The Miracle Years:

The Miracle Years Hanna Schissler, 2020-12-08 Stereotypical descriptions showcase West Germany as an economic miracle or cast it in the narrow terms of Cold War politics Such depictions neglect how material hardship preceded success and how a fascist past and communist sibling complicated the country's image as a bastion of democracy Even more disappointing they brush over a rich and variegated cultural history That history is told here by leading scholars of German history literature and film in what is destined to become the volume on postwar West German culture and society In it we read about the lives of real people from German children fathered by black Occupation soldiers to communist activists from surviving Jews to Turkish guest workers from young hoodlums to middle class mothers We learn how they experienced and represented the institutions and social forces that shaped their lives and defined the wider culture We see how two generations of West Germans came to terms not only with war guilt division from East Germany and the Angst of nuclear threat but also with changing gender relations the Americanization of popular culture and the rise of conspicuous consumption Individually these essays peer into fascinating overlooked corners of German life Together they tell what it really meant to live in West Germany in the 1950s and 1960s In addition to the editor the contributors are Volker R Berghahn Frank Biess Heide Fehrenbach Michael Geyer Elizabeth Heineman Ulrich Herbert Maria Hahn Karin Hunn Kaspar Maase Richard McCormick Robert G Moeller Lutz Niethammer Uta G Poiger Diethelm Prowe Frank Stern Arnold Sywottek Frank Trommler Eric D Weitz Juliane Wetzel and Dorothee Wierling

Nature of the Miracle Years Sandra Chaney, 2008-05-01 After 1945 those responsible for conservation in Germany resumed their work with a relatively high degree of continuity as far as laws and personnel were concerned Yet conservationists soon found they had little choice but to modernize their views and practices in the challenging postwar context Forced to change by necessity those involved in state sponsored conservation institutionalized and professionalized their efforts while several private groups became more confrontational in their message and tactics Through their steady and often conservative presence within the mainstream of West German society conservationists ensured that by 1970 the map of the country was dotted with hundreds of reserves dozens of nature parks and one national park In doing so they assured themselves a strong position to participate in rather than be excluded from the left leaning environmental movement of the 1970s

The Miracle Years Hanna Schissler, 2001 Exploring postwar German history literature and film this text examines the lives of real people to learn how they experienced and represented the institutions and social forces that shaped their lives and defined the wider culture

Power and the People Eleonore C. M. Breuning, Dr. Jill Lewis, Gareth Pritchard, 2005 This book covers various aspects of the social history of politics on both sides of the Iron Curtain in the period 1945 to 1956 The contributors come from a range of countries Austria Germany Hungary Slovakia and the United Kingdom and comprise a mixture of established historians and younger scholars engaged in pioneering research The individual chapters are organised into four sections dealing with workers ethnic and linguistic

minorities youth and women In order to enhance the comparative character of the volume the four chapters contained in each section consider the position of these social groups in respectively West Germany East Germany Austria and either Czechoslovakia or Hungary Major themes include the absence of popular revolutions in the aftermath of World War Two the re imposition of social control by post war elites the attempt to restore pre war gender relations and the failure of Communist parties to win popular support The chosen time frame saw most of the decisive developments which set the pattern for the remaining Cold War period and is therefore of key importance for any student of this topic

Threatened Masculinity from British Fiction to Cold War German Cinema Joseph Willis, 2019-05-30 The impact of the Cold War on German male identities can be seen in the nation's cinematic search for a masculine paradigm that rejected the fate centered value system of its National Socialist past while also recognizing that German males once again had become victims of fate and fatalism but now within the value system of the Soviet and American hegemonies that determined the fate of Cold War Germany and Central Europe This monograph is the first to demonstrate that this Cold War cinematic search sought out a meaningful masculine paradigm through film adaptations of late Victorian and Edwardian male writers who likewise sought a means of self determination within a hegemonic structure that often left few opportunities for personal agency In contrast to the scholarly practice of exploring categories of modern masculinity such as Victorian imperialist manliness or German Cold War male identity as distinct from each other this monograph offers an important comparative corrective that brings forward an extremely influential century long trajectory of threatened masculinity For German Cold War masculinity lessons were to be learned from history namely from late Victorian and Edwardian models of manliness Cold War Germans like the Victorians before them had to confront the unknowns of a new world without fear or hesitation In a Cold War mentality where nuclear technology and geographic distance had trumped face to face confrontation between East and West Cold War German masculinity sought alternatives to the insanity of mutual nuclear destruction by choosing not just to confront threats but to resolve threats directly through personal agency and self determination

