## **The Mouse:**

**Biology of the Mouse Histocompatibility-2 Complex** J. de Klein, 2012-12-06 Somewhere I heard a story of a bridge and a painter The bridge was enormous and was made all of metal and the painter's job was to keep it from rusting He would start at one end and slowly proceed day by day month by month toward the other end painting the bridge But no sooner would he finish with the painting than the bridge would begin to rust again The rust too would start at one end and slowly proceed toward the other end systematically destroying the painter's endeavor And so the painter would return to where he had started and begin painting again slowly proceeding toward the other end of the bridge always just one step ahead of the rust And if the story is true the painter might still be painting that bridge a modern Sisyphus During the writing of this book the story of the painter and his bridge kept coming to mind The field the book covers has been developing so rapidly that like the painter I too had to return to where I had started and fight the rust of obsolescence But unlike the painter I had a deadline to meet which constituted a point of no return And so sending off this manuscript I have no choice but to watch the fruits of my endeavor be overtaken by the rust

Reznikov, 2012-12-06 In the present work processes of cell proliferation cell death neurogenesis and gliogenesis in the mouse hippocampus were studied The mapping of distribution of hippocampal mitoses and counting of their number allowed a more precise definition of the data concerning the disposition and age reduction of proliferative sites in Ammon's horn and the dentate gyrus in the mouse As a result the following generalized scheme of development and age reduction of the germinal zones in the mouse hippocampus has been suggested 1 Ammon's horn a The ventricular zone from the beginning of formation of the hippocampus E11 until E20 b The suprafimbrial zone from E16 until P7 2 Dentate gyrus a The prime germinal zone the anlage of the dentate gyrus of Stanfield and Cowan 1979b from E15 until P3 b The proliferative zone of the hilus from P3 until P14 c The subgranular zone from P3 until adult age The adduced scheme needs some comments 1 In
