Soul of the Tiger Jeffrey A. McNeely, Paul Spencer Sochaczewski, 1995-04-01 Anecdotes facts and observations on the role animals play in the daily life of Southeast Asian villages Images of the Wildman in Southeast Asia Gregory Forth, 2008-12-10 The book examines wildmen such as Homo floresiensis and ebu gogo images of hairy humanlike creatures known to rural villagers and other local people in Southeast Asia and elsewhere It explores the source of these representations and their status in local systems of knowledge Tigers of the World Ronald Tilson, Philip J. Nyhus, 2009-11-30 Tigers of the World Second Edition explores tiger biology ecology conservation management and the science and technology that make this possible In 1988 when the first edition was published tiger conservation was still in its infancy and two decades later there has been a revolution not only in what is known but how information about tigers is obtained and disseminated In the fast changing world of conservation there is a great need to summarize the vast and current state of the art to put this into historical perspective and to speculate in what yet remains to be done Tigers of the World Second Edition fulfills this need by bringing together in a unique way the world's leading tiger experts into one volume Despite the challenges ahead there are bright spots in this story and lessons aplenty not only for tiger specialists but large carnivore specialists conservation biologists wildlife managers natural resource policymakers and most importantly the caring public Examines the past twenty years of research from the world's leading tiger experts on biology politics and conservation Describes latest methods used to disseminate and obtain information needed for conservation and care of this species Includes coverage on genetics and ecology policy poaching and trade captive breeding and farming and the status of Asia's last wild tigers Excellent resource for grad courses in conservation biology wildlife management and veterinary programs New volume continues the classic Noyes Series in Animal Behavior Ecology Conservation and Management

Spell of the Tiger Sy Montgomery, 2009-02-15 From the author of The Soul of an Octopus and bestselling memoir The Good Good Pig a book that earned Sy Montgomery her status as one of the most celebrated wildlife writers of our time Spell of the Tiger brings readers to the Sundarbans a vast tangle of mangrove swamp and tidal delta that lies between India and Bangladesh It is the only spot on earth where tigers routinely eat people swimming silently behind small boats at night to drag away fishermen snatching honey collectors and woodcutters from the forest But unlike in other parts of Asia where tigers are rapidly being hunted to extinction tigers in the Sundarbans are revered With the skill of a naturalist and the spirit of a mystic Montgomery reveals the delicate balance of Sundarbans life explores the mix of worship and fear that offers tigers unique protection there and unlocks some surprising answers about why people at risk of becoming prey might consider their predator a god Search for the Golden Moon Bear Sy Montgomery, 2009 Montgomery takes readers on an exciting adventure as she travels Southeast Asia in search of the golden moon bear Here she chronicles the detective work and science behind tracking a new species in a different part of the world The Tiger and the Pangolin

