Whale Music David Rothenberg, 2023-02-28 The marvelous sonic world of whales from the perspective of music and science Whale song is an astonishing world of sound whose existence no one suspected before the 1960s Its discovery has forced us to confront the possibility of alien intelligence not in outer space but right here on earth Thoughtful richly detailed and deeply entertaining *Whale Music* uses the enigma of whale sounds to open up whales underwater world of sonic mystery In observing and talking with leading researchers from around the globe as they attempt to decipher undersea music Rothenberg tells the story of scientists and musicians confronting an unknown as vast as the ocean itself His search culminates in a grand attempt to make interspecies music by playing his clarinet with whales in their native habitats from Russia to Canada to Hawaii This is a revised edition of *Thousand Mile Song* originally published in 2008 The latest advances in cetacean science and interspecies communication have been incorporated into this new edition along with added photographs and color whale scores

Listening to Whales Alexandra Morton, 2008-12-30 A warm energetic memoir Publishers Weekly starred review and an impassioned study of the profound connection between humans and whales from an award winning marine researcher Morton s descriptions of the whales lives and their haunting underwater communications are so vivid that they will remain with you long after you have read the last eloquent page JANE GOODALL ONE OF THE CHRISTIAN SCIENCE MONITOR S BEST BOOKS OF THE YEAR For over three decades Alexandra Morton has been at the forefront of whale and dolphin research dedicating her life to the study of orcas also known as killer whales In *Listening to Whales* she shares spellbinding stories about her career and what she has learned from and about these

magnificent mammals While working at Marineland in California in the late 1970s Alexandra pioneered the recording of orca sounds by dropping a hydrophone into the tank of two killer whales She recorded the varied language of mating childbirth and even grief after the birth of a stillborn calf At the same time she made the startling observation that the whales were inventing wonderful synchronized movements a behavior that was soon recognized as a defining characteristic of orca society In 1984 Alexandra moved to a remote bay in British Columbia to continue her research with wild orcas Her recordings of the whales have led her to a deeper understanding of the mystery of whale echolocation the vocal communication that enables the mammals to find their way in the dark sea Affecting and surprising Listening to Whales will open your eyes anew to the wonders of the natural world *Frogs Play Cellos* Laura Lyn DiSiena, Hannah Eliot, 2014-10-07 Rock out with this book of fun facts about xylophones cymbals concerts and more Did you know that the violin contains more than 70 separate pieces of wood How about that you can tune your guitar to the sound of a dial tone because it's an A Or that the Beatles were first called the Blackjacks and then the Quarrymen Filled with tons of cool facts about musical instruments plus colorful humorous illustrations this book is sure to be a hit **The Sound of Whales** David Charles MacLean, 1996 The Sound of Whales is a lyric comedy about language our obsessive reliance upon it and how linear thought can inhibit understanding David MacLean's play has its roots in his personal experience in dealing with governmental educational and medical bureaucracies The frustration the playwright expresses toward these institutions is balanced by the love and devotion a father feels for his son The Sound of Whales is at once tender and angry intimate and universal Robert Garfat from A Director's Analysis Praise for The Sound of Whales ambitious poetic and imaginative with moments of striking honesty The Vancouver Sun draws picture after picture in its attempt to communicate the ineffable The Georgia Straight The ^AOxford Handbook of Critical Improvisation Studies, Volume 1 George E. Lewis, Benjamin Piekut, 2016-08-22 The Oxford Handbook of Critical Improvisation Studies gathers contributions from more than sixty authors pioneering new scholarly approaches to improvisation in the arts humanities social and natural sciences **Carbon Play** Robert William Falls, 2017-10-10 An insider's look at the complex inspiring and surprisingly entertaining world of international negotiations technology and diplomacy relating to the carbon industry environmental management and climate mitigation Carbon Play follows Robert Falls's unique and extraordinary journey in the worlds of academia politics and corporate big energy With a career that began in marine biology and fisheries management Robert became a respected environmental professional dealing with national energy and climate policies frequently meeting with renowned thinkers such as Freeman Dyson Arthur C Clarke David Suzuki Patrick Moore and Al Gore in a quest to deal with the gaping chasms between climate science political governance and global energy interests From his position at the crossroads of science the energy industry the environmental movement government policy and carbon trading Robert Falls has written 15 entertaining and enlightening stories that will be enjoyed by those with an interest in the environment who seek fresh perspectives and insights not normally found in books

