## The Moon Era:

**The Moon Era** ,1967      *Observing the Moon* Peter T. Wlasuk,2013-04-17 Why write another guide to observing the Moon That was the question I was pondering as I began this project having a fine collection of classic lunar guidebooks dating back to 1791 in my own library As a Fellow of the Royal Astronomical Society RAS member of the American Astronomical Society s Division for Planetary Sciences AAS DPS and member of the American Geophysical Union AGU I am fortunate to know many professional lunar scientists who keep me up to date with developments in lunar science contrary to public perception lunar science has definitely not stagnated since the last Apollo No 17 left the surface of the Moon in December 1972 I am also lucky to know many amateur lunar observers who like me enjoy actually looking at the Moon with telescopes and imaging it with a wide variety of devices ranging from regular 35 mm cameras to video recorders and CCD cameras My friends who study the Moon whether in their professions or just for fun gave me several reasons for doing another lunar guidebook First the last lunar observer s guide of any length was published over ten years ago and many reviewers noted that it was badly out of date even then      **Equatorie of Planetis** Price,2012-04-19 This 1955 book investigates the origins of *The Equatorie of the Planetis* a fourteenth century manuscript in the library of Peterhouse Cambridge      **Lunar Science** Yann Chemin,2019-09-04 Lunar science is in the middle of a small revolution with now many new countries sending orbiters landers and even sample return missions to the moon Additionally both governments and private companies are now more and more considering the moon as a base for solar system exploration With such an increase in attention lunar science is now encompassing several unified dimensions The first is the science of the moon itself its origin evolution and inner composition The second is how humans can live on the moon covering biology and in general the logistics of surviving there including surface mapping and in situ resource utilization      *The New Brunswick Almanac and Register* ,1850      **The Book of the Moon** Maggie Aderin-Pocock,2019-04-09 The BBC s face of space explores all things lunar in this comprehensive guide to the folklore facts and possible futures of our only natural satellite Have you ever wondered if there are seasons on the moon or if space tourism will ever become widely accessible So has Dr Maggie Aderin Pocock astronomer and host of the BBC s docuseries *The Sky at Night* In this lucidly written guide Aderin Pocock takes readers on a fascinating lunar journey Aderin Pocock begins with a basic overview unpacking everything from the moon s topography and composition to its formation and orbit around the Earth She examines beliefs held by ancient civilizations the technology that allowed for the first moon landing a brief history of moon gazing and how the moon has influenced culture throughout the years Looking to the future she delves into the pros and cons of continued space travel and exploration Throughout the book are sidebars graphs and charts to enhance the facts as well as black and white illustrations of the moon and stars      **Eclectic Magazine, and Monthly Edition of the Living Age** ,1877      [The Eclectic Magazine of Foreign Literature, Science, and Art](#) ,1877      [The Popular Science Monthly](#) ,1877      *American Annual of Photography and*
