Sound And Silences:

Images, Improvisations, Sound, and Silence from 1000 to 1800 - Degree Zero Babette Hellemans, Alissa Jones Nelson, 2025-10-01 The act of drawing a line or uttering a word is often seen as integral to the process of making art This is especially obvious in music and the visual arts but applies to literature performance and other arts as well These collected essays written by scholars from diverse fields take a historical view of the richness of creation out of nothing creatio ex nihilo in order to draw out debates sometimes implicit and sometimes formally stated about the production and reproduction of cultural meaning in a period of great change and novelty between the beginnings of the medieval intellectual tradition and the imprint of the Enlightenment The authors pose the following questions Do tradition and creativity conflict with one another or are they complementary What are the tensions between composition and live performance What is the role of the audience in perceiving the object of art Are such objects fixed or flexible What about the status of the event Is the event part of creation in the sense that it disturbs the still waters of historical continuity These and other questions build on the foundation of Roland Barthes concept of Degree Zero offering new insights into what it means to create Silence, Sounds, Music Florian Freitag, Laura Katharina Mücke, Peter Niedermüller, 2025-02-20 This book examines the intersections of silence with immersive arts and experiences Silence and immersion may seem antithetical while immersion is supposedly induced by acoustic and other stimuli silence is commonly understood as the absence or opposite of sound Since the eighteenth century however silence has been established as a multifarious and polyvalent cultural concept Immersion in turn though often used as a simple all inclusive term has old and complex ontological and epistemological roots Organized into three parts this book brings critical historical and theoretical debates on silence into dialogue with different notions of immersion The 16 theoretical articles and case studies engage in discovering and questioning the continued prominence of both concepts in aesthetics culture and media Covering music film digital visual and performance art theater video games and theme parks the chapters discuss both highly canonical and rarely examined artifacts Written by scholars from Germany Austria France and Switzerland the interdisciplinary collection includes perspectives from musicology film studies cultural and media studies gender studies art history and philosophy Silence Sounds Music addresses both an academic and a wider audience It will be of interest to anyone interested in music sound immersive experiences the so called experience economy and contemporary art and culture *The Routledge Companion to Creativities in Music Education* Clint Randles, Pamela Burnard, 2022-12-30 Viewing the plurality of creativity in music as being of paramount importance to the field of music education The Routledge Companion to Creativities in Music Education provides a wide ranging survey of practice and research perspectives Bringing together philosophical and applied foundations this volume draws together an array of international contributors including leading and emerging scholars to illuminate the multiple forms creativity can take in the music classroom and how new insights from research can inform pedagogical approaches In over 50 chapters it addresses

theory practice research change initiatives community and broadening perspectives A vital resource for music education researchers practitioners and students this volume helps advance the discourse on creativities in music education

Minds on Music Michele Kaschub, Janice P. Smith, 2009-06-15 This textbook enhances preservice and practicing music educators understanding of ways to successfully engage children in music composition It offers both a rationale for the presence of composition in the music education program and a thorough review of what we know of children s compositional practices to date Minds On Music offers a solid foundation for planning and implementing composition lessons with students in grades PreK 12

Decent People Norman S. Care, 2000 In this book Norman S Care addresses the question of what it is to be a good or decent person His discussion is centered on motivation issues rather than on the content of moral principles or the imperatives of ethical theory He argues that decent people are constrained by moral emotional nature to take certain things seriously and this is part of what it means to have a moral life The background of the discussion is the world around us The world is no extension of the affluence that shields a few of us it is instead a sea of pain and despair with only small and sometimes temporary islands of stability and prosperity

Sounds of Black Switzerland Jessie Cox, 2025-01-03 Writing as a scholar composer and musician Jessie Cox foregrounds the experience of Black Swiss through sound and music in his first book Sounds of Black Switzerland Cox himself Black Swiss affirms the value of Black life through sound while critiquing anti Blackness as a cause of erasure silence and limitation He examines Swiss Nigerian composer Charles Uzor s pieces for George Floyd work by Black Swiss musicians such as DJ Ma t Ch ni re clarinetist J r mie Jolo and rapper Nativ as well as his own musical collaborations with the Lucerne Festival In these analyses Cox tackles the particularities of anti Blackness in Switzerland creating a practice of listening beyond what can be directly heard to explore the radical potential of Black thought and experience in a nation often claimed to be race free In so doing he ultimately shifts thinking about Blackness in relation to citizenship immigration laws gender kinship and belonging By listening to Black Swiss and other voices inaudible to the current world Cox theorizes new ways of practicing scholarly study and general ways of relating to others and the world

