutions to this general crisis. Though Bao only briefly and inconsequentially served in office himself, he was widely recognized as an expert on each of these matters, and his advice was regularly sought by reform-minded administrators. From examination of his thought on bureaucratic and fiscal restructuring, agricultural improvement, the grain tribute administration, the salt monopoly, monetary policy, and foreign relations, Bao emerges as a consistent advocate of the hard-nosed pursuit of material profit in the interests not only of the rural populace but also of the Chinese state and nation, anticipating the arguments of self-strengthening reformers later in the century.

The Cambridge History of China Denis Crispin Twitchett, John King Fairbank, 1978. International scholars and sinologists discuss culture, economic growth, social change, political processes, and foreign influences in China since the earliest pre-dynastic period.

Elusive Capital Gipouloux, François, 2022-06-09. Offering a fresh analysis of late imperial China, this cutting-edge book revisits the roles played by merchant networks, economic institutions, and business practices in the divergence between Europe and China during the trade revolution.

The Pattern of the Chinese Past Mark Elvin, 1973. A satisfactory comprehensive history of the social and economic development of pre-modern China, the largest country in the world in terms of population and with a documentary record covering three millennia, is still far from possible. The present work is only an attempt to disengage the major themes that seem to be of relevance to our understanding of China today. In particular, this volume studies three questions: Why did the Chinese Empire stay together when the Roman Empire and every other empire of antiquity of the middle ages ultimately collapsed? What were the causes of the medieval revolution which made the Chinese economy after about 1100 the most advanced in the world? And why did China after about 1350 fail to maintain her earlier pace of technological advance while still in many respects advancing economically? The three sections of the book deal with these problems in turn, but the division of a subject matter is to some extent only one of convenience. These topics are so interrelated that in the last analysis none of them can be considered in isolation from the others.

Routledge Library Editions: Business and Economics in Asia Various, 2021-07-14. This set examines a vast range of topics covering all experiences of business and economics from across Asia. Dealing with early banking systems in China, the industrialisation of Korea and Taiwan, the evolution of Japanese business practices, economic development, protectionist policies, industrial investment, trade, tourism, and a host of other topics, the books collected here form a vital reference resource across a wide subject area.

Studies in Chinese Price History Endymion Porter Wilkinson, 2018-11-01. This book, first published in 1980, uses a body of original documentary sources, some 5000 district grain price reports, to quantify in the form of exchange and

price zones the relationships between the exchange markets and the grain markets of ninety district towns in Shensi a province in China Through this study there emerges a detailed picture of a near subsistence agricultural economy

Collective Action in the Formation of Pre-Modern States Richard Blanton, Lane Fargher, 2008 Anthropological archaeology and other disciplines concerned with the formation of early complex societies are undergoing a theoretical shift Given the need for new directions in theory the book proposes that anthropologists look to political science especially the rational choice theory of collective action The authors subject collective action theory to a methodologically rigorous evaluation using systematic cross cultural analysis based on a world wide sample of societies **Suzhou** Michael Marme, 2005 This book shows how though Suzhou entered the Ming defeated and suspect interactions between the imperial state and local elites gave rise to a network of markets centered on Suzhou that fostered high quality local specialization

Landlord and Labor in Late Imperial China Jing Su, Luo Lun, 2020-03-17 This well documented study discusses the social and economic changes in Shandong province before the influence of the West was felt at the end of the nineteenth century The authors show that by the sixteenth century commercial and handicraft towns linked to national and local markets had already begun to emerge Urban growth was made possible by increased agricultural production which in turn stimulated specialization and increased commercialization in the agricultural sector Another important change in rural society at this time was the emergence of a new stratum of wealthy landlords who managed their estates with wage labor Case studies of managerial landlords who form the main focus of this study are included as well as generalizations drawn from questionnaire materials Luo Lun and Jing Su wrote this book while they were young researchers at Shandong University in the late 1950s using data they had gathered in the culturally relaxed period of the Hundred Flowers In his introduction Endymion Wilkinson analyzes the authors thesis and concludes that their Leninist model is inapplicable to premodern Chinese history The value of this study lies not so much in its conclusion that even without the impact of Western imperialism China would of itself have developed a capitalist society but rather in the wealth of data the authors present in this first in depth study of a relatively advanced region in north China **Fields from the Sea** Jennifer Cushman, 2018-05-31 Methodical and inquisitive Cushman explores Chinese junk trade with Siam over two centuries In the course of her analysis the author illuminates significant aspects of China s economic development the implementation of commercial policies by the two nations and concepts of trade in the east and southeast of Asia