Christopher Reed Coggins, 2002-09-30 This original and wide ranging work examines historical perceptions of nature in China and the relationship between insider and outsider state and village top down conservation policy and community autonomy After an introduction to the history of wildlife conservation and nature reserve management in China the book places recent tiger conservation efforts in the context of a two thousand year gazetteer of tiger attacks the longest running documentation of human wildlife encounters for any region in the world This record offers a unique perspective on the history of the tiger as a dynamic force in the political culture of China While the tiger has long been identified with political authority the Chinese pangolin and its earthly magic have exerted a powerful influence in the everyday lives of those working and living in the fields and forests Today the tiger and the pangolin government officials and village communities must work together closely if wildlife habitat conservation programs are to succeed Extensive fieldwork in the Meihuashan Nature Reserve and other protected areas of western Fujian have led the author to advocate a landscape ecological approach to habitat conservation By linking economic development to land use practices he makes a strong case for integrating nature conservation efforts with land tenure and other socio ecological issues in China and beyond Secrets of the Snake Charmer John C. Murphy, 2010-04-16 Note that there is a companion website for this book and it can be seen at http secretsofthesnakecharmer blogspot com Humans and snakes have an intimate and ancient relationship that often revolves around either love or hate Snakes can be seen as gods spiritual messengers symbols of fertility and guardians of resources in virtually all cultures But to those that fear them snakes are seen as venomous creatures that cannot be trusted In Secrets of the Snake Charmer John Murphy a research associate of the Division of Amphibians and Reptiles in the Field Museum of Natural History in Chicago provides an in depth twenty first century look at snakes utilizing the published research of other herpetologists as well as his own personal experiences and speculations Murphy covers a wide range of topics such as the adaptability of snakes the ways in which evolution has tinkered with snakes during the last 160 million years and the impact snakes have on the ecological communities they live in While sharing ideas about the origin of snakes rattlesnake rattles and spitting in cobras Murphy presents an innovative portrayal of snakes that proves they co evolve with their prey predators and parasites in order to fulfill a significant and novel role in the web of life Pacific Worlds Matt K. Matsuda, 2012-01-19 Essential single volume history of the Pacific region and the global interactions which define it A History of Natural **Resources in Asia** G. Bankoff, P. Boomgaard, 2007-08-20 Much has been written about the wealth of nations the history of unequal distribution and zones of affluence and deprivation within and between societies This book explores why some Asian nations are more prosperous than others through an examination of how their interaction with and utilization of resources has changed over the centuries Wildlife in Asia John Knight, 2004-07-31 Drawing on anthropological and historical data this book examines human wildlife relations in China Tibet Japan Bhutan Indonesia the Philippines Malaysia India Thailand and Vietnam The volume initially focuses on the various ways in which wild animals are exploited as a resource for food

medicine and crop picking labour before examining animals termed as pests or predators that are deemed to be harmful and dangerous Bringing together anthropologists and historians this book analyses the range variability and historical mutability of human sensibilities towards animals in Asia and will be of interest to Asianists and anthropologists alike Movements in Asia Arne Kalland, Gerard Persoon, 2013-10-31 This volume paints a general picture of the environmental situation in Asia backing it up with several case studies Two major points are made in this general picture The first is that environmental campaigns in Asia tend to have a local focus they react to very concrete problems in the immediate neighbourhood and as such usually people are engaged in a cause for practical rather than idealistic reasons Such can be seen in case studies from the volume dealing with campaigns against logging and tree plantations tourist facilities and factories and in support or defence of nature reserves This pattern is in marked contrast to the profile of the most successful Western movements in terms of fund raising at least for whom the focus is on perceived problems in distant parts of the world The second point is evidence in several of the case studies in the volume namely that environmental campaigns cannot be understood in terms of environmental issues alone Rather they should be regarded as a form of cultural critique and frequently are a form of political resistance in situations where open political action is too risky Advances in Historical Ecology William L. Balée, 2012-09-18 Ecology is an attempt to understand the reciprocal relationship between living and nonliving elements of the earth For years however the discipline either neglected the human element entirely or presumed its effect on natural ecosystems to be invariably negative Among social scientists notably in geography and anthropology efforts to address this human environment interaction have been criticized as deterministic and mechanistic Bridging the divide between social and natural sciences the contributors to this book use a more holistic perspective to explore the relationships between humans and their environment Exploring short and long term local and global change eighteen specialists in anthropology geography history ethnobiology and related disciplines present new perspectives on historical ecology A broad theoretical background on the material factors central to the field is presented such as anthropogenic fire soils and pathogens A series of regional applications of this knowledge base investigates landscape transformations over time in South America the Mississippi Delta the Great Basin Thailand and India The contributors focus on traditional societies where lands are most at risk from the incursions of complex state level societies. This book lays the groundwork for a more meaningful understanding of humankind s interaction with its biosphere Scholars and environmental policymakers alike will appreciate this new critical vocabulary for grasping biocultural phenomena An Inordinate Fondness for Beetles Paul Spencer Sochaczewski, 2012 Part travelogue part biography this book charts the discoveries of the famous naturalist explorer Alfred Russel Wallace 1823 1913 Natural Enemies John Knight, 2013-01-11 Wild animals raid crops attack livestock and sometimes threaten people Conflicts with wildlife are widespread assume a variety of forms and elicit a range of human responses Wildlife pests are frequently demonized and resisted by local communities while routinely controlled by state

