## **The Moral Bankruptcy Of Western Policy Towards The East:**

*The Moral Bankruptcy of Western Policy Towards the East* Ahmet Rıza, 1988      **The Politics of Anti-Westernism in Asia** Cemil Aydin, 2007-06-29 In this rich intellectual history Cemil Aydin challenges the notion that anti Westernism in modern Asia is a political and religious reaction to the liberal and democratic values of the West Nor is anti Westernism a natural response to Western imperialism Instead by focusing on the agency and achievements of non Western intellectuals Aydin demonstrates that modern anti Western discourse grew out of the legitimacy crisis of a single Eurocentric global polity in the age of high imperialism Aydin compares Ottoman pan Islamic and Japanese pan Asian visions of world order from the middle of the nineteenth century to the end of World War II He looks at when the idea of a universal West first took root in the minds of Asian intellectuals and reformers and how it became essential in criticizing the West for violating its own standards of civilization Aydin also illustrates why these anti Western visions contributed to the decolonization process and considers their influence on the international relations of both the Ottoman and Japanese Empires during WWI and WWII The Politics of Anti Westernism in Asia offers a rare global perspective on how religious tradition and the experience of European colonialism interacted with Muslim and non Muslim discontent with globalization the international order and modernization Aydin s approach reveals the epistemological limitations of Orientalist knowledge categories especially the idea of Eastern and Western civilizations and the way in which these limitations have shaped not only the contradictions and political complicities of anti Western discourses but also contemporary interpretations of anti Western trends In moving beyond essentialist readings of this history Aydin provides a fresh understanding of the history of contemporary anti Americanism as well as the ongoing struggle to establish a legitimate and inclusive international society      **The Formation of Turkish**

**Republicanism** Banu Turnaoğlu, 2020-10-13 Turkish republicanism is commonly thought to have originated with Mustafa Kemal Atatürk and the founding of modern Turkey in 1923 and understood exclusively in terms of Kemalist ideals characterized by the principles of secularism nationalism statism and populism Banu Turnaoğlu challenges this view showing how Turkish republicanism represents the outcome of centuries of intellectual dispute in Turkey over Islamic and liberal conceptions of republicanism culminating in the victory of Kemalism in the republic s formative period Drawing on a wealth of rare archival material Turnaoğlu presents the first complete history of republican thinking in Turkey from the birth of the Ottoman state to the founding of the modern republic She shows how the Kemalists wrote Turkish history from their own perspective presenting their own version of republicanism as inevitable while disregarding the contributions of competing visions Turnaoğlu demonstrates how republicanism has roots outside the Western political experience broadening our understanding of intellectual history She reveals how the current crises in Turkish politics including the Kurdish Question democratic instability the rise of radical Islam and right wing Turkish nationalism arise from intellectual tensions left unresolved by Kemalist ideology A breathtaking work of scholarship The Formation of Turkish Republicanism offers a

strikingly new narrative of the evolution and shaping of modern Turkey      *The Great Game of Genocide* Donald Bloxham, 2005-04-28 The Great Game of Genocide addresses the origins development and aftermath of the Armenian genocide in a wide ranging reappraisal based on primary and secondary sources from all the major parties involved Rejecting the determinism of many influential studies and discarding polemics on all sides it finds its interpretation of the genocide in the interaction between the Ottoman empire in its decades of terminal decline the self interested policies of the European imperial powers and the agenda of some Armenian nationalists in and beyond Ottoman territory Particular attention is paid to the international context of the process of ethnic polarization that culminated in the massive destruction of 1912-23 and especially the obliteration of the Armenian community in 1915-16 The opening chapters of the book examine the relationship between the great power politics of the eastern question from 1774 the narrower politics of the Armenian question from the mid nineteenth century and the internal Ottoman questions of reforming the complex social and ethnic order under intense external pressure Later chapters include detailed case studies of the role of Imperial Germany during the First World War reaching conclusions markedly different to the prevailing orthodoxy of German complicity in the genocide the wartime Entente and then the uncomfortable postwar Anglo French axis and American political interest in the Middle East in the interwar period which led to a policy of refusing to recognize the genocide The book concludes by explaining the ongoing international denial of the genocide as an extension of the historical Armenian question with many of the same considerations governing modern European American Turkish interaction as existed prior to the First World War      **The Young Turks in Opposition** M. Şükrü Hanioglu, 1995 Based on wide ranging archival sources M Sukru Hanioglu's landmark work is the story of the power struggles within the CUP and its impact on twentieth century Turkish politics and culture It also provides important insights into the diplomatic relationship between the Ottoman Empire and the so called Great Powers of Europe at the turn of the century Hanioglu traces and defines the intellectual roots and ideas of the movement in the process of charting the evolution of its Weltanschauung      *They All Made Peace—What Is Peace?* Jonathan Conlin, Ozan Ozavci, 2023-07-05 An analysis of the 1923 Treaty of Lausanne from multiple historical economic and social perspectives The last of the post World War One peace settlements the 1923 Treaty of Lausanne departed from methods used in the Treaty of Versailles and took on a new peace making initiative a forced population exchange that affected one and a half million people Like its German and Austro Hungarian allies the defeated Ottoman Empire had initially been presented with a dictated peace in 1920 In just two years however the Kemalist insurgency enabled Turkey to become the first sovereign state in the Middle East while the Greeks Armenians Arabs Egyptians Kurds and other communities previously under the Ottoman Empire sought their own forms of sovereignty Featuring historical analysis from multiple perspectives *They All Made Peace What Is Peace* considers the Lausanne Treaty and its legacy Chapters investigate British Turkish and Soviet designs in the post Ottoman world situate the population exchanges relative to other peacemaking efforts and discuss the economic factors

