Songs in Their Heads : Music and Its Meaning in Children's Lives Patricia Shehan Campbell, Professor of Music Education, University of Washington, 1998-03-19 This book explores the musical interest and needs of children in their daily lives. Based upon their expressed thoughts and actual musicking behaviors, this text examines the songs they sing, the rhythms they make, and the roles that music plays for them. Blending standard education field experiences with ethnographic techniques, Dr Campbell demonstrates how music is personally and socially meaningful to children and what values they place on particular musical styles, songs, and functions. He explores musical behaviors in various contextual settings and presents in notated and narrative forms some of the songs in their heads, balancing music learned with music made and intentional purposeful music with natural musical behavior. *Songs in Their Heads* is a vivid and engaging book that bridges the disciplines of music education, musicology, ethnomusicology, and folklore. Designed as a text or supplemental text in a variety of music education method courses as well as a reference for music specialists and classroom teachers, this book will also appeal to parents interested in understanding and enhancing music making in their children. *Songs for Children. Children's Songs of the Southwest Lynda Buric Elliott, 2010-08 The songs in this book will engage children of all ages in singing, moving, and playing hand percussion instruments as they learn about the animals and people who live in the Southwest. The songs can be a starting point for learning about the desert, the West, native peoples, caring about the environment, and many other topics children, caregivers, and teachers can only imagine. The book also includes music teacher's pages that detail what music concepts are presented in each song. Song Stories and Songs for Children Frances Stanton Brewster, Emma A. Thomas, 1898

Nature Songs for Children, 1906 Venda Children's Songs John Blacking, 1995-06 John Blacking is widely recognized for his theoretical works *How Musical Is Man* and *The Anthropology of the Body*. This series of essays and articles on the music of the Venda people of the northern Transvaal in South Africa constitutes his major scholarly legacy. *Venda Children's Songs* presents a detailed analysis of both the music and the cultural significance of children's songs among the Venda. Among its many original contributions is the identifying of the role of melody in generating rhythm, something that distinguishes this form of music from that of Venda adults as well as from other genres of African music in general.
