The Psychology and Science of Pseudoscience Terence Hines, 2025-03-18 This book provides a comprehensive review of numerous areas of pseudoscience and related pathological science. It not only describes the factual bases for rejecting pseudoscientific claims but also emphasizes the psychological processes that lead to the acceptance of such claims. This book is timely given the increase in misinformation over the past decade. Using three principles of cognitive psychology, this book helps explain why people are hard-wired to accept and continue to believe in pseudoscientific claims. It provides up-to-date discussions of numerous paranormal and pseudoscientific topics including the usual suspects: UFOs and alien abductions, astrology, cryptozoology, and more, but also belief in conspiracy theories, laboratory parapsychology, bogus forensic science techniques, the pseudopsychologies of Freud, medical fraud, and the unethical practices of Big Pharma. Older research that was foundational in the critical examination of several topics is woven throughout to situate them in a historical context.

Chinese Medicine in East Africa Elisabeth Hsu, 2022-07-08 Based on fieldwork conducted between 2001-2008 in urban East Africa, this book explores who the patients, practitioners, and paraprofessionals doing Chinese medicine were in this early period of renewed China-Africa relations. Rather than taking recourse to the placebo effect, the author explains through the spatialities and materialities of the medical procedures provided why, apart from purchasing the Chinese antimalarial called Artemisinin, locals would try out their alternatively modern formulas for treating a wide range of post-colonial disorders and seek their sexual enhancement medicines.

Everyone is guessing what their relationship was. The next day the video came out: a certain disabled guy not only stood up but also blocked the little petite wife in the corner. Zoey, you are mine.
