The 'Too Difficult' Box Charles Clarke, 2014-06-11 HOW DO YOU SOLVE A PROBLEM LIKE BANKING DRUG REGULATION NUCLEAR DISARMAMENT PROSTITUTION PENSIONS It's no secret that a myriad of long term problems facing our society are not effectively dealt with by our current system of government indeed many are simply set aside and disappear completely from the short term political agenda Why Because they are too difficult to solve From immigration to welfare reform from climate change to media regulation the biggest issues consistently fall foul of the adversarial short termism that afflicts our political culture Too often these seemingly intractable problems find their way into the too difficult box a burial ground for all the unpopular subjects that governments and their civil servants aren't prepared to confront directly The failure to address these fundamental issues however inevitably fosters cynicism about democracy itself Former Home Secretary Charles Clarke argues that although change is difficult it is sorely needed and in some cases time is not on our side In THE TOO DIFFICULT BOX he brings together a cast of heavy hitters from the worlds of politics academia and public service including Anthony Giddens Hayden Phillips John Hutton Shirley Williams Richard Dannatt Margaret Hodge Adam Boulton Trevor Phillips Patricia Hewitt and David Blunkett to write expansively and persuasively on some of society's most insidious problems too often kicked into the long grass because of their apparent insolubility

Aquatic Predators Yves Earhart, AI, 2025-02-12 *Aquatic Predators* explores the hidden drama within freshwater ecosystems revealing them as critical habitats governed by complex predator-prey dynamics. These environments often taken for granted are home to diverse predators playing pivotal roles in maintaining ecological balance. The book reveals how predators are not merely hunters but keystone species profoundly shaping the structure and biodiversity of their communities. One insight is how the decline of these top predators can trigger cascading effects destabilizing the entire ecosystem. This work examines the impact of environmental change on these delicate systems, highlighting threats like pollution and habitat destruction. The book delves into case studies of iconic predators such as alligators, snapping turtles, and pikes, showcasing their unique hunting strategies and ecological importance. By combining detailed natural history with rigorous ecological analysis, *Aquatic Predators* bridges the gap between popular science and academic research. The book progresses from foundational ecological concepts to specific predator examples, offering a holistic view of freshwater conservation.

Alligators in B-Flat Jeff Klinkenberg, 2013-04-16 With a keen eye for detail and a lyrical style, Jeff Klinkenberg sets his sights on the contradictions that make up the Sunshine State. No one else would think to engage a professional symphony orchestra tuba player to find out whether bull gators will thunderously bellow back at a low B-flat during mating season; they do, but only to that pitch. From fishing camps and country stores to museums and libraries, Klinkenberg is forever unearthing the magic that makes Florida a place worth celebrating.