behind the reallocation of Ottoman debt and the management of refugee flows Further chapters examine Kurdish Arab Iranian Armenian and other communities that were refused formal accreditation at Lausanne but which were still forced to live with the consequences consequences that are still emerging one hundred years on **The West** Georgios Varouxakis,2025-07-08 A comprehensive intellectual history of the idea of the West How did the West come to be used as a collective self designation signaling political and cultural commonality When did Westerners begin to refer to themselves in this way Was the idea handed down from the ancient Greeks or coined by nineteenth century imperialists Neither writes Georgios Varouxakis in *The West* his ambitious and fascinating genealogy of the idea The West was not used by Plato Cicero Locke Mill or other canonized figures of what we today call the Western tradition It was not first wielded by empire builders It gradually emerged as of the 1820s and was then Varouxakis shows decisively promoted in the 1840s by the French philosopher Auguste Comte whose political project incidentally was passionately anti imperialist The need for the use of the term the West emerged to avoid the confusing or unwanted consequences of the use of Europe The two overlapped but were not identical with the West used to differentiate from certain others within Europe as well as to include the Americas After examining the origins Varouxakis traces the many and often astonishingly surprising changes in the ways in which the West has been understood and the different intentions and consequences related to a series of these contested definitions While other theories of the West consider only particular aspects of the concept and its history if only in order to take aim at its reputation Varouxakis s analysis offers a comprehensive account that reaches to the present day exploring the multiplicity of current and not least prospective future meanings He concludes with an examination of how since 2022 definitions and membership of the West have been reworked to consider Ukraine as the evolution and redefinitions continue Cultural Entanglement in the Pre-Independence Arab World Anthony Gorman,Sarah Irving,2020-11-26 This book examines the ways in which non Arabic cultural influences interacted with the rich complex and sometimes conflictual environment of the Arab world in the pre independence era It comprises a series of 11 detailed case studies including topics such as the songs of Egyptian forced labourers in the British Army in World War I the translation and commentary of an Ottoman text in interwar Palestine and the contested use of French in the Algerian independence movement that highlight the complex interplay of colonial pressures traditional and novel art forms local and international practices notions of identity and belonging The book demonstrates how the interaction between Arabic and non Arabic cultural and intellectual production as well as influences from imperial Europe and the Islamic East have in various times and spaces inspired creative tensions which challenge binary views of East West relations and the standard imperialist colonial frameworks In this sense the volume seeks to offer a critique of both established modernising conceptions of cultural development and nationalist nativist frameworks based on the values of a specific political project Turkey and the World Sedat Laçiner,2001 **Ukraine's Foreign and Security Policy 1991-2000** Roman Wolczuk,2002-10-17 This book analyses Ukraine s relations with each of its neighbours in the

1990s It examines the degree to which these relations fitted into Ukraine's broad objective of reorienting its key political ties from East to West and assesses the extent to which Ukraine succeeded in achieving this reorientation It shows how in the early days of independence Ukraine fought off threats from Russia and Romania to its territorial integrity and how it made progress in establishing good relations with its western neighbours as a means of moving closer towards Central European sub regional and European regional organisations It also shows how the sheer breadth and depth of its economic and military ties to Russia continued to exert such a strong influence that relations with Russia dwarfed Ukraine's relations with all other neighbours resulting in a foreign and security policy which attempted to counterbalance the competing forces of East and West

*The 44th Legacy* H. H. Charles, 2021-10-07 A leader more focused on his legacy than meeting the demands of his office will fail in both This review of Barack Obama's legacy as the forty fourth president of the United States is no hymn of praise Those who support him and believe he has left an admirable legacy will sharply disagree and may even say it is motivated by prejudice and overly critical They are of course entitled to their opinions But having voted twice for his presidency in 2008 and 2012 that is not an assessment with which H H Charles can agree The impetus for undertaking this chronicle of Obama's legacy starts with the presidency of George W Bush the president who is first and foremost responsible for all the bloodshed genocide and crimes against humanity that plagues the Middle East to this day and which continues unabated into the indefinite future

**Political Restructuring in Europe** Chris Brown, 2003-09-02 Distinguished scholars of law political philosophy and international relations consider the ethical background to Europe's restructuring Including for example the rights to secession or self determination of minorities in Eastern Europe

