Crook, 2014-01-07 Fatigue is one of the most common problems for which people seek medical attention Why is it so widespread Through years of research Dr William G Crook discovered that chronic fatigue is often linked to the consumption of sugar and yeast along with other foods to which people can develop sensitivities Certain nutrient deficiencies too can lead to fatigue Tired So Tired presents the doctor s treatment program as well as his research on this important subject      Practical Essentials of Intensity Modulated

Radiation Therapy K.S. Clifford Chao,2013-10-18 The third edition of Intensity Modulated Radiation Therapy was written to enhance the reader's understanding of the cutting edge technology of Intensity Modulated Radiation Therapy. It is designed to both update old readers and inform new readers about the complexities and details of clinical management. This completely updated edition provides a step by step practical approach to the use of IMRT in the evaluation and treatment of cancer patients. Because of IMRT's ability to employ individually controlled beamlets, it is an extremely promising technique especially when paired with CT, PET, and/or MRI. With these improved procedures, doctors and clinicians will be able to take high resolution images of tumors while minimizing dosages to surrounding tissue. In order to focus on the most up to date IMRT techniques, the introductory chapters have been condensed to provide a brief overview of IMRT physics, mechanics, and quality assurance, and also CT and MR imaging. To help assist in clinical decision making, it provides the reader with more than 700 full color illustrations, IMRT tables, and clear straightforward descriptions that address a range of tumor types and sites including head and neck, urinary, and gynecologic cancers.

*Legal Cannabis: The Great Social Experiment* Peter M. Birkeland,2018-06-07 Colorado Washington Oregon Colorado Since 2012, nine states and DC have legalized cannabis, with more states to follow. Already a \$9.7 billion dollar industry creating hundreds of thousands of new jobs, legal cannabis is not only one of the fastest growing industries, but it is changing the dynamics of American society. Through interviews and fieldwork, Peter M. Birkeland shines a sociological lens on the relevant issues of legal cannabis and investigates the most pressing issues: Who are the cannabis industry participants? What are the costs in running a marijuana business, and how much money is generated? Who are the users of cannabis in this newly legal market? What are the challenges in creating a regulatory framework? What has happened to crime, teenage use, and the black market? Birkeland's book provides a documentary-like account of the emerging cannabis industry in Colorado, the first jurisdiction in the world to legalize cannabis cultivation, manufacturing, and retail sales. Birkeland worked with cannabis business owners, interviewed regulators, policy makers including Governor Hickenlooper, industry participants, and opponents to legalization. He attended tradeshows, symposiums, meet-ups, penetrated the black market, and visited communities that have embraced cannabis sales. Through his firsthand experience, interviews, and research, Birkeland traces the evolution of the cannabis industry from strictly illegal to legal, and he documents the challenges operators, regulators, and consumers face in the quest to carry out sales of a federally illegal product. Is cannabis legalization a short-lived social experiment, or is it ushering a new era of herbal medicine and recreational use that will transform society? The author uncovers the realities of the newly legal cannabis industry in Colorado, a litmus test for other states considering legalizing cannabis.
