The Modern Problems Of Electrostatics With Applications In Environment Protection:

The Modern Problems of Electrostatics with Applications in Environment Protection Ion I. Inculeț, Florin Teodor Tanăsescu, Radu Cramariuc, 2012-12-06 Among the many technological and legal efforts being made to restore our environment electrostatic technologies may well hold the solution to the cleaning of air water and soil Such technologies include non thermal plasma processing electron beam irradiation electrical discharge hybrid plasma systems The book also contains descriptions of the industrial implementation of the technology for NO_x and SO₂ removal using accelerated electrons This technique has been implemented in three plants built in China Poland and Japan Water pollution can be controlled and reduced by the use of ozone and UV irradiation Soil pollution can be reduced by electrical methods and by using electrostatics to spray agricultural pesticides Further articles cover the future of EHD systems in environmental protection new aspects of ESD research and industrial waste recycling technologies *New Horizons in Wheat and Barley Research* Prem Lal Kashyap, Vikas Gupta, Om Prakash Gupta, R. Sendhil, K. Gopalareddy, Poonam Jasrotia, Gyanendra Pratap Singh, 2022-05-06 This book discusses the research progress on pathology entomology nematology and resource management of wheat and barley crops The volume summarizes the research progress and discusses the future perspectives based on current understanding of the existing issues and advancing cutting edge technologies in the field The book aims to help in deciding future research and development agenda by devising better strategies and techniques to cultivate these crops under clean and sustainable environment Through this book an international group of leading wheat and barley researchers unveil the emerging concepts and issues related to biotic stresses and resource management and offers latest glimpses of technological needs and resource optimization in wheat and barley production system Also key topics such as frontier mechanization technologies improved precision farming techniques pluralistic extension and policy interventions for enhancing the resource efficiency and livelihood security of the farmers are explored here This book is of interest to teachers researchers molecular breeders cereal biochemists and biotechnologists policymakers and professionals working in the area of wheat and barley research food and cereal industry Also the book serves as an additional reading material for undergraduate and graduate students of agriculture and food sciences National and international agricultural scientists policy makers will also find this book to be a useful read Volume 1 of *New Horizons in Wheat and Barley Research* covers global trends breeding and quality enhancement **Industrial Plasma Technology** Yoshinobu Kawai, Hideo Ikegami, Noriyoshi Sato, Akihisa Matsuda, Kiichiro Uchino, Masayuki Kuzuya, Akira Mizuno, 2010-04-26 Clearly structured in five major sections on applications this monograph covers such hot technologies as nanotechnology solar cell technology biomedical and clinical applications and sustainability Since the topic applications and readers are highly interdisciplinary the book bridges materials science industrial chemistry physics and engineering making it a must have for researchers in industry and academia as well as those working in application oriented plasma technology **Advanced Physicochemical**

Treatment Technologies Lawrence K. Wang, Yung-Tse Hung, Nazih K. Shamas, 2007-11-10 In Advanced Physiochemical Treatment Technologies leading pollution control educators and practicing professionals describe how various combinations of different cutting edge process systems can be arranged to solve air noise and thermal pollution problems Each chapter discusses in detail the three basic forms in which pollutants and waste are manifested gas solid and liquid There is an extensive collection of design examples and case histories
