investigates the source of discontinuity between celestial and sublunary natures and argues that the conviction that the natural world exhibits unity without uniformity is the ultimate reason for Aristotle's claim that the heavens are made of a special body unique to them. This book presents Aristotle as a totally engaged systematic investigator whose ultimate concern was to integrate his distinct investigations into a coherent interpretation of the world we live in all the while mindful of human limitations to what can be known. Falcon reads in Aristotle the ambition of an extraordinarily curious mind and the confidence that that ambition has been largely fulfilled.

*RESULTS OF SPIRITUAL RESEARCH* Rudolf Steiner, 2022-04-26

In a previously unavailable series of talks to the general public Rudolf Steiner builds systematically lecture by lecture on the fundamentals of spiritual science from the nature of spiritual knowledge and its relationship to conventional science the path of personal development and the task of metaphysical research to specific questions on the mystery of death the meaning of fairy tales the significance of morality and the roles of individual figures in human evolution such as Leonardo da Vinci Raphael and Jacob Boehme. At the time of these presentations Steiner had already worked in Berlin for many years and thus could reckon with a regularly returning audience to whom what mattered was to enter ever more deeply into the areas of knowledge that were newly opening up to them. Marie Steiner As a consequence and through a series of inter connecting lectures whose themes are entwined with one another he was able to communicate a coherent and challenging spiritual perception of reality based on his personal research. Presented here with notes an index and an introduction by Simon Blaxland de Lange the 14 lectures include How is Spiritual Science Refuted On What Foundation is Spiritual Science Based The Tasks of Spiritual Research for both Present and Future Errors of Spiritual Research Results of Spiritual Research for Vital Questions and the Riddle of Death The World Conception of a Cultural Researcher of the Present Herman Grimm and The Legacy of the Nineteenth Century.

**Embodiment** Justin E.H. Smith, 2017-06-02 Embodiment having being in or being associated with a body is a feature of the existence of many entities perhaps even of all entities. Why entities should find themselves in this condition is the philosophical problem that concerns the present volume. The contributors to this volume shine light on a number of demanding questions that have driven reflection on embodiment throughout the history of philosophy.

Ibn Miskawayh, the Soul, and the Pursuit of Happiness John Peter Radez, 2019-10-17 Ibn Miskawayh the Soul and the Pursuit of Happiness explores the moral philosophy and context of Ibn Miskawayh 932 1030 an advocate of the intellectually cultivated life with a strong religious bent. Though not necessarily a major innovator he sought through his writings to provide a moral compass for turbulent times much like thinkers such as Petrarch 1304 1374 Pico della Mirandola 1463 1494 Francois Rabelais 1494 1553 Montesquieu 1689 1755 or more recently Mortimer Adler 1902 2001. Despite the tumultuous times in which they lived these thinkers offered the world hope through a humanism that cultivated both civic and moral character. Whether directly expressed in his moral philosophy or illustrated in the examples of renowned or notorious historical figures Miskawayh's core idea is that one's character is much easier kept than recovered. In this book

John Peter Radez shows how Miskawayh stands out not only as one of Islam's first ethicists but also one of its true intellectuals, thinker, historian, codifier of the science of adab, and a truly happy sage who represented the best of his generation's intellectual and cultural elite. Miskawayh's message of how to create lives worthy of human beings, his civic humanism, resonates today.