Memories and Silences Haunted by Fascism Daniela Baratieri, 2010 Fascist and colonial legacies have been determinant in shaping how Italian colonialism has been narrated in Italy till the late 1960s This book deals with the complex problem of public memory and discursive amnesia The detailed research that underpins this book makes it no longer possible to claim that after 1945 there was an absolute and traumatic silence concerning Italy s colonial occupation of North and East Africa However the abiding public use of this history confirms the existence of an extremely selective and codified memory of that past The author shows that colonial discourse persisted in historiography newspapers newsreels and film Popular culture appears intertwined with political and economic interests and the power inscribed in elite and scientific knowledge While readdressing the often mistaken historical time line that ignores that actual Italian colonial ties did not end with the

fall of Fascism but in 1960 with Somalia becoming independent this book suggests that a new post Fascist Italian identity was the crucial issue in reappraisals of a national colonial past *A Sound Word Almanac* Bernd Herzogenrath, 2023-12-14 This almanac of sound words important to artists and scholars highlights words that expand the way we speak and write about sonic experiences Why write about sound and how If sonic philosophy is the attempt to think about sound by philosophical means then a metaphilosophical debate appears almost immediately on the horizon What is called for is an understanding about sound and language but also about the preconditions of musical understanding What is at stake is the question of language and sound as well as expanding how we speak about sonic experience This almanac tackles these questions from artistic experimental and personal perspectives An assemblage of nearly 70 practitioners and theoreticians artists and scholars offer their favorite sound word These sound words are onomatopoeitical mythological practical words of personal importance to the artists and their craft words from their memory related to sound Many entries are not in English some are untranslatable and all are accompanied by a personal explanatory poetic entry These are words that have the potential to change our perspective on listening musicking thinking *Number to Sound* P. Gozza, 2013-03-09 Number 10 Sound The Musical Way 10 the Scientific Revolution is a collection of twelve essays by writers from the fields of musicology and the history of science The essays show the idea of music held by European intellectuals who lived from the second half of the 15 century to the early 17th physicians e.g. Marsilio Ficino scholars of musical theory e.g. Gioseffo Zarlino Vincenzo Galilei natural philosophers e.g. Francis Bacon Isaac Beeckman Marin Mersenne astronomers and mathematicians e.g. Johannes Kepler Galileo Galilei Together with other people of the time whom the Reader will meet in the course of the book these intellectuals share an idea of music that is far removed from the way it is commonly conceived nowadays it is the idea of music as a science whose object musical sound can be quantified and demonstrated or enquired into experimentally with the methods and instruments of modern scientific enquiry In this conception music to be heard is a complex variable structure based on few simple elements e.g. musical intervals combined according to rules and criteria which vary along with the different ages However the varieties of music created by men would not exist if they were not based on certain musical models e.g. the consonances which exist in the mind of God or are hidden in the womb of Nature which man discovers and demonstrates and finally translates into the language of sounds *Concealed Silences and Inaudible Voices in Political Thinking* Michael Freeden, 2022 This book investigates silence as a normal ubiquitous and indispensable element of political thinking theory and language It explores the diverse dimensions in which silences mould the different core features of the political as a highly flexible power resource both enabling and constraining major social practices traditions and currents Silence John Cage, 2012-01-01 John Cage is the outstanding composer of avant garde music today The Saturday Review said of him Cage possesses one of the rarest qualities of the true creator that of an original mind and whether that originality pleases irritates amuses or outrages is irrelevant He refuses to sermonize or pontificate What John Cage offers is more

refreshing more spirited much more fun a kind of carefree skinny dipping in the infinite It's what's happening now The American Record Guide There is no such thing as an empty space or an empty time There is always something to see something to hear In fact try as we may to make a silence we cannot Sounds occur whether intended or not the psychological turning in direction of those not intended seems at first to be a giving up of everything that belongs to humanity But one must see that humanity and nature not separate are in this world together that nothing was lost when everything was given away Listening to Noise and Silence Salomé Voegelin, 2010-03-31 Listening to Noise and Silence engages with the emerging practice of sound art and the concurrent development of a discourse and theory of sound In this original and challenging work Salomé Voegelin immerses the reader in concepts of listening to sound artwork and the everyday acoustic environment establishing an aesthetics and philosophy of sound and promoting the notion of a sonic sensibility A multitude of sound works are discussed by lesser known contemporary artists and composers for example Curgenvén Gasson and Federer historical figures in the field Artaud Feldman and Cage and that of contemporary canonic artists such as Janet Cardiff Bill Fontana Bernard Parmegiani and Merzbow Informed by the ideas of Adorno Merleau Ponty and others the book aims to come to a critique of sound art from its soundings rather than in relation to abstracted themes and pre-existing categories Listening to Noise and Silence broadens the discussion surrounding sound art and opens up the field for others to follow

