

**“Gratitude, as it were, is the moral memory of mankind. In this respect, it differs from faithfulness by being more practical and impulsive: although it may remain, of course, something purely internal, it may yet engender new actions. It is an ideal bridge which the soul comes across again and again, so to speak, and which, upon provocations too slight to throw a new bridge to the other person, it uses to come closer to him.”**

**a Moral Decision** Steve Feldman, 2019-01-22 The notion of organizational culture has become a matter of central importance with the great increase in the size of organizations in the twentieth century and the need for managers to run them. Like morale in the military, organizational culture is the great invisible force that decides the difference between success and failure and serves as the key to organizational change, productivity, effectiveness, control, innovation, and communication. *Memory as a Moral Decision* provides a historical review of the literature on organizational culture. Its goal is to investigate the kind of world conceptualized by those who have described organizations and the kind of moral world they have in fact constructed through its ideals and images for the men and women who work in organizations. Feldman builds his analysis around a historically grounded concept of moral tradition. He demonstrates a central insight: when those who have written on organizational culture have addressed issues of ethics, they have ignored the past as a foundation to stabilize and maintain moral commitments. Instead, they have fluctuated between attempts to base ethics on executive rationality and attempts to escape the suffocating logic of rationalism. After an opening chapter defining the concept of moral tradition, Feldman focuses on early works on organizational management by Chester Barnard and Melville Dalton. These define the tension between ethical rationalism and ethical relativism. He then turns to contemporary frameworks analyzing critical organizational theory and the new institutionalism. In the final chapters, Feldman considers ethical relativism in contemporary thinking, including postmodern organization theory, the exaggerated drive for diversity, and such concepts as power, knowledge, and deconstructionism. *Memory as a Moral Decision* is unique in its understanding of organizational culture as it relates to past, present, and future systems. Its interdisciplinary approach uses the insights of sociology, psychology, and culture studies to create an invaluable framework for the study of ethics in organizations. **The Use and Abuse of Memory**

Christian Karner, 2017-09-08 Decades after the previously unimaginable horrors of the Nazi extermination camps and the dropping of nuclear bombs on Hiroshima and Nagasaki, their memories remain part of our lives. In academic and human terms, preserving awareness of this past is an ethical imperative. This volume concerns narratives about and allusions to World War II across contemporary Europe and explains why contemporary Europeans continue to be drawn to it as a template of comparison, interpretation, even prediction. This volume adds a distinctly interdisciplinary approach to the trajectories of recent academic inquiries. Historians, sociologists, anthropologists, linguists, political scientists, and area study specialists contribute wide-ranging theoretical paradigms, disciplinary frameworks, and methodological approaches. The

volume focuses on how where and to what effect World War II has been remembered The editors discuss how World War II in particular continues to be a point of reference across the political spectrum and not only in Europe It will be of interest for those interested in popular culture World War II history and national identity studies

**Neuroethics and the Scientific Revision of Common Sense** Nada Gligorov, 2016-09-23 This book is focused on the examination of the particular relationship between developments in neuroscience and commonsense concepts such as free will personal identity privacy etc which feature prominently in moral discourse In the book common sense is recast as an ever shifting repository of theories from many domains including science Utilizing this alternative characterization of common sense the book reexamines the impact of neuroscience on commonsense moral conceptions Neuroethics is one of the newest developing branches of Bioethics Topics often raised include issues of free will personal identity and the self the possible ethical implication of memory manipulation brain imaging and mind reading brain stimulation enhancement and its impacts on personal identity and brain death

**A European Memory?** Małgorzata Pakier, Bo Stråth, 2012 An examination of the role of history and memory is vital in order to better understand why the grand design of a United Europe with a common foreign policy and market yet enough diversity to allow for cultural and social differences was overwhelmingly turned down by its citizens The authors argue that this rejection of the European constitution was to a certain extent a challenge to the current historical grounding used for further integration and further demonstrates the lack of understanding by European bureaucrats of the historical complexity and divisiveness of Europe's past A critical European history is therefore urgently needed to confront and re imagine Europe not as a harmonious continent but as the outcome of violent and bloody conflicts both within Europe as well as with its Others As the authors show these dark shadows of Europe's past must be integrated and the fact that memories of Europe are contested must be accepted if any new attempts at a United Europe are to be successful

