The Morality Gap:

Who Says It's Wrong?: Closing the Morality Gap in Public Education , The Morality Gap Mark Evans,1976

The Morality Gap Erwin W Lutzer,1972-01-01 With the conviction that the gap between traditional morality and the avant garde approach is widening Erwin W Lutzer offers this precise easy to understand and knowledgeable critique of situation ethics This presentation adds new insights to the discussion of morality and the ethic of love Lutzer pinpoints the fallacies of the situationalist s philosophy and offers a biblical alternative that clearly recognizes and deals with moral conflicts

Moral Passion and Christian Ethics Robin Gill,2017-03-06 In this book Robin Gill argues that moral passion and rational ethical deliberation are not enemies and that moral passion often lurks behind many apparently rational ethical commitments He also contends that though moral passion is a key component of truly selfless moral action without rational ethical deliberation it can also be extremely dangerous Gill maintains that a reanalysis of moral passion is overdue He inspects the gap between the purely rational accounts of ethics provided by some moral philosophers and the normative positions that they espouse and or the moral actions that they pursue He also contends that Christian ethicists have not been adept at identifying their own implicit moral passion or at explaining why it is that doctrinal positions generate passionately held moral conclusions Using a range of disciplines including cognitive science and moral psychology alongside the more usual disciplines of moral philosophy and religious ethics Gill also makes links with moral passion in other world faith traditions

The Situational Mentor Gill Lane,2016-02-24 Because the mentoring process involves a number of distinct stages a wide range of skills are needed throughout the process and these skills are situational In other words a skilled mentor understands the principles of mentoring but is also able to use appropriate skills according to the person with whom they are working and the stage they have reached in the relationship In addition different types of mentoring programme will demand a skills set particular to each As with many other areas of development a mix of the theoretical and the practical is needed to ensure that programmes and relationships achieve their potential In The Situational Mentor An International Review of Competences and Capabilities in Mentoring David Clutterbuck and Gill Lane have brought together contributions from leading international academics and practitioners to define the key skills involved in mentoring and explore how these may be tailored to ensure a successful outcome in all instances

God's Command John E. Hare,2015-10-29 This work focuses on divine command and in particular the theory that what makes something obligatory is that God commands it and what makes something wrong is that God commands us not to do it Focusing on the Abrahamic faiths eminent scholar John E Hare explains that two experiences have had to be integrated The first is that God tells us to do something or not to do something The second is that we have to work out ourselves what to do and what not to do The difficulty has come in establishing the proper relation between them In Christian reflection on this two main traditions have emerged divine command theory and natural law theory Hare successfully defends a version of divine command theory but also shows that there is considerable overlap with some versions of natural law theory He engages with a number of Christian theologians particularly Karl Barth and extends into a discussion of divine command within Judaism and Islam The work concludes by examining recent work in evolutionary psychology and argues that thinking of our moral obligations as produced by divine command offers us some help in seeing how a moral conscience could develop in a way that is evolutionarily stable

Moral Arguments for Universal Health Care R. Paul Olson, 2012-02-06 Health care reform is always about more than morality and values but if it lacks a moral foundation it will not stand the test of time Dr Olson provides a moral foundation expressed in eight standards derived from his study of ethics systems theory and health policy research From these normative standards he derives a vision of universal health care as both a public policy of protecting and promoting the health of an entire population and a system for organizing financing and delivering high quality care which is affordable and accessible to everyone based on their need Universal health care is financed fairly to ensure sustainability through shared responsibility with personal choice of health care providers and or health care plans This unifying vision for health care reform is pluralistic with respect to the design of systems to implement it The author provides several moral arguments from divergent ethical theories which converge to support his vision of universal health care and its specific elements In the process he illustrates how to reason to moral conclusions based on clear thinking about both values and relevant facts He also shows why and how ethical discourse is both relevant and necessary to the formulation implementation and evaluation of health care policy Discussion of the controversy over medically necessary care and an ethical analysis of the Affordable Care Act are unique features of this book

From Morality to Metaphysics Angus Ritchie, 2012-11-22 From Morality to Metaphysics offers an argument for the existence of God based on our most fundamental moral beliefs Angus Ritchie engages with a range of the most significant secular moral philosophers of our time and argues that they all face a common difficulty which only theism can overcome The book begins with a defence of the deliberative indispensability of moral realism arguing that the practical deliberation human beings engage in on a daily basis only makes sense if they take themselves to be aiming at an objective truth Furthermore when humans engage in practical deliberation they necessarily take their processes of reasoning to have some ability to track the truth Ritchie's central argument builds on this claim to assert that only theism can adequately

explain our capacity for knowledge of objective moral truths He demonstrates that we need an explanation as well as a justification of these cognitive capacities Evolutionary biology is not able to generate the kind of explanation which is required and in consequence all secular philosophical accounts are forced either to abandon moral objectivism or to render the human capacity for moral knowledge inexplicable This case is illustrated with discussions of a wide range of moral philosophers including Simon Blackburn Thomas Scanlon Philippa Foot and John McDowell Ritchie concludes by arguing that only purposive accounts of the universe such as theism and Platonism can account for human moral knowledge Among such purposive accounts From Morality to Metaphysics makes the case for theism as the most satisfying intelligible explanation of our cognitive capacities **Faithful Imagination in the Academy** Janel M. Curry,Ronald A. Wells,2008-01-01 Wells and Curry have brought contributions from various disciplines under one theme in an attempt to answer one question what is the appropriate use of religious commitments by scholars trying to do intellectual work that would appeal to academic colleagues

Schopenhauer, Religion and Morality Gerard Mannion,2017-03-02 This work challenges the textbook assessment of Schopenhauer as militant atheist and absolute pessimist In examining Schopenhauer s grappling with religion theology and Kant s moral philosophy Mannion suggests we can actually discern a religious humility in method in Schopenhauer s work seen most clearly in his ethics of compassion and his doctrine of salvation Given Schopenhauer s opinion of religion as the metaphysics of the people his utilisation of and affinity with many religious ideas and doctrines and the culmination of his philosophy in a doctrine of salvation that ends in the mystical Mannion suggests that Schopenhauer s philosophy is an explanatory hypothesis which functionally resembles religious belief systems in many ways Mannion further argues that Schopenhauer cannot claim to have gone any further than such religious systems in discerning the true nature of ultimate reality for he admits that they also end in the mystical beyond which we must remain silent Indeed Schopenhauer offers an interpretation as opposed to outright rejection of religion and his system gains the coherence that it does through being parasitic upon religious thought itself Given current debates between theologians and philosophers in relation to postmodernity and postmodern thought this book illustrates that Schopenhauer should be a key figure in such debates