**Race and Ethnicity in Comparative Perspective** Georgia A. Persons, 2018-04-24 Contradictory forces are at play at the close of the twentieth century There is a growing closeness of peoples fueled by old and new technologies of modern aviation digital based communications new patterns of trade and commerce and growing affluence of significant portions of the world's population Television permits individuals around the world to learn about the cultures and lifestyles of peoples of physically distant lands These developments give real meaning to the notion of a global village Peoples of the world are growing closer in new and increasingly important ways Nonetheless there are disturbing signs of a growing awareness of ethnic differences in all parts of the world the United States included and a concomitant rise in ethnic based conflicts many of them extraordinarily violent in nature Fear resentment intolerance and mistreatment of the other abound in world news accounts Not only does this phenomenon pose an interesting juxtaposition to the concept of the emergent global village but its emergence in the post cold war era internationally and the post civil rights era in the United States raises significant and compelling questions Why are such conflicts occurring now How do analysts explain these developments The essays in *Race and Ethnicity in Comparative Perspective* lucidly explore some of the complexities of the persistence and re emergence of race and ethnicity as major lines of divisiveness around the world Contributors analyze manifestations of race based movements for political

empowerment in Europe and Latin America as well as racial intolerance in these same settings Attention is also given to the conceptual complexities of multidimensional and shared cultural roots of the overlapping phenomena of ethnicity nationalism identity and ideology The book greatly informs discussions of race and ethnicity in the international context and provides an interesting perspective against which to view America's changing problem of race Race and Ethnicity in Comparative Perspective is a timely thought provoking volume that will be of immense value to ethnic studies specialists African American studies scholars political scientists historians and sociologists

*The West and the Birth of Bangladesh* Richard Pilkington, 2021-08-15 In 1971 authorities in Islamabad perpetrated mass atrocities in East Pakistan in an attempt to thwart a struggle for autonomy by terrorizing the local population into submission The West and the Birth of Bangladesh explores the decision making processes and ethical debates in Washington Ottawa and London during the crucial first few months of the crisis US president Richard Nixon and his national security advisor Henry Kissinger favoured appeasement of Islamabad The Canadian government was unwilling to hazard bilateral ties with Pakistan Under public pressure only the UK showed somewhat greater willingness to coerce Islamabad into ending its oppressive actions Richard Pilkington analyzes the interplay of US Canadian and British responses toward East Pakistan and the available policy options This insightful book reveals how even as human rights movements began to emerge in the West blinkered government actors there remained too preoccupied with protecting national interests to take firm action during the crisis

**Dirty Hands and Vicious Deeds** Samuel Totten, 2018-01-10 These original essays show how the US government repeatedly aided certain regimes as they planned and then carried out crimes against humanity and genocide What makes the collection unique and chilling is the inclusion of declassified documents generated by the US government at the time memoranda telegrams letters talking points cables discussion papers and situation reports In his introduction Totten offers a critical assessment of US foreign policy as it pertains to genocide and crimes against humanity and discusses the differences between those two terms In the chapters that follow each author presents a detailed analysis of a particular case of crimes against humanity or genocide by a foreign government against its own citizens and discusses why and how the United States government was complicit

**Changing US Foreign Policy toward India** Carina van de Wetering, 2016-10-26 This book uncovers how US India relations have changed and intensified during the administrations of Bill Clinton George Bush Jr and Barack Obama Throughout the Cold War US India relations were often distant and volatile as India mostly received attention at times of grave international crises but from the late 1990s onwards the US showed a more sustained interest in India How was this shift possible While previous scholarship has focused on the civilian nuclear deal as a turning point this book presents an alternative account for this change by analyzing how India s identity has been constructed in different terms after the Cold War It examines the underlying discourse and explains how this enables or constrains US foreign policymakers when they establish security policies with India and improve US India relations

**Alliances in Asia and Europe** Elena Atanassova-Cornelis, Yoichiro

Sato, Tom Sauer, 2023-10-10 This book explores the transformation of the American led alliances as well as of US allies responses to potential American disengagement from regional security amid the rising Russian and Chinese threats The post Cold War international order has led to three challenges for the West The first challenge was the ending of the Cold War which had served as the fundamental rationale of the US centred alliance systems in both Europe and Asia The second challenge was that while the fear of US disengagement in the post Cold War era was initially about its political willingness the relative decline of the US has gradually turned the question into that of capability And the third challenge is that for the first time since very long a war in which one of the great nuclear powers is involved takes place on European territory In Europe the immediate consequence of the war has been a strengthening of NATO In Asia and the Indo Pacific regional reactions to the war have been much more muted for the division between friends and foes remains less clear cut than in Europe The chapters in this volume bridge the dynamics in the European and Asian theatres and provide a comparative framework for examining security alignments amid the shifting strategic context of the Indo Pacific With 4 new chapters and a revised Introduction this book will be of great interest to students and researchers of Politics and International Relations Asian and European studies The other chapters were originally published in Asian Affairs