**Understanding Postmodern Family Therapy** Kelsey Railsback, 2024-11-29 This accessible textbook provides therapy students and practitioners with an understanding of postmodern theories, founders, and practical applications to family therapy. It introduces complex concepts in bite-sized pieces so readers can cultivate and master competent real-world applications of postmodern philosophy in therapy. Relying predominantly on primary sources, Kelsey Railsback shows how postmodernist ideas influenced the development and implementation of postmodern family therapy models focusing on collaborative dialogic practice, narrative therapy, and solution-focused brief therapy. It describes why certain therapeutic techniques developed and explains the context and history of their development. Each section begins with an introduction to the model, before moving to the philosopher and ending with the founder's application of philosophical ideas to therapy techniques. These chapters summarize prominent ideas from esteemed professionals in their fields, covering the philosophical pioneers Wittgenstein, Foucault, and Gergen, and the therapy pioneers Anderson, White, Epston, de Shazer, Berg, and more. Critically, this book demonstrates how postmodern theory can be applied in mental health practice. By the end of the book, students will be able to interweave the philosophers' founders and applications of postmodern family therapy into a comprehensive picture. To better understand their epistemology and why they are more inclined toward certain practices over others, students can utilize the included self-quizzes to deepen their understanding. Filled with etymological explanations, reflective questions, keywords, and summaries throughout, this book is designed for students and practitioners in systemic and relational therapy or related fields such as psychology, social work, and mental health counseling.

*Aristotle and New Spain* Virginia Aspe Armella, 2025-03-31 This book is a detailed exploration of the Hispanic intellectual context and the different Aristotelian traditions that prevailed until the 16th century. Through a review and contextualisation of Aristotelian thinkers and texts, it argues that a unique Aristotelian tradition was formed in New Spain. The characteristic differences of Novohispanic Aristotelianism are a consequence of five factors: contact with the autochthonous cultures of America, the impact of the colonial organisation, the influence of the Salamanca humanist tradition, the presence of the Italian Aristotelianism of Renaissance translators in the university curricula, and in the intellectual polemics of the time, and a peculiar assimilation of primitive and Old Testament Christianity in relation to indigenous people. This book analyses the works of Alonso de la Veracruz, Bartolomé de las Casas, Bernardino de Sahagún, Sor Juana Inés de la Cruz, Carlos de Sigüenza y Góngora, and Francisco Xavier Clavijero, reconsidering them in light of the history of ideas in New Spain and the contributions of Byzantine translators. It also offers a reflection on the problem of addressing Mexican colonial sources. This volume will be of interest to undergraduate and postgraduate philosophy students as well as to researchers focused on Aristotle.

The Soul's Upward Yearning Robert Spitzer, S.J., Ph.D., 2015-10-03 Western culture has been moving away from its Christian roots for several centuries but the turn from Christianity accelerated in the 20th century At the core of this decline is a loss of a sense of our own transcendence Scientific materialism has so seriously impacted our belief in human transcendence that many people find it difficult to believe in God and the human soul This anti transcendent perspective has not only cast its spell on the natural sciences psychology philosophy and literature it has also negatively impacted popular culture through the writings of Richard Dawkins Daniel Dennett and many others The warning signs of this loss of transcendence have been expressed by thinkers as diverse as Carl Jung psychiatrist Mircea Eliade historian of religion Gabriel Marcel philosopher C S Lewis and J R R Tolkien These warnings were validated by a 2004 study in the American Journal of Psychiatry which showed that the absence of religion alone was responsible for a marked increase in suicide rates sense of meaningless substance abuse separation from family and other psychiatric problems Thus the loss of transcendence is negatively affecting not only individuals sense of happiness dignity ideals virtues and destiny but also the culture Ironically the evidence for transcendence is greater today than in any other period in history The problem is this evidence has not been compiled and propagated Fr Spitzer s book provides a bright light in the midst of this cultural darkness by presenting both traditional and contemporary evidence for God and a transphysical soul from several major sources He also shows how human consciousness and intelligence is completely special and cannot be replicated by artificial intelligence or animal consciousness We are transcendent beings with souls capable of surviving bodily death self reflective beings aware of perfect truth love goodness and beauty We are beings with an unrestricted capacity to know and create science law culture art music literature and so much more The evidence reveals that we have the dignity of being created in the very image of God and if we underestimate it we will undervalue one another underlive our lives and underachieve our destiny This work is the most comprehensive treatment of human transcendence available today
