# The Moon Year

**DISSERTATION.**

## The Moon Year:

**Moon Year** Juliet Bredon,Igor Mitrophanow,2012-11-12 First published in 2006 The Moon Year is an attempt at recording the mysterious and somewhat elusive traditions of the Chinese Juliet Bredon and Igor Mitrophanow trace their way through the intimate life of the society their religions their superstitions their philosophies and customs Only after a year s residence in China are they able to gather a much more intimate perspective on this age old civilization that has withstood the test of time Bredon and Mitrophanow attempt to unravel some of the puzzles that surround this fascinating culture through describing in detail the everyday beliefs of the Chinese people and the festivals of their Moon Calendar used as a diary of daily happenings *The Lunisolar Calendar of the Germanic Peoples* Andreas E. Zautner,2021-02-16 The Lunisolar Calendar of the Germanic Peoples Reconstruction of a bound moon calendar from ancient medieval and early modern sources *Declination, Radial Distance, and Phases of the Moon for the Years 1961 to 1971 for Use in Trajectory Considerations* Donald S. Woolston,1961 Who's Who In The Moon Brian Jones,2024-12-30 Who s Who in the Moon is aimed not only at the beginner or near beginner but also at the backyard astronomer who is perhaps experienced in other areas of observation but who has decided to spend more time considering the Moon as an alternative target The book provides a visual introduction to our closest celestial neighbor opening with an introductory section which details both with the history of lunar mapping and naming of lunar formations as well as providing useful information on observing the lunar surface and what observers can realistically expect to see when they look at the Moon with the naked eye binoculars or a small medium telescope The introductory section is followed by a lengthy series of images including not only wide field panoramic views but also a large number of more detailed images showing close up views of different areas of the Moon and featuring individual craters mountains valleys and much more Many of the individual features shown on these images are identified by name and are accompanied by biographical sketches relating to the men and women after whom they are named This is a non technical up close and personal visual look at the Earth s only natural satellite and many of the individual features scattered across its surface Rather than offering itself as a full and exhaustive guide to the lunar surface A Guide to the Moon is more of a vade mecum which enables and hopefully encourages the reader to become more acquainted with the lunar landscape on a personal level with a view to learning more about the astronomers and other scientists whose names are immortalised by having lunar features named after them Who s Who in the Moon was inspired by and is a tribute to a Memoir published by the British Astronomical Association BAA in 1938 entitled Who s Who in the Moon written by Mary Evershed the first Director of the BAA Historical Section The biographical notes in A Guide to the Moon include examples of those penned by Mary Evershed in her original publication *The Earth and the Moon* Linda T.