dealing with climate change or environmental issues *Postdigital Play and Global Education* Kerry Dixon, Karin Murris, Joanne Peers, Theresa Giorza, Chanique Lawrence, 2024-09-24 *Postdigital Play and Global Education* Research is a return to a large scale international project on children's digital play Adopting postqualitative and posthumanist theories research practices are reconfigured all the way down from what counts as data tools instruments transcription research sites researchers to notions of responsibility and accountability in qualitative research Through a series of vignettes involving complex human and more than human collaborators e.g. GoPros octopus avatars diaries sackball LEGO bricks the authors challenge who and what can be playful and creative across contexts in the global north and global south The diffractive methodology enacted interrupts Western developmental notions of agency that are dominant in research involving young children The concept of postdigital offers fresh opportunities to disrupt dominant understandings of children's play Play emerges as an enigmatic and shape shifting human and more than human agential force that operates beyond digital non digital online offline binaries By attuning to race gender age and language invisible and colonising aspects of postdigital worldings the authors show how global education research can be reimaged through a posthumanist decentering of children without erasure *Postdigital Play and Global Education* puts into practice Karen Barad's agential realism but also a range of postdevelopmental and posthumanist writings from diverse fields The book will be of particular interest to researchers looking for guidance to enact agential realist and posthumanist philosophies in research involving young children **Not on My Watch** Alexandra Morton, 2021-03-23 NATIONAL BESTSELLER Alexandra Morton has been called the Jane Goodall of Canada because of her passionate thirty year fight to save British Columbia's wild salmon Her account of that fight is both inspiring in its own right and a roadmap of resistance Alexandra Morton came north from California in the early 1980s following her first love the northern resident orca In remote Echo Bay in the Broughton Archipelago she found the perfect place to settle into all she had ever dreamed of a lifetime of observing and learning what these big brained mammals are saying to each other She was lucky enough to get there just in time to witness a place of true natural abundance and learned how to thrive in the wilderness as a scientist and a single mother Then in 1989 industrial aquaculture moved into the region chasing the whales away Her fisherman neighbours asked her if she would write letters on their behalf to government explaining the damage the farms were doing to the fisheries and one thing led to another Soon Alex had shifted her scientific focus to documenting the infectious diseases and parasites that pour from the ocean farm pens of Atlantic salmon into the migration routes of wild Pacific salmon and then to proving their disastrous impact on wild salmon and the entire ecosystem of the coast Alex stood against the farms first representing her community then alone and at last as part of an uprising that built around her as ancient Indigenous governance resisted a province and a country that wouldn't obey their own court rulings She has used her science many acts of protest and the legal system in her unrelenting efforts to save wild salmon and ultimately the whales a story that reveals her own doggedness and bravery but also shines a bright

light on the ways other humans doggedly resist the truth Here she brilliantly calls those humans to account for the sake of us all *Thousand-Mile Song* David Rothenberg,2010-05 In *Thousand Mile Song* musician and philosopher David Rothenberg uses the enigma of whale sounds to explore whether we can truly understand nonhuman minds Interviewing scholars around the world as they attempt to decipher underwater music Rothenberg tells the story of scientists and artists confronting an unknown as vast as the ocean Along the way he plays his clarinet live with whales in their native habitats from Russia to Hawaii making interspecies music that appears on the included CD Richly detailed and deeply entertaining *Thousand Mile Song* is an imaginative look at the most intriguing creatures of the ocean Whales, Dolphins, and Porpoises Kenneth S. Norris,2023-11-15 The Oxford Handbook of Critical Improvisation Studies, Volume 1 George E. Lewis,Benjamin Piekut,2016-08-22 Improvisation informs a vast array of human activity from creative practices in art dance music and literature to everyday conversation and the relationships to natural and built environments that surround and sustain us The two volumes of the *Oxford Handbook of Critical Improvisation Studies* gather scholarship on improvisation from an immense range of perspectives with contributions from more than sixty scholars working in architecture anthropology art history computer science cognitive science cultural studies dance economics education ethnomusicology film gender studies history linguistics literary theory musicology neuroscience new media organizational science performance studies philosophy popular music studies psychology science and technology studies sociology and sound art among others *Federal Register* ,2013 *Exploring Animal Behavior Through Sound: Volume 1* Christine Erbe,Jeanette A. Thomas,2022-10-03 This open access book empowers its readers to explore the acoustic world of animals By listening to the sounds of nature we can study animal behavior distribution and demographics their habitat characteristics and needs and the effects of noise Sound recording is an efficient and affordable tool independent of daylight and weather and recorders may be left in place for many months at a time continuously collecting data on animals and their environment This book builds the skills and knowledge necessary to collect and interpret acoustic data from terrestrial and marine environments Beginning with a history of sound recording the chapters provide an overview of off the shelf recording equipment and analysis tools including automated signal detectors and statistical methods audiometric methods acoustic terminology quantities and units sound propagation in air and under water soundscapes of terrestrial and marine habitats animal acoustic and vibrational communication echolocation and the effects of noise This book will be useful to students and researchers of animal ecology who wish to add acoustics to their toolbox as well as to environmental managers in industry and government The Empty Sea Ilaria Perissi,Ugo Bardi,2021-02-12 The Blue Economy is used to describe all of the economic activities related to the sea with a special emphasis on sustainability Traditional activities such as fisheries but also undersea mining tourism and scientific research are included as well as the phenomenal growth of aquaculture during the past decade All of these activities and the irresistible prospect of another new frontier has led to enthusiastic and most likely overenthusiastic assessments of the