Latin American Political Economy Jonathan Hartlyn, 2019-03-05 This book considers the historical and contemporary determinants of the financial crisis facing Latin America from a political economy perspective and compares the effects of and responses to the crisis in a number of countries It discusses the internal policy errors that led to financial blow ups

Coming of Age Martin Kalb, 2016-05-01 In the lean and anxious years following World War II Munich society became obsessed with the moral condition of its youth Initially born of the economic and social disruption of the war years a preoccupation with juvenile delinquency progressed into a full blown panic over the hypothetical threat that young men and women posed to postwar stability As Martin Kalb shows in this fascinating study constructs like the rowdy young boy and the sexually deviant girl served as proxies for the diffuse fears of adult society while allowing authorities ranging from local institutions to the U S military government to strengthen forms of social control

French Intellectuals Against the Left Michael Scott Christofferson, 2004

Remade in America Jim Rohwer,2001-03-15 In a stunning rebuke to a large group of naysayers Jim Rohwer convincingly argues that the Asian financial crisis of 1997 1998 was not a turn for the worse rather it was short lived and helped rid Asian markets of many of the problems that were holding it back Now while most analysts go wild over the American economy Rohwer provides the key insights into why America is due for a slowdown while Asia is poised for tremendous growth and opportunity Jim Rohwer has long experience in Asia as both a journalist and a business executive The highly informed account in *Remade in America* comes from his own on the ground observation and analysis as well as knowing all the major players in business government and the media in both America and Asia Telling in depth interviews with people ranging from Lee Kuan Yew the former prime minister of Singapore and Jack Welch the CEO of General Electric result in deep insights into Asia s great potential The future of Asia is as much about the United States as it is about Asia for the forces that revolutionized the American economy in the last twenty years provide the clues for what is to come in Asia The key to Asian growth is understanding how Asian companies have learned from the strengths of both American and Asian business models *Remade in America* clearly charts how Asian industries have started managing themselves based on American standards of corporate technological and economic performance that began to be adopted in the late 1990s while incorporating their own strengths of cooperative corporate and social organization Asia is

ideally suited to take advantage of the Internet revolution and we are only now starting to see its enormous potential in this area Rohwer's insightful analysis of Japan China Taiwan South Korea and Southeast Asia shows how as these countries start to combine the ruthlessly efficient market democracy and accountability that America pioneered with the Asian domination of dispersed manufacturing and assembly of components there will be major opportunities both for American corporations and for investors In addition technology will not only enable Asian economies to improve on their traditional strengths it will also help Asia greatly improve its traditional poor performance in services and distribution Remade in America is a provocative and useful book not only for those with direct business interests in Asia but also for readers who want an informed look at this dynamic and important part of the world There will be a new Asia Inc one in which such matters as finance and technology will be handled in an American way while people will be managed along Asian lines in their interactions a powerful combination that we ignore at our peril **Global Television Formats** Sharon Shahaf,Tasha Oren,2013-06-17

Global Television Formats aims to revise the place of the global in television studies The essays gathered here explore the diversity of global programming and approaches and ask how to theorize contemporary global formats and thus re shape our understanding of television as at once a shared global and specific local text an economic system a socio political institution and a popular practice The contributors explore a wide array of television programming from the Middle East Western and Eastern Europe South Asia North America Latin America and Brazil and represent a br **The Borderlands of Science**
