The Misuse Of Alcohol Crucial Issues In Dependence Treatment Prevention:

The Misuse of Alcohol Nick Heather, Ian H. Robertson, Phil Davies, 2023-12-01 In the 1980s the study of alcoholism was in a period of rapid change this book originally published in 1985 identifies and explores the three most controversial contemporary issues changes at the basic explanatory level in our concept of harmful drinking the undermining of our confidence that drinking behaviour can be effectively modified in the traditional context of treatment and the changes in our concept of the effective prevention of harmful drinking The authors of the book came from a variety of backgrounds but all were members of the New Directions in the Study of Alcohol Group They broadly reject the disease concept of alcoholism but as this volume shows there is still scope for vigorous debate and this book should have something of interest for all concerned with problems of alcoholism

Helping the Problem Drinker Tim Stockwell, Sue Clement, 2023-12-01 Originally published in 1987 Helping the Problem Drinker addressed the realisation that only a small proportion of problem drinkers ever contacted existing treatment agencies and that therefore a more comprehensive community oriented approach should be developed This included training of primary care health workers and the development of multidisciplinary Community Alcohol Teams At the time other community based initiatives such as self help groups for early problem drinkers and early intervention programmes in general practice and general hospitals had been implemented This book draws together what had been learned about these new developments a number of which had now been evaluated The book will still be of interest to all planners and professional staff concerned with alcohol problems both specialists and non specialists in general medicine psychiatry psychology and the social services

Handbook of Outpatient Treatment of Adults Barry A. Edelstein, Michel Hersen, M.E. Thase, 2013-06-29 During the past several decades the field of mental health care has expanded greatly This expansion has been based on greater recognition of the prevalence and treatability of mental disorders as well as the availability of a variety of forms of effective treatment Indeed throughout this period our field has witnessed the introduction and the wide spread application of specific pharmacological treatments as well as the development refinement and more broadly based availability of behavioral psychodynamic and marital and family interventions The community mental health center system has come into being and increasing numbers of mental health practitioners from the fields of psychiatry psychology social work nursing and related professional disciplines have entered clinical practice In concert with these developments powerful sociopolitical and socioeconomic forces including the deinstitutionalization movement of the late 1960s and early 1970s and the cost containment responses of the 1980s necessitated by the spiraling cost of health care have shaped the greatest area of growth in the direction of outpatient services This is particularly true of the initial assessment and treatment of nonpsychotic mental disorders which now can often be managed in ambulatory care settings Thus we decided that a handbook focusing on the outpatient treatment of mental disorders would be both timely and useful When we first began outlining the contents of this book the third edition of the American Psychiatric Association s

Diagnostic and Statistical Manual of Mental Disorders DSM III was in its fourth year of use **Alcohol, Social Work, and Helping** Stewart Collins, 2023-09-29 First published in 1990 Alcohol Social Work and Helping provides coherent and imaginative advice on how to counsel the growing number of clients whose use of alcohol causes problems. It locates intervention within societal and agency contexts and tackles such practical issues as how to work with a problem drinker which short term goals to suggest what kind of help to apply and how to assist in the event of a relapse. The contributors with backgrounds in academic, statutory and voluntary settings focus on key areas of intervention: family and group contexts and there is a chapter on the particular circumstances and needs of women. All relevant information both general and specialized is presented in a clear, easy-to-read style and is aimed at developing existing knowledge and skills. This book will be of interest to students of health, social work and sociology *Drug Abuse Treatment* Roland R. Watson, 2013-11-11 A major national goal is to improve the health of the populace while advancing our opportunities to pursue happiness. Simultaneously there are both increasing health costs and increasing demands that more be accomplished with less financial support. With the number of deaths attributable to drug abuse, especially of tobacco, in the US at about 250,000 per year, the annual cost of drug addiction is over 150 billion. Improved treatment methods can both reduce these costs and improve health by preventing the continued exposure of abusers to the toxic effects of alcohol and other drugs. This fourth volume of Drug and Alcohol Abuse Reviews focuses on the strategies currently thought best for the treatment of drugs of abuse. A variety of approaches to drug abuse treatment employ those psychosocial factors that are known to influence drug use in youth and adults. Although the main emphasis is on the treatment of illicit drug use, a major cofactor in damaging the health of drug users is nicotine/tobacco addiction, whose treatment is also reviewed. And the roles of learning and outpatient services are shown to affect treatment significantly. Thus the problems confronted and solutions used in drug abuse treatment have here been analyzed in concise reviews that deal with the evidence for today's best hypotheses and conclusions. Some emphasis is also placed on reviewing new compounds used to prevent cocaine and opioid dependence **The Psychology Of Addiction** Mary McMurran, 2003-09-02 This text provides a comprehensive overview of psychological approaches to understanding addictions. Without denying the importance of biological factors, emphasis is placed more upon social, psychological and emotional factors as is necessary to a complete understanding of addiction. Within this framework, an addiction is not limited to substance-based behaviours such as drinking alcohol, smoking or drug use. Although these important areas are covered, a wider perspective is taken to include behavioural addictions such as gambling, violence and joy riding. Finally, prevention approaches are discussed with reference to the public health model which encompasses issues relating to the agent, the host and the environment. A list of resources and references is provided for those wishing to obtain further information. Written in a jargon-free style, *The Psychology of Addiction* is aimed at students at the beginning of their courses. It should also be a valuable resource for professionals: nurses, social workers, police and probation officers and medical students who often

