Assessing Risks to Endangered and Threatened Species from Pesticides National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Ecological Risk Assessment Under FIFRA and ESA, 2013-07-20 The US Fish and Wildlife Service FWS and the National Marine Fisheries Service NMFS are responsible for protecting species that are listed as endangered or threatened under the Endangered Species Act ESA and for protecting habitats that are critical for their survival The US Environmental Protection Agency EPA is responsible for registering or reregistering pesticides under the Federal Insecticide Fungicide and Rodenticide Act FIFRA and must ensure that pesticide use does not cause any unreasonable adverse effects on the environment which is interpreted to include listed species and their critical habitats The agencies have developed their own approaches to evaluating environmental risk and their approaches differ because their legal mandates responsibilities institutional cultures and expertise differ Over the years the agencies have tried to resolve their differences but have been unsuccessful in reaching a consensus regarding their assessment approaches As a result FWS NMFS EPA and the US Department of Agriculture asked the National Research Council NRC to examine scientific and technical issues related to determining risks posed to listed species by pesticides

Specifically the NRC was asked to evaluate methods for identifying the best scientific data available to evaluate approaches for developing modeling assumptions to identify authoritative geospatial information that might be used in risk assessments to review approaches for characterizing sublethal indirect and cumulative effects to assess the scientific information available for estimating effects of mixtures and inert ingredients and to consider the use of uncertainty factors to account for gaps in data Assessing Risks to Endangered and Threatened Species from Pesticides which was prepared by the NRC Committee on Ecological Risk Assessment under FIFRA and ESA is the response to that request
