Metaphors of Mind Brad Pasanek, 2015-07-01 A pathbreaking introduction to eighteenth century metaphors of the mind that recasts the grand narrative of the Enlightenment in terms of its tropes and figures An encyclopedic dictionary along the lines of Voltaire's classic Dictionnaire Philosophique Metaphors of Mind provides an in depth look at the myriad ways in which Enlightenment writers used figures of speech to characterize the mind Drawn from Brad Pasanek's massive online archive <http://metaphorized.net> this volume constitutes a veritable treasury of mental metaphors Dividing the book into eleven broad metaphorical categories Animals Coinage Court Empire Fetters Impressions Inhabitants Metal Mirror Rooms and Writing Pasanek maps out constellations of metaphors He frames his collection of literary excerpts in each section with a more descriptive and theoretical discussion of what he calls desultory reading a form of unsystematic perusal of writing frequently employed by Enlightenment thinkers By surveying the printed past alongside the digital present the book treats eighteenth century writing as its topic while essentially exemplifying its rhetorical approach More than an exercise in quotation this intellectual history offers illuminating readings of fragmentary literary works and confrontations with neoclassical and contemporary theories of metaphor The book's entries complicate received ideas about Locke's blank slate question M H Abrams' claims about mirrors and lamps and chart changing frequencies of metal metaphors in a moment of industrial revolution The book also responds to current anxieties about reading and the mass digitization of literature touching on recent discussions of distant reading shallow reading and surface reading Promoting critical and creative anachronism Metaphors of Mind redefines the notion of an archive in the age of Amazon and Google Books

Explaining Algorithms Using Metaphors Michal Forišek, Monika Steinová, 2013-04-09 There is a significant difference between designing a new algorithm proving its correctness and teaching it to an audience When teaching algorithms the teacher's main goal should be to convey the

underlying ideas and to help the students form correct mental models related to the algorithm This process can often be facilitated by using suitable metaphors This work provides a set of novel metaphors identified and developed as suitable tools for teaching many of the classic textbook algorithms taught in undergraduate courses worldwide Each chapter provides exercises and didactic notes for teachers based on the authors experiences when using the metaphor in a classroom setting

Metaphors: Figures of the Mind Z. Radman, 1996-12-31 This book deals with various aspects of metaphors and yet it is not only or perhaps not even primarily about metaphor itself Rather it is concerned with the argument from metaphor In other words it is about what I think we can learn from metaphor and the possible consequences of this lesson for a more adequate understanding for instance of our mental processes the possibilities and limitations of our reasoning the strictures of propositionality the cognitive effect of fictional projections and so on In this sense it is not strictly speaking a contribution to metaphorology instead it is an attempt to define the place of metaphor in the world of overall human intellectual activity exemplary thematized here in the span that ranges from problems relating to the articulation of meanings up to general issues of creativity Most of the aspects discussed therefore are examined not so much for the sake of gaining some new knowledge about metaphor work conducted in the science of metaphor is presently so huge that an extra attempt to spell out another theory of metaphor may have an inflationary effect the basic strategy of this book is to view metaphor within the complex of language usage and language competence in human thought and action and finally to see in what philosophically relevant way it improves our knowledge of ourselves Certainly by adopting this basic strategy we also simultaneously increase our knowledge of metaphors of their functions and importance