encounter the problems described in the book *Habits: Remaking Addiction* S. Fraser, D. Moore, H. Keane, 2014-04-25 What is addiction What does it say about us our social arrangements and our political preoccupations Where is it going as an idea and what is at stake in its ongoing production Drawing on ethnographic research interviews and media and policy texts this book traces the remaking of addiction in contemporary Western societies *Counselling Problem Drinkers* Robin Davidson, Stephen Rollnick, Ian MacEwan, 2023-12-01 How far should counselling be tailored to an individual's needs What intervention is most effective for which kind of problem drinker How can the counsellor successfully guide the client through the process of deciding to change Originally published in 1991 *Counselling Problem Drinkers* provides an illuminating and invaluable guide for the counsellor trying to help clients control their drinking Written in a clear straightforward way it offers practical but imaginative advice and places alcohol counselling firmly in context **Alcohol Problems in the Community** Larry Harrison, 2002-05-03 Community surveys reveal that about 6% of the adult male and 1% of the adult female population in England and Wales are drinking at high risk levels *Alcohol Problems in the Community* examines the implications of recent community care legislation for government policy on alcohol The first part of the book begins with a report on recent US research on the role of alcohol in the perpetration of child abuse and recent research on young people's drinking problems This is followed by a study on the prevalence of drinking problems amongst older people which has been underestimated In the second half of the book empirical evidence is presented on the particular difficulties faced by ethnic migrant and homeless groups and this emphasis on the centrality of social disadvantage leads on to a consideration of a specific social work role in the assessment and management of alcohol related problems *Alcohol Problems in the Community* is aimed at social work practitioners and students on prequalifying qualifying and postqualifying social work courses and it addresses key social work issues in relation to poverty homelessness discrimination and drinking problems **Current Issues in Clinical Psychology** Gill Edwards, 2012-12-06 Since 1980 clinical psychologists and other professionals have gathered in Merseyside each year for the Annual Merseyside Course in Clinical Psychology The aim of this annual event is to offer post qualification training and a forum for discussion in areas of current clinical interest Over the years the course has attracted national and international speakers and attenders of the highest calibre plus up to the minute reports on current research In August 1984 the course was held for the first time in the beautiful old city of Chester As always the papers were presented by leading clinicians and researchers in their respective fields once again this included several contributions from Merseyside psychologists Since 1981 the proceedings of this conference have been published as *Current Issues in Clinical Psychology* The present volume Volume 4 covers four major areas of current interest The Child and Therapy Rehabilitation Across the Specialties New Directions for Psychology and the Law and Addictive Behaviors Each of these areas must be relevant to the work of almost all clinical psychologists at various times The volume closely reflects the order and content of papers presented at the 1984 conference although it also includes one paper by Guliz Elal Lawrence written specially for this

publication The 1984 conference was widely acknowledged to be another success both academically and socially and I hope that this volume fully conveys the interesting and stimulating ideas and information enjoyed by those who attended

Alcoholism Treatment Marketing Donald Self, 2014-04-04 The annual economic burden of alcohol abuse in the United States is staggering yet the alcoholism treatment industry has been historically plagued by governmental regulations moral crusades advocacy of specific treatment approaches and a lack of marketing knowledge Here is the first focused set of research on the marketing of alcoholism treatment services The authors of this much needed volume reputable marketing and research scholars greatly expand the current base of knowledge concerning the alcohol treatment marketing subdiscipline including the referral system analyses of market potentials for providers promotional effort consultation for new providers and the evolving nature of medical services distribution systems Through in depth interviews with treatment providers referral sources and former clients of treatment facilities and in major reviews of literature on the subject *Alcoholism Treatment Marketing* presents primary research and general research findings to provide practical marketing implications

Advances in Reversal Theory M.J. Apter, J.H. Kerr, S. Murgatroyd, 1993-01-01 Explores some of the recent thinking in psychology along the lines that people are inherently inconsistent over time and that the differences within an individual are as important as the differences among individuals The 26 papers most presented at conferences since 1988 and many researchers have

Postmodernity and the Fragmentation of Welfare John Carter, 2012-10-12 Postmodern ideas have been vastly influential in the social sciences and beyond However their impact on the study of social policy has been minimal *Postmodernity and the Fragmentation of Welfare* analyses the potential for a postmodern or cultural turn in welfare as it treats postmodernity as an evolving canon from the seminal works of Baudrillard Foucault and Lyotard through to recent theories of the risk society Already disorientated by globalisation new technologies and the years of new right ascendancy welfare faces a significant challenge in the postmodern It suggests that rather than universality and state provision the new social policy will be consumerised and fragmented a welfare state of ambivalence With contributions from authors coming from a variety of fields offering very different perspectives on postmodernity and welfare *Postmodernity and the Fragmentation of Welfare* also keeps social policy's intellectual inheritance in view By exploring ways in which theorisations of postmodernity might improve understanding of welfare issues in the 1990s and assessing the relevance of theories of diversity and difference to mainstream and critical social policy traditions this book will be an essential text for all students
