Religious Education and the Challenge of Pluralism Adam B. Seligman, 2014-09-01 The essays in this volume offer a groundbreaking comparative analysis of religious education and state policies towards religious education in seven different countries and in the European Union as a whole They pose a crucial question can religious education contribute to a shared public sphere and foster solidarity across different ethnic and religious communities In many traditional societies and even in what are largely secular European societies our place in creation the meaning of good and evil and the definition of the good life virtue and moral action are all primarily addressed in religious terms It is in fact hard to come to grips with these issues without recourse to religious language traditions and frames of reference Yet religious languages and identities divide as much as unite and provide a site of contestation and strife as much as a sense of peace and belonging Not surprisingly different countries approach religious education in dramatically different ways Religious Education and the Challenge of Pluralism addresses a pervasive problem how can religious education provide a framework of meaning replete with its language of inclusion and community without at the same time drawing borders and so excluding certain individuals and communities from its terms of collective membership and belonging The authors offer in depth analysis of such pluralistic countries as Bulgaria Israel Malaysia and Turkey as well as Cyprus a country split along lines of ethno religious difference They also examine the connection between religious education and the terms of citizenship in the EU France and the USA illuminating the challenges of educating our citizenry in an age of religious resurgence and global politics **Roman**

Catechesis for the New Evangelization Brian Pedraza, 2020-06-12 Popes Francis Benedict XVI and John Paul II have called the present a time of New Evangelization for the Church and have stressed the importance of catechesis for this mission John Paul II claimed that this renewal of the Church s mission is grounded in the teachings of the Second Vatican Council Nevertheless approaches to catechesis in the conciliar and postconciliar era have varied greatly as evidenced by the shifts in catechetical practice effected by the modern catechetical movement Just as the dominant forms of theology changed from neo scholastic to anthropological approaches so too did catechesis move from catechism based approaches to more anthropological models based upon human experience In light of this context Catechesis for the New Evangelization examines the theological foundations of catechesis in the Church s understanding of divine revelation and its reception by the human person especially as found in the conciliar constitutions Dei Verbum and Gaudium et Spes After drawing norms on divine revelation from these documents it traces the history of the modern catechetical movement in order to compare this history with the conciliar norms highlighting the renewal s strengths and weaknesses These steps prepare the way for the main part of the book an examination of the anthropology of Karol Wojtya a Pope John Paul II Ultimately his anthropology provides an understanding of the person that can unite divine revelation and human experience in a way that takes what is best from the modern catechetical movement while developing the ministry in a way that can be fruitful for the New Evangelization Pedraza s book is not only an incisive look at modern catechetical history and theory It also touches upon some of the most important theological topics of the past century including the neo scholastic crisis the proper interpretation of the Council the relationship of nature and grace and the modern understanding of the imago dei with the research and competency appropriate for scholarly interest and the accessibility needed for educated practitioners in catechesis

Religious Studies, Theology, and the University Linell E. Cady, Delwin Brown, 2002-10-10 This collection explores the highly contested relationship of religious studies and theology and the place of each if any in secular institutions of higher education The founding narrative of religious studies with its sharp distinction between teaching religion and teaching about religion grows less compelling in the face of globalization and the erosion of modernism These essays take up the challenge of thinking through the identity and borders of religious studies and theology for our time Reflecting a broad range of positions the authors explore the religious secular conceptual landscape that has dominated the modern West and in the process address the revision of the academic study of religion and theology now underway *The Christian's Biggest Challenge: And Other Hard Truths Concerning Suffering* Clayton Howard Ford, 2019-04-19 Suffering whether it has come through sickness tribulation or persecution has been an integral part of the Christian lifestyle throughout Church history But it is not an integral part of the modern Western lifestyle Some would even teach that suffering should not be an integral part of the modern Christian lifestyle The Word of Faith ministers would have us believe that God wants us to be healthy and wealthy all of the time even on this earth in this lifetime These essays challenge us to look afresh at the role of suffering in whatever form it takes in the Christian s life They remind us that we Christians are called by God to suffer not only for our sake but also for the sake of others and for the sake of Christ And they remind us that no matter how long we suffer it is only temporary We have another life waiting for us These essays were written to help us to understand what the Word actually says about healing and suffering and so find the faith to endure **Religious Education as Encounter. France this essential text offers a rigorous systematic comparison of church state relations in six Western nations the United States France England Germany the Netherlands and Australia As successful and stable political democracies these countries share a commitment to protecting the religious rights of their citizens The book demonstrates however that each has taken substantially different approaches to resolving basic church state questions The authors examine both the historical roots of those differences and more recent conflicts over Islam and other religious minorities explain how contemporary church state issues are addressed and provide a framework for assessing the success of each of the six states in protecting the religious rights of its citizens using a framework based on the ideal of governmental neutrality and evenhandedness toward people of all faiths and of none Responding to the general confusion about the relationship between church and state in the West this book offers a much needed comparative analysis of a topic that is increasingly a source of political conflict The authors argue that the US conception of church state separation with its emphasis on avoiding government establishment of religion is unique among political democracies and discriminates against religious groups by denying religious organizations access to government services provided to other organizations The authors persuasively conclude that the United States can learn a great deal from other Western nations in promoting religious neutrality and the free exercise of religion
