The Moral Motive Of Man:

The Moral Skeptic Anita M. Superson, 2009-03-13 Anita Superson challenges the traditional picture of the skeptic who asks Why be moral While holding that the skeptic's position is important she builds an argument against it by understanding it more deeply and then shows what it would take to successfully defeat it Superson argues that we must defeat not only the action skeptic but the disposition skeptic who denies that being morally disposed is rationally required and the motive skeptic who believes that merely going through the motions in acting morally is rationally permissible We also have to address the amoralist who is not moved by moral reasons he recognizes Superson argues for expanding the skeptic's position from self interest to privilege to include morally unjustified behavior targeting disenfranchised social groups as well as revising the traditional expected utility model to exclude desires deformed by patriarchy as irrational Lastly she argues that the challenge can be answered if it can be shown that it is in an important way inconsistent and therefore irrational to privilege oneself over others The Moral Skeptic makes an important contribution to both metaethics moral theory and feminist philosophy and brings feminist thinking into the larger discussion of the skeptical challenge

An Analysis of Human Motive Frank Carrel, 1905 *The Morality of Punishment (Routledge Revivals)* Alfred C Ewing, 2013-02-01 First published in 1929 this book explores the crucial ethical question of the objects and the justification of punishment Dr A C Ewing considers both the retributive theory and the deterrent theory on the subject whilst remaining commendably unprejudiced The book examines the views which emphasize the reformation of the offender and the education of the community as objects of punishment It also deals with a theory of reward as a compliment to a theory of punishment Dr Ewing's treatment of the topics is philosophical yet he takes in to account the practical considerations that should determine the nature and the amount of the punishment to be inflicted in different types of cases This book will be of great interest to students of philosophy teachers and those who are interested in the concrete problems of punishment by the state It is an original contribution to the study of a subject of great theoretical and practical importance

Kant's Theory Of Moral Motivation Daniel Guevara, 2019-03-01 This book offers an account of Kant's theory of moral motivation that comprehends the most challenging and controversial aspects of Kant's theory of the will and human moral motivational psychology It argues for a new approach to the question about the purity of the Kantian moral motive

Divine Selection or The Survival of the Useful George Henry Dole, 2020-12-08 In *Divine Selection or The Survival of the Useful* George Henry Dole explores the intricate interplay between evolution and natural theology positing that the processes of selection serve a divine purpose in the shaping of life Dole's literary style marries scientific inquiry with philosophical reflections crafting a narrative that is both erudite and engaging This work emerges from the broader intellectual milieu of the late 19th century when Darwinian theories of evolution were beginning to challenge established religious paradigms prompting a reevaluation of the relationship between science and spirituality George Henry Dole a prominent figure in American philosophy and a committed advocate of transcendentalism

draws on a rich tapestry of religious thought and scientific understanding in his examination of nature's selective processes. His background in both philosophy and theology informs his nuanced perspective, allowing him to navigate the complexities of faith and reason with remarkable clarity. Dole's unique stance on divine involvement in evolutionary mechanisms reflects his desire to reconcile seemingly divergent worldviews, emphasizing the significance of purpose in a universe governed by chance. This thought-provoking text is a must-read for anyone fascinated by the dialogue between science and religion. Dole's ability to articulate a vision where faith and scientific understanding coexist invites readers to contemplate profound questions about existence, purpose, and the natural world. As such, it is not only a significant contribution to the fields of philosophy and theology but also an engaging inquiry for general readers interested in the intersection of these domains.

The Origin and Growth of the Moral Instinct Alexander Sutherland, 1898 **The American Journal of Sociology**
Albion W. Small, Ellsworth Faris, Ernest Watson Burgess, Herbert Blumer, 1897 Established in 1895 as the first U.S. scholarly journal in its field, *AJS* remains a leading voice for analysis and research in the social sciences, presenting work on the theory, methods, practice, and history of sociology. *AJS* also seeks the application of perspectives from other social sciences and publishes papers by psychologists, anthropologists, statisticians, economists, educators, historians, and political scientists.

The Morality of Punishment Alfred Ewing, 2013-11-17 First published in 1929, this book explores the crucial ethical question of the objects and the justification of punishment. Dr. A. C. Ewing considers both the retributive theory and the deterrent theory on the subject, whilst remaining commendably unprejudiced. The book examines the views which emphasize the reformation of the offender and the education of the community as objects of punishment. It also deals with a theory of reward as a complement to a theory of punishment. Dr. Ewing's treatment of the topics is philosophical, yet he takes into account the practical considerations that should determine the nature and the amount of the punishment to be inflicted in different types of cases. This book will be of great interest to students of philosophy, teachers, and those who are interested in the concrete problems of punishment by the state. It is an original contribution to the study of a subject of great theoretical and practical importance.
