Ghostwalker Leslie Patten, 2024-10 Leslie Patten had seen grizzly bears wolves coyotes deer elk and many other species in her years living next to Yellowstone National Park Yet like most visitors she had never seen a mountain lion the charismatic yet enigmatic predator also known as a cougar panther or puma She had only detected their ethereal presence on the landscape which left her pondering where they were and what they were up to After five years through her serendipitous encounters with their tracks and scat the burning question remained What is the essence of the mountain lion To understand an animal no one sees Patten conducted more than one hundred interviews with biologists conservation groups state wildlife managers houndsmen and professional trackers Slowly a picture of the lion's elusive nature emerged Ghostwalker presents a complete picture of mountain lions in the West today uncovering the intimacies of their secretive lifestyle as well as the issues they face in our changing world

The Sixth Extinction Terry Glavin, 2025-08-22 The Sixth Extinction is a haunting account of the age in which we live Ecologists are calling it the Sixth Great Extinction and the world isn't losing just its ecological legacy also vanishing is a vast human legacy of languages and our ways of living seeing and knowing Terry Glavin confirms that we are in the midst of a nearly unprecedented catastrophic vanishing of animals plants and human cultures He argues that the language of environmentalism is inadequate in describing the unraveling of the vast system in which all these extinctions are actually related And he writes that we're no longer gaining knowledge with every generation We're losing it In the face of what he describes as a dark and gathering sameness upon the Earth Glavin embarks on a global journey to meet the very things we're losing a distinct species every ten minutes a unique vegetable variety every six hours an entire language every two weeks and on the way encounters some of the world's wonderful rare things a human sized salmon in Russia a mysterious Sino-Tibetan song language a Malayan tiger the last of its kind and a strange tomato that tastes just like black cherry ice cream And he finds hope in the most unlikely places a macaw roost in Costa Rica a small village in Ireland a relic community of Norse whalers in the North Atlantic the vault beneath the Royal Botanical Garden at Kew and the throne room

of the Angh of Longwa in the eastern Himalayas A fresh narrative take on the usual doom and gloom environmentalism The Sixth Extinction draws upon zoology biology ecology anthropology and mythology to share the joys hidden within the long human struggle to conserve the world s living things Here we find hope in what s left the absolute and stunning beauty in the Earth s last cultures and creatures *Backpacker* ,1994-02 Backpacker brings the outdoors straight to the reader s doorstep inspiring and enabling them to go more places and enjoy nature more often The authority on active adventure Backpacker is the world s first GPS enabled magazine and the only magazine whose editors personally test the hiking trails camping gear and survival tips they publish Backpacker s Editors Choice Awards an industry honor recognizing design feature and product innovation has become the gold standard against which all other outdoor industry awards are measured

Encyclopedia of Cryptozoology Michael Newton,2016-10-05 On every continent and in every nation animals unrecognized by modern science are reported on a daily basis People passionately pursue these creatures the name given to their field of study is cryptozoology Coined in the 1950s the term literally means the science of hidden animals When the International Society of Cryptozoology ISC was formed in 1982 the founders declared that the branch of science is also concerned with the possible existence of known animals in areas where they are not supposed to occur either now or in the past as well as the unknown persistence of presumed extinct animals to the present time or to the recent past what makes an animal of interest to cryptology is that it is unexpected This reference work presents a flesh and blood view of cryptozoology

Here 2 744 entries are listed the majority of which each describe one specific creature or type of creature Other entries cover 742 places where unnamed cryptids are said to appear profiles of 77 groups and 112 individuals who have contributed to the field descriptions of objects and events important to the subject and essays on cryptotourism and hoaxes for example Appendices offer a timeline of zoological discoveries annotated lists of movies and television series with cryptozoological themes a list of crypto fiction titles and a list of Internet websites devoted to cryptozoology
