attack on Hiroshima Aside from changing the course of history that night was also one of great shock and personal defeat for the physicists they were under the assumption that they alone had discovered nuclear fission This is the story of Nazi Germany s hunt for a nuclear bomb It is a tale of the genius and guilt of lauded respected scientists *Encounters in Magnetic Resonances* Nicolaas Bloembergen,1996 This book presents a selection of papers written by Nicolaas Bloembergen and his associates during the years 1946 1962 on the subjects of nuclear magnetic relaxation paramagnetic relaxation and masers and magnetic resonance spectroscopy of solids The volume begins with autobiographical notes to provide a personal historical background Each paper is preceded by commentary with additional information regarding the early development of magnetic resonance in condensed matter A reproduction of his Ph D thesis Nuclear Magnetic Relaxation Leiden 1948 is included in this volume **The Minnesota Lectures on Extragalactic Neutral Hydrogen** Evan David Skillman,1996

Truth, Grace, and Security Bruno Corduan,2012-02-22 This book contains two stories but the first one is nested in the second one The first part is Bruno Corduan s short autobiography which begins with him as a boy in a family of rather limited means growing up in Germany during the Nazi era Having come to trust Christ at an early age and carrying no illusions about the Nazis or their opposition to biblical Christianity and those who practiced it one might wonder with what anxieties and uncertainties this boy must be struggling particularly as he gets old enough to be compelled into military service The surprising answer is none because he knows himself to be guided by God who will protect him physically as well as spiritually This unreserved trust becomes palpable in a number of instances that are worthy of being deemed miracles As Bruno continues his life into adulthood in the new Germany he never ceases to experience the guidance of God Having grown up in poverty we find him decades later as a diplomat for the German government and for NATO negotiating multimillion dollar contracts having achieved greater success than anyone could have predicted Still Bruno never lost sight of who really was in charge of his life Thus simultaneous with his official duties we always find him actively engaged in promoting the work of the Lord He poured his life into this calling as much as into his professional vocation serving as pastor teacher leader and even church founder And thus we come to the second story This one is much larger cosmic in size and Bruno sees his life as just one small instance thereof In fact when he finally consented to write out the story of his life at age eighty two he would only do so if he could also include this much larger story namely the history of how God reached down to earth to establish a relationship with human beings through the life and death of his Son What is it that makes it possible for someone to lead a life such as Bruno s It is not human energy What he insists on throughout his exposition is that neither is it piety or religiosity It is the work of God who will awaken all people who believe in him from spiritual death and give them a life in which he will demonstrate that he is indeed the gracious and sovereign Lord of the universe In short the first part of this book is Bruno Corduan s autobiography The second part is his exposition of the gospel and of Christianity in which he is always reminding us that our salvation and walk with God are the consequences of God s gracious work and not of our own religious efforts

Encounters In Magnetic Resonances: Selected Papers Of Nicolaas Bloembergen (With Commentary) Nicolaas Bloembergen, 1996-03-14 This book presents a selection of papers written by Nicolaas Bloembergen and his associates during the years 1946-1962 on the subjects of nuclear magnetic relaxation, paramagnetic relaxation, masers, and magnetic resonance spectroscopy of solids. The volume begins with autobiographical notes to provide a personal historical background. Each paper is preceded by commentary with additional information regarding the early development of magnetic resonance in condensed matter. A reproduction of his Ph.D. thesis, Nuclear Magnetic Relaxation, Leiden, 1948, is included in this volume.

No Hamlets Andreas Höfele, 2016-07-14 No Hamlets is the first critical account of the role of Shakespeare in the intellectual tradition of the political right in Germany from the founding of the Empire in 1871 to the Bonn Republic of the Cold War era. In this sustained study, Andreas Höfele begins with Friedrich Nietzsche and follows the rightist engagement with Shakespeare to the poet Stefan George and his circle, including Ernst Kantorowicz, and the literary efforts of the young Joseph Goebbels during the Weimar Republic, continuing with the Shakespeare debate in the Third Reich and its aftermath in the controversy over inner emigration, and concluding with Carl Schmitt's Shakespeare writings of the 1950s. Central to this enquiry is the identification of Germany and more specifically German intellectuals with Hamlet. The special relationship of Germany with Shakespeare found highly personal and at the same time highly political expression in this recurring identification and in its denial. But Hamlet is not the only Shakespearean character with strong appeal. Carl Schmitt's largely still unpublished diaries of the 1920s reveal an obsessive engagement with Othello, which has never before been examined. Interest in German philosophy and political thought has increased in recent Shakespeare studies. No Hamlets brings historical depth to this international discussion, illuminating the constellations that shaped and were shaped by specific appropriations of Shakespeare. Höfele shows how individual engagements with Shakespeare and a whole strand of Shakespeare reception were embedded in German history from the 1870s to the 1950s, and eventually, in 1989, the year of German reunification.