possibilities to exploit the sea to feed the world provide low cost energy become a new source of minerals and other future miracles This book makes sense of these trends and of the future of the blue economy by following our remote ancestors who gradually discovered the sea and its resources describing the so called fisherman s curse or why fishermen have always been poor explaining why humans tend to destroy the resources on which we depend and assessing the realistic expectations for extracting resources from the sea Although the sea is not so badly overexploited as the land our demands on ecosystem services are already above the oceans sustainability limits Some new ideas including fishing down for untapped resources such as plankton could lead to the collapse of the entire marine ecosystem How Neanderthals crossed the sea in canoes how it was possible for five men on a small boat to kill a giant whale what kind of oil the virgins of the Gospel put into their lamps how a professor of mathematics Vito Volterra discovered the equations of fishing why it has become so easy to be stung by a jellyfish while swimming in the sea and how to play Moby Dick a simple board game that simulates the overexploitation of natural resources are just some of the questions that you will be able to answer after reading this engaging and insightful book about the rapidly expanding relationship between humanity and the sea

Proceedings Indiana Academy of Science,1921 **Proceedings of the Indiana Academy of Science** Indiana Academy of Science,1921 *Translation in the Performing Arts* Enza De Francisci,Cristina Marinetti,2025-03-31 This innovative collection showcases the interconnectedness of translation and the performing arts drawing on examples spanning languages eras and modes of performance to argue for the importance of re envisioning translation beyond writing Featuring contributions from established and emerging scholars the volume builds on recent epistemological shifts from a genre based view of translation toward a material based approach interested in how performance and embodiment shape translation Chapters highlight the ways in which in the nexus of translation and performing arts we can situate the cross cultural encounters and transnational exchanges that underpin translation beyond the ideology of print and help us to better understand the international circulation of performative works The volume covers a wide range of embodied practices from immersive theatre and intercultural opera to dance and sign language performance while also incorporating key perspectives from interviews with active practitioners Taken together the collection makes the case for a more nuanced understanding of translation one which accounts for the relationships between translation and the myriad forms of performance that permeate daily life This book will be of particular interest to students and scholars in translation studies visual culture theatre translation performing arts literary studies media studies and reception studies **Whale Deep Hearing** Raina Mooncrest,AI,2025-02-27 *Whale Deep Hearing* explores the captivating realm of whale bioacoustics revealing how these marine mammals use sound for communication navigation and social interaction It delves into the physics of underwater acoustics explaining how factors like temperature and salinity affect sound propagation The book highlights the diversity of whale vocalizations from the haunting songs of humpback whales to the echolocation clicks of orcas emphasizing the sophistication of whale

communication The book examines the impact of human generated noise pollution on whale communication and behavior revealing how shipping sonar and industrial activities disrupt their acoustic habitat It presents evidence from hydrophone recordings behavioral observations and anatomical studies to support its claims This interdisciplinary approach integrating oceanography marine biology and environmental science provides a holistic understanding of whale communication and its ecological significance The book progresses from the scientific foundations of whale bioacoustics to an analysis of different types of whale vocalizations and concludes with a discussion of conservation strategies By presenting the information in a scientific yet accessible manner Whale Deep Hearing is a valuable resource for marine biologists conservationists and anyone interested in ocean conservation