"Silence, Music, Silent Music" Nicky Losseff, 2017-07-05 The contributions in this volume focus on the ways in which silence and music relate contemplate each other and provide new avenues for addressing and gaining understanding of various realms of human endeavour The book maps out this little explored aspect of the sonic arena with the intention of defining the breadth of scope and to introduce interdisciplinary paths of exploration as a way forward for future discourse Topics addressed include the idea of silent music in the work of English philosopher Peter Sterry and Spanish Jesuit St John of the Cross the apparently paradoxical contemplation of silence through the medium of music by Messiaen and the relationship between silence and faith the aesthetics of Susan Sontag applied to Cage's idea of silence silence as a different means of understanding musical texture ways of thinking about silences in music produced during therapy sessions as a form of communication music and silence in film including the idea that music can function as silence and the function of silence in early chant Perhaps the most all pervasive theme of the book is that of silence and nothingness music and spirituality a theme that has appeared in writings on John Cage but not in a broader sense in scholarly writing The book reveals that unexpected concepts and ways of thinking emerge from looking at sound in relation to its antithesis encompassing not just Western art traditions but the relationship between music silence the human psyche and sociological trends ultimately providing deeper understanding of the elemental places both music and silence hold within world philosophies and fundamental states of being Silence Music Silent Music will appeal to those working in the fields of musicology psychology of religion gender studies aesthetics and philosophy *A Text-book of Human Physiology* Leonard Landois, 1892 It's

Silence, Soundly John McGreal, 2016-04-21 It's Silence Soundly It's Nothing Seriously and It's Absence Presently continue The It Series published by Matador since The Book of It 2010 They constitute another stage in an artistic journey exploring the visual and audial dialectic of mark word and image that began over 25 years ago In their aesthetic form the books are a decentred trilogy united together in a new concept of The Bibliograph All three present this new aesthetic object which transcends the narrow limits of the academic bibliography The alphabetical works also share a tripartite structure and identical length The Bibliograph itself is characterised by its strategic place within each book as a whole as well as by the complex variations in meaning of the dominant motifs nothingness absence and silence which recur throughout the alphabetical entries that constitute the elements of each text It's Nothing Seriously for example addresses the amusing paradox that so much continues to be written today about nothing The aleatory character of the entries in the texts encourage the modern reader to reflect on each theme and to read them in a new way The reader is invited as well to examine their various inter-textual relations across given conventional boundaries in the arts and sciences at several levels of physical psychical social reproduction *The Etude*, 1901 A monthly journal for the musician the music student and all music lovers Ecologies of Resonance in Christian Musicking Mark Porter, 2020-09-25 Ecologies of Resonance in Christian Musicking explores a diverse range of Christian musical activity through the conceptual lens of resonance a concept rooted in the physical vibrational and sonic realm that carries with it an expansive ability to simultaneously describe personal social and spiritual realities In this book Mark Porter proposes that attention to patterns of back and forth interaction that exist in and alongside sonic activity can help to understand the dynamics of religious musicking in new ways and at the same time can provide a means for bringing diverse traditions into conversation **The 'Imagined Sound' of Australian Literature and Music** Joseph Cummins, 2019-09-20 Imagined Sound is a unique cartography of the artistic historical and political forces that have informed the post World War II representation of Australian landscapes It is the first book to formulate the unique methodology of imagined sound a new way to read and listen to literature and music that moves beyond the dominance of the visual the colonial mode of knowing controlling and imagining Australian space Emphasising sound and listening this approach draws out and re-examines the key narratives that shape and are shaped by Australian landscapes and histories stories of first contact frontier violence the explorer journey the convict experience non-Indigenous belonging Pacific identity and contemporary Indigenous Dreaming Imagined Sound offers a compelling analysis of how these narratives are reharmonised in key works of literature and music
