Cudnik,2010-03-10 The genesis of modern searches for observable meteoritic phenomena on the Moon is the paper by Lincoln La Paz in Popular Astronomy magazine in 1938 In it he argued that the absence of observed fashes of meteoritic impacts on the Moon might be interpreted to mean that these bodies are destroyed as luminous meteors in an extremely rarefed lunar atmosphere The paper suggested the possibility of systematic searches for such possible lunar meteors With these concepts in mind I was surprised to note a transient moving bright speck on the Moon on July 10 1941 It appeared to behave very much as a lunar meteor would except that the poorly estimated duration would lead to a strongly hyperbolic heliocentric velocity Thus the idea of systematic searches for both p sible lunar meteors and meteoritic impact fashes was born It was appreciated that much time might need to be expended to achieve any positive results Systematic searches were carried out by others and myself chiefly in the years 1945 1965 and became a regular program at the newly founded Association of Lunar and Planetary Observers or ALPO      *The Transits of Venus* William Sheehan,2010-12 In this unique and fascinating history of science acclaimed popular science writer Sheehan and award winning geographer Westfall take readers back through the centuries to chronicle the intrepid explorations of scientists and adventurers who studied the transits of Venus in the quest for scientific understanding Maps tables      [Hidden Realms, Lost Civilizations, and Beings from Other Worlds](#) Jerome Clark,2010-06-01 The secrets of mystical and legendary places revealed Have you ever wondered about mythical and legendary worlds such as the lost continent of Atlantis Have you ever heard of Mu and the Lemurians who some say still exist among us Respected researcher of unexplained phenomena Jerome Clark provides a comprehensive and trustworthy look at ancient mysteries fictional fantasy lands and extraterrestrial civilizations in his book Hidden Realms Lost Civilizations and Beings from Other Worlds Claims of supernatural realms parallel worlds and legendary lost civilizations are put to the test in this well researched guide to the unexplained Firsthand accounts and historical documents are explored and in depth coverage is provided on the mysteries of imagination culture perception consciousness and more Beliefs doctrines experiences and places are described and explored in this truly comprehensive guide to the wacky weird and otherworldly including The hollow earth populated by a rich natural world and inhabited by an advanced civilization The amazing powers of psychic healer Edward Cayce who gained healing and prophetic abilities by connecting with The Source Encounters with peoples of the alternate solar system and the amazing worlds of Meton Lanulos Nibiru Clarion Maldek and Kazik Richard S Shaver s personal experiences in an underground hell replete with demons and ghouls The evil plots of the Snake people to destroy our planet Witnesses testimony of meeting fairies goblins and other mythical folk Ancient Celtic seers Life on Mars and encounters with Martians Alien worlds Parallel universes Mystery airships And much more With many photos illustrations and other graphics this tome is richly illustrated and its helpful bibliography and extensive index add to

System itself Some of the rarest and most wonderful shadows of all are those cast onto Earth by the lovely Evening Star Venus as it goes between the Earth and the Sun These majestic transits of Venus occur at most two in a century after the 2012 transit there is not a chance to observe this phenomenon until 2117 while the more common sweep of a total solar eclipse creates one of the most dramatic and awe inspiring events of nature Though it may have once been a source of consternation or dread solar eclipses now lead thousands of amateur astronomers and eclipse chasers to travel the globe in order to experience the dramatic view under totality These phenomena are among the most spectacular available to observers and are given their full due in Westfall and Sheehan s comprehensive study     **AAAS Science Book List, 1978-1986** Kathryn Wolff, Susan M.