authorities However to the great concern of conservationists the history of many people wildlife conflicts lies in human encroachment into wildlife territory In Natural Enemies the authors place the analytical focus on the human dimension of these conflicts an area often neglected by specialists in applied ecology and wildlife management and on their social and political contexts Case studies of specific conflicts are drawn from Africa Asia Europe and America and feature an assortment of wild animals including chimpanzees elephants wild pigs foxes bears wolves pigeons and ducks These anthropologists challenge the narrow utilitarian view of wildlife pestilence by revealing the cultural character of many of our natural enemies Their reports from the front line expose one fact human conflict with wildlife is often an expression of conflict between Primates Face to Face Agustín Fuentes, Linda D. Wolfe, 2002-01-17 As our closest evolutionary relatives nonhuman primates are integral elements in our mythologies diets and scientific paradigms yet most species now face an uncertain future through exploitation for the pet and bushmeat trades as well as progressive habitat loss New information about disease transmission dietary and economic linkage and the continuing international focus on conservation and primate research have created a surge of interest in primates and focus on the diverse interaction of human and nonhuman primates has become an important component in primatological and ethnographic studies By examining the diverse and fascinating range of relationships between humans and other primates and how this plays a critical role in conservation practice and programs Primates Face to Face disseminates the information gained from the anthropological study of nonhuman primates to the wider academic and non academic world **Partnerships for Protection** Sue Stolton, Nigel Dudley, 2014-01-02 Taking into consideration the fact that many ecosystems are under represented in protected areas of land and water and traditional management methods have often been ineffective this volume describes how improvements can be made Specifically it explores ways of ensuring that all major ecosystems are safeguarded and innovative approaches to conservation involving individuals communities companies and governments The essence of the approach taken in the text is to build partnerships with those who have a stake in the care of land and water resources **The Were-Tiger** Sir Hugh Clifford, 2019-01-01 The earliest European account of the existence of the were tiger comes from the Malacca Portuguese records British Victorian era explorers to Malaya not only recorded stories about the were tiger but told of several were tiger villages hidden deep in the jungles of Malaya These mythical shapeshifters struck fear in rural Malay society as they were able to kill their unsuspecting victims usually out of vengeance The Were Tiger was written by the renowned Malayan colonial Sir Hugh Clifford and it was originally published in 1916 It is a short story of a village s experience with a migrant Sumatran trader and a supernatural big cat that occurred in Slim Pahang Sir Hugh Clifford served as the British Resident at Pahang and later as British High Commissioner in Malaya **Paper Landscapes** P. Boomgaard, David E.F. Henley, Freek Colombijn, 2022-04-11 Too much of what has so far passed for the historical background to Indonesia's environmental problems has consisted of little more than thinly disguised backward projections of modern trends The writers in this volume

report on their own pioneer journeys into the paper landscapes of the colonial literature and archives in search of the real environmental history of Indonesia Sacred Natural Sites Bas Verschuuren, Robert Wild, Jeffrey Mcneely, Gonzalo Oviedo, 2012-06-25 Sacred Natural Sites are the world's oldest protected places This book focuses on a wide spread of both iconic and lesser known examples such as sacred groves of the Western Ghats India Sagarmatha Chomolongma Mt Everest Nepal Tibet and China the Golden Mountains of Altai Russia Holy Island of Lindisfarne UK and the sacred lakes of the Niger Delta Nigeria The book illustrates that sacred natural sites although often under threat exist within and outside formally recognised protected areas heritage sites Sacred natural sites may well be some of the last strongholds for building resilient networks of connected landscapes They also form important nodes for maintaining a dynamic socio cultural fabric in the face of global change The diverse authors bridge the gap between approaches to the conservation of cultural and biological diversity by taking into account cultural and spiritual values together with the socio economic interests of the custodian communities and other relevant stakeholders
