The Missing Planets:

The Lost Planets John Wenz, 2019-10-08 A fascinating account of the pioneering astronomer who claimed erroneously to have discovered a planet outside the solar system There are innumerable planets revolving around innumerable stars across our galaxy Between 2009 and 2018 NASA's Kepler space telescope discovered thousands of them But exoplanets planets outside the solar system appeared in science fiction before they appeared in telescopes Astronomers in the early decades of the twentieth century spent entire careers searching for planets in other stellar systems In *The Lost Planets* John Wenz offers an account of the pioneering astronomer Peter van de Kamp who was one of the first to claim discovery of exoplanets Van de Kamp working at Swarthmore College's observatory announced in 1963 that he had identified a planet around Barnard's Star the second closest star system to the Sun He cited the deviations in Barnard's star's path wobbles that suggested a large object was lurching around the star Van de Kamp became something of a celebrity appearing on a television show with Mr Wizard Don Henry but subsequent research did not support his claims Wenz describes van de Kamp's stubborn refusal to accept that he was wrong discusses the evidence found by other researchers and explains recent advances in exoplanet detection including transit radial velocity direct imaging and microlensing Van de Kamp retired from Swarthmore in 1972 and died in 1995 at 93 In 2009 Swarthmore named its new observatory the Peter van de Kamp Observatory In the 1990s astronomers discovered and confirmed the first planet outside our solar system In 2018 an exoplanet was detected around Barnard's Star not however the one van de Kamp thought he had discovered in 1963 *Dark Matter, Missing Planets and New Comets* Tom Van Flandern, 1999-01-08 Tom Van Flandern's book adds a new dimension to cosmology not only does it present a novel approach to timeless issues it stands up to the closest scientific scrutiny Even the most respected scientists today will readily admit that the Big Bang Theory is full of holes But it takes a new look like *Dark Matter Missing Planets and New Comets* to explain not only why the theory is wrong but what to substitute in its place If you are curious about such things as the nature of matter and the origin of the solar system but feel inadequately equipped to grasp what modern science has to say about such things read this book You will not get the all too common condescending attempt to water down the mysteries of modern science into a form intelligible to little non scientist you but rather a straightforward new theory logically derived in front of your eyes which challenges the roots of many of today's complex accepted paradigms yet whose essence is simple enough to be thoroughly communicated to the intelligent layman without losing it in the translation

The Missing Planets Richard Trigaux, 2001-05-01 A nowadays science fiction in the Jules Verne style on science unusual characters ecological social and spiritual concerns *Nibiru Rising, the Lost Planet of Sumerian Gods* Ryan Moorhen, 2025-08-28 Across the clay tablets of Mesopotamia a name appears like a cipher from the stars Nibiru the Planet of the Crossing To the ancients it was not merely a celestial body but a threshold a cosmic judge presiding over the rise and fall of ages From the Enuma Elish to the councils of the Anunnaki from Babylonian ziggurats to modern telescopes searching for

The Cosmic War Joseph P. Farrell, 2020-12-05 There is ample evidence across our solar system of cataclysmic and catastrophic destruction events The asteroid belt for example may be the remains of an exploded planet The known planets are scarred from incredible impacts and teeter in their orbits due to causes heretofore inadequately explained Rejecting the naturalist and materialist assumptions of catastrophism forwarded by other researchers Farrell asserts that it is time to take the ancient myths of a Cosmic War in the heavens seriously Incorporating extraterrestrial artifacts cutting edge ideas in contemporary physics and the texts of ancient myths into his argument Farrell maintains that an ancient interplanetary war was fought in our own solar system with weapons of extraordinary power and sophistication In doing so he offers a solution to an enigma that has long mystified researchers disclosing a cause of that ancient war the means by which it was waged and the real nature of the secret technology behind the ancient Tablets of Destinies It is all here folks The history of the Exploded Planet hypothesis and what mechanism can actually explode a planet The role of plasma cosmology plasma physics even plasma paleophysics and scalar physics The ancient texts telling of such destructions from Sumeria Tiamat s destruction by Marduk Egypt Edfu and the Mars connections Greece Saturn s role in the War of the Titans and the ancient Americas

composition of these objects They range in size from 33 feet to 580 miles wide and most are found in a belt between the orbits of Mars and Jupiter Covering all aspects of asteroid investigation Curtis Peebles shows how ideas about the orbiting boulders have evolved He describes how such phenomena as the Moon's craters and dinosaur extinction were gradually and by some scientists grudgingly accepted as the results of asteroid impacts He tells how a band of icy asteroids rimming the solar system first proposed as a theory in the 1940s was ignored for more than forty years until renewed interest and technological breakthroughs confirmed the existence of the Kuiper Belt Peebles also chronicles the discovery of Shoemaker Levy 9 a comet with twenty two nuclei that crashed into Jupiter in 1994 releasing many times the energy of the world's nuclear arsenal Showing how asteroid research is increasingly collaborative the book provides insights into the evolution of scientific ideas and the ebb and flow of scientific debate Hidden Realms, Lost Civilizations, and Beings from Other Worlds