**The Moral of the Story** John H. Lockwood,1999 The problem this project attempts to solve is to develop a workable moral education in light of the clash between religious forms of moral education and U S Supreme Court decisions concerning them The concept of story and storytelling has been suggested as a unifying focus for disparate prescriptions for moral education Several recent approaches to moral storytelling have been proposed The approaches of William Bennett Nel Noddings and Herbert Kohl are among those which have attempted to combine moral education and storytelling within the last decade Bennett is identified with other theorists whose primary concern is the moral content of a story Noddings is identified as a process theorist whose primary concern is the process of moral storytelling not the content Kohl is identified as a reflection theorist whose approach challenges tradition in the hope of creating a more moral society Each one of these three approaches attempts to provide a comprehensive program of moral education but they fall short of that goal The purpose of this project then is to construct a storytelling moral education program that improves upon earlier approaches Using the three levels of moral thinking posited by R M Hare a three level approach to moral storytelling is proposed The intuitive critical and meta ethical levels of moral thinking that Hare refers to are used to frame a new three level approach to moral storytelling The three level approach combines content process and reflection into a unified prescription for moral education Thus a more comprehensive plan for moral education through storytelling is developed one that respects traditional forms of moral education while remaining within the parameters set by the U S Supreme Court

*Of Memory and Literary Form* Kyle Pivetti,2015-10-08 This book opens with a crisis of recollection In the early modern period real political traumas like civil war and regicide exacerbated what were already perceived ruptures in myths of English descent William Camden and other scholars had revealed that the facts of history could not justify the Arthurian myths nor could history itself guarantee any moment of collective origin for the English people Yet poets and playwrights concerned with the status of the emerging nation state did not respond with new material evidence Instead they turned to the literary structures that through a range of what the author calls mnemonic effects could generate the experience of a collective past As Sir Philip Sidney recognized verse depends upon the repetitions of rhyme and meter consequently poetry far exceedeth prose in the knitting up of memory These poetic and linguistic forms expose national memory as a construction at potential odds with history for memory operates like language through a series of signifiers that acquire new meaning as one rearranges and rereads them

Moving from the tragedy Gorboduc 1561 to Dryden's Absalom and Achitophel 1681 Pivetti shows how such knitting up of memory created the shared pasts that generate nationhood His work implies that memory emerges not from what actually occurred but from the forms that compose it Or to adapt the words of Paul Ricoeur we have nothing better than memory to signify that something has taken place The same is true even when that something is nationhood

**Memory and the Future** Yifat Gutman, Adam D. Brown, Amy Sodaro, 2010-10-06 For those who study memory there is a nagging concern that memory studies are inherently backward looking and that memory itself hinders efforts to move forward Unhinging memory from the past this book brings together an interdisciplinary group of prominent scholars who bring the future into the study of memory

*Theories Of Social Remembering* Misztal, Barbara, 2003-07-01 Through a synthesis of old and new theories of social remembering this book provides the first comprehensive overview of the sociology of memory This rapidly expanding field explores how representations of the past are generated maintained and reproduced through texts images sites rituals and experiences

**What Happens to History** Howard Marchitello, 2014-06-11 While the questions of ethics have become increasingly important in recent years for many fields within the humanities there has been no single volume that seeks to address the emergence of this concern with ethics across the disciplinary spectrum Given this lack in currently available critical and secondary texts and also the urgency of the issues addressed by the critics assembled here the time is right for a collection of this nature

**Autobiographical Memory and Moral Agency** Daniel Vanello, 2025-10-27 This volume brings together for the first time perspectives from philosophy and psychology to investigate the role of autobiographical memory in moral agency Autobiographical memory is the ability to recollect events in one's past as part of one's personal history Moral agency is the ability to make moral judgements act morally and have a conception of the good life Although a number of philosophers and psychologists have drawn attention to the role of autobiographical memory in moral agency there is no sustained project that brings together these different lines of inquiry into a unified research area The aim of this volume is to answer this need by bringing together leading voices in research in autobiographical memory and moral agency from both philosophy and psychology to provide a unified framework for a new interdisciplinary research area Key areas of research explored in this volume include temporal perspectives moral identity autobiographical narrative joint reminiscing the internalisation of moral value attachments and amnesia Autobiographical Memory and Moral Agency will appeal to researchers and advanced students in philosophy of mind moral philosophy philosophy of education developmental psychology and educational psychology who are interested in the role of memory in moral psychology and moral development
